BRAD HENRICH IN PORT ERIN ON THE ISLE OF MAN (PHOTO BY LISA HENRICH, 2011)

“A motorcycle is not just a two-wheeled car; the difference between driving a car and climbing onto a motorcycle is the difference between watching TV and actually living your life. We spend all our time sealed in boxes and cars are just the rolling boxes that shuffle us from home-box to work-box to store-box and back, the whole time, entombed in stale air, temperature regulated, sound insulated, and smelling of carpets..”

—Poet Dave Karlotski

AEROSTICH LANE SHARE TOOL

No more Mr. Nice Guy -- five all new more defiant messages: "Alien" face, "Alien - This Is My Car," "Jolly Roger," "Jolly Roger - This Is My Car" and "Jolly Roger - One Less Car." The deal is this: motorcycles are not cars. Throughout most of the USA, lane-sharing (aka "filtering") is illegal, but that's not so across the rest of the world. And it's not unsafe. This is about giving brave civilly-disobedient riders permission to show those stuck in backed-up traffic there is a better way. Brilliant, right? Except it has been available for a year and so we've only sold about five of them. We've already cut the price twice, so it's not even profitable to make them anymore. This thing took us years to develop and engineer. And it's a blast to use. Everyone smiles. Installation simply involves routing the wire between the plate rotation motor and the handlebar (or mirror stem) mounted control button. Then connecting the fused battery leads midway. Touch the button and the alternate message displays for ten seconds -- then the tool automatically folds back to show your plate. Holding the button five seconds displays the alternate message until the button is touched again. An LED indicates whenever the alternate message is on. A total of ten available message panels, including: "Lane Share Test," "One Less Car," "Share The Road," "Thank You," a Mr. Happy Puppet "happy face," (We recommend Mr. Happy...or the Jolly Roger.) Includes a CD with about fifty additional formatted messages ready to print and use, and a video installation guide. 12V. Anodized aluminum. Mounting hardware included. But deploy at your own risk...being an avant-garde bad-ass revolutionary is not for everyone. Much additional information at aerostich.com. 10.75"x4.5" (9" open). Not Available in California. Specify message.

#3305 \$167.00

AEROSTICH BLANK LANE SHARE TOOL PANELS

The ideal conduit to unleash your inner anarchist awaits with a set of blank panels for the Lane Share Tool. Paired with the included markers, you can create a customized message to use the LST as a public platform to rail against your local congressman, protest restrictive riding laws...exercise your freedom of speech with ultimate portable versatility. Like your own private soapbox bolted to the back of your bike. Keep it clean, or not -- but use at your own risk.

#3278 \$12.00

Be the Marble: "Fill a bucket with baseballs, and there remains room for a lot of marbles in the interstices. When the baseballs see a marble rolling past and get irate they have two options: Accept the marbles, or demand action from the authorities. Both favor us marbles. If they accept us, fine. If they call their legislators and city council persons complaining, a public debate ensues. When that happens, the marbles have a chance for justice. If enough marbles are civilly disobedient, eventually things change in the marbles favor."

—Mr. Subjective

AEROSTICH LICENSE PLATE HOLDERS

Tell the gas-guzzling world how efficient your ride is. These license plate holders state clearly 40, 50, 60, or 70 MPG followed by the popular phrase "one less car," or more boldly "THIS IS MY CAR." Perfect for adding your two cents to the daily commute or mile-munching tour.

Warning: Use of this product has

been known to inspire or amuse, so expect the occasional question from the bold and/or clueless. Especially whenever gas prices spike. A 7.5"x5" durable plastic backing with drilled holes for mounting, the lettering is 0.65" high. Specify 40, 50, 60, or 70 MPG or THIS IS MY CAR.

#3396 \$5.00

AEROSTICH RIDE THERE & ONE LESS CAR LICENSE PLATE FRAMES

Basic black, lightweight plastic frames that surround your license plate with Deeper Meaning to puzzle and annoy the world at large.

One Less Car #3357 \$5.00

Ride There #3358 \$5.00

FLASH 2 PASS GARAGE DOOR OPENER

Makes opening the garage door as simple as a double-click of your high beams. Easily installs and works with any garage door. Wire the compact, weatherproof transmitter into your headlight and mount inside the headlight bucket, in the fairing or strapped to the frame. Receiver replaces the existing inside garage door activation switch and can be programmed to accept up to 6 different transmitters using digital rolling code technology. Works on any motorcycle or scooter with a headlight. No more fumbling with bulky openers or need to go inside to open the garage door. Complete instructions and mounting hardware included. Transmitter: 2.5"x2.5"x.75", Receiver: 4.25"x2.5"x1.25".

#1513 \$79.00

AEROSTICH ULTRALIGHT BIKE COVERS

Small enough to take on all your road trips, these pack into a built-in self-storing pocket about the size of your hand. Overall, it's half the size of the next smallest full-coverage cover because it's made from a thinner, lighter fabric. The strong opaque 1.1 oz siliconized ripstop nylon is plenty tough and keeps water and dust off your bike... it's widely used in parachutes, sailboat spinnakers, kites and skysails. The integrated elastic cinch cord tightly snugs all covers close to your bike so it won't blow off during a breeze, and additional grommets allow for further binding or tying down. The Aerostich label is purposefully placed at the front bottom center, right on the hem, so it's easy to find the front of the cover. The Seat Saver extends from back fender to handlebars to cover and protect the upper half of your bike—just the seat and instruments and self packs ultra-small. For improving overnight security at the seediest, darkest motel parking lot, the self-storing pocket on the hem of the cover also doubles as a panic alarm holder to scare the pants off of whoever wants to take a peek at what's below. Large size covers loaded GS1100s, Gold Wings and other dreadnought sized machines. Medium fits all sportbikes, standards, dual sports, and sport touring bikes with smaller windshields. Small fits scooters. Seat Saver fits all bikes, covering vital areas of instrument pod, handlebars, gas tank and seat. Black.

Large #1735 \$147.00
 Medium #1733 \$137.00
 Small #1738 \$127.00

Seat Saver (not shown) #1741 \$117.00

SELF STORING

QUANTUM SINGULARITY MICRO GARAGE DOOR REMOTE

This miniscule opener is ideal for motorcycle use when accessing your personal Bat Cave. Keychain-style for convenience, this unit can also slip into the smallest of pockets or mount inconspicuously on a triple clamp with hook & loop or double stick tape. Easy to program, it is compatible with most major brands of garage door and security gate openers. Not compatible with rolling code openers. Works on pre '97 opening systems. 1.25"×2.5"×.5"

#1420 \$28.00

PROGRAMMABLE/ROLLING CODE MULTI-REMOTE

This frequency scanning three button remote can be programmed to operate up to three different devices, as long as they are either Chamberlain, Sears, Liftmaster, Craftsman, or Raynor models with an orange "smart" button and yellow indicator light. The "Security +" rolling code feature provides maximum protection and makes code grabbing impossible. Works on '97 and newer opening systems. Measures only 1.5"×0.5"×2.5".

#1436 \$42.00

MINI-MULTI GARAGE DOOR OPENER

Equipped with the latest Series II electronics, this Genie remote will operate up to three different Genie Intellicode door openers as well as being compatible with Code Dodger openers by Overhead Door. Measures even smaller than the Quantum Singularity Remote. Works on '97 and newer opening systems. 2.5"×1.5"×.5"

#1472 \$40.00

GORILLA REMOTE ALARM

An ultra compact 120dB loud motion sensing alarm with keyring remote transmitter. The motion sensor and siren are both adjustable. A unique two stage shock sensor provides seven levels of sensitivity and less irritating false alarms. The alarm will also activate if a hot-wire attempt is detected. A "panic" feature allows the remote to activate the alarm from up to 100 feet away. Simple two wire installation. Small size mounts in tail section, under seat, behind sidecover...anywhere. 3"x3.5"x1.75".

#4557 \$117.00

AEROSTICH LEVER LOCK

Adapted from a trailer hitch lock, it works quite well as a bike disk lock. Compact, light-weight security that is easy to carry and use. Hardened zinc alloy design features 7mm diameter steel shackle. Internal O-ring and weather proof cap seal out water, dirt, grime and corrosion. Protective rubber bumper guards against rattling and abrasion. Locking arm rotates 360° for easy latching. Lifetime warranty. Includes 2 keys. 2"x2"x1", 8mm pin, .5 lb

3/4" Span – Lever Style #1180 \$17.00

SCORPIO PAGING ALARM

Can't chain a mean 100 lb Rottweiler to your bike? Try this alarm. It provides real security, gives real peace of mind – and fits neatly in any pocket. Its compact ultra-long-range paging remote functions reliably up to half a mile away and features a 2-way FM transceiver with an easy to read backlit LCD that provides multiple ways (silent, vibrate and audible) to instantly notify you of any tampering. The Scorpio's compact control module mounts anywhere. It is a hermetically sealed unit, equipped with a Dual Axis Accelerometer designed to detect any impact or movement from any orientation. The powerful, built in 120 dB multi-tone siren – as loud as a jet taking off – is going to mess up anyone tampering. Built-in security features prevent hotwiring, and even allow the bike to be remotely disabled in a hijack

situation. The alarm sentry is smart, too, Batman: It's remote transceiver has a proximity sensor which can automatically arm the system as you walk away, and then send the disarm command when you return – without your lifting a finger. Add in a battery back-up (ensuring operation even if wires are cut), a remote finder, a "panic" mode, an anti-hijack/engine disable feature (which remotely shuts down the bike), an ignition sensor and a battery safeguard...it all means serious bike security. Includes alarm,

installation kit, instructions, rechargeable keychain remote control and peace of mind. No need of 'Spike' (Uh...sorry fellah...that's a nice doggie...settle down...Woof, woof, woof! Grrrrr!) 3"x1.5"x.5".

#4500 \$437.00

AEROSTICH DOG BONE LOCK

Made of stainless steel, this sleek dog bone style disk lock has a mean bite. Super-compact and lightweight design make it easy to carry along. Good security at an affordable price. Hardened design thwarts attempted drill-outs, cutting, sawing, shooting or blasting. Patented dual lock lug design, no internal springs to seize or break. Protective rubber cap and internal O-ring protect keyhole from water, grime and dirt. High security tubular keys won't bend or break. Hardened 7mm pin diameter. Lifetime warranty. Includes 2 keys. 4"x1"x.75", .5 lb

7/8" Span - Dog Bone Style #1181 \$27.00

AEROSTICH TRANSPONDER TRANSLATOR

If you happen to park two of the latest-greatest bikes (example: Ducati Multistrada's with 'keyless-wireless' ignition gizmos) next to each other, mysteriously neither will start. Their keyless ignition transponders somehow cancel each other out and electronically 'tilt' the ignition systems. Very embarrassing... So before you end up pushing a \$20k paperweight to the other side of the street so it can turn itself back into a motorcycle, get a Transponder Translator. This jewel-like miniature hand-crank (fishing reel sized) generator sends short infrasonic bursts across the 'brown note' frequency range to somehow unwind the close-proximity effect and allow you to start your motorcycle without further ado. No idea how it really works. Another innovation from Wayne Williams Fine Electrical products. Made in USA.

#CLES \$57,289.24

HELMETLOCK

A carabiner with a built-in combination lock makes a great portable security tool. The programmable 3-pin locking latch opens outward, allowing it to fit around handlebars or frame tubes up to 1 1/8" diameter, and is rubberized to prevent scratching. A fast, durable way to lock a helmet, jacket or bag to your motorcycle. Use with a lightweight coiled cable for securing multiple items together or as a lightweight anti-theft bike lock.

#1182 \$27.00

SHACKLE / DISC LOCK

A 1/2" rubber-coated shackle made of superior steel is what sets this lock apart. A reinforced sleeve-over-crossbar construction adds exceptional strength. Impervious, anti pick/pull/drill, dual steel ball locking M-cylinder mechanism with an integrated dust & water cover. White LED spotlight on main key and 4 spare keys. Includes disc reminder and belt clip carrying pouch. Also includes an anti-theft protection warranty. 4.3"x4"x1.3". 3 lbs.

13mm Pin #1174 \$45.00

STAPLER DISC LOCKS

Put one of these on your bike and rest assured it's not riding anywhere without you. Anti-pick/pull/drill, dual steel ball locking M-cylinder lock mechanism with integrated dust cover. Armored steel case with titanium plating. Ultra-hardened steel pin. Both locks include a white LED spotlight on main key and 4 spares. Includes disc reminder and belt clip carrying pouch. Two pin sizes to choose from: 10mm (2"x3.75"x1", 2.5 lbs.) or 5.5mm (2"x2.75"x1", 2 lbs.). Lifetime warranty.

5.5mm Pin #1172 \$40.00

LUMA DISC LOCK

Only a direct hit from a mortar shell could dislodge this thing. This disc lock is made by one of the most reputable lock makers in Europe. And they have some experience, since instances of bike thievery are more common across the pond. There's no key to lose or misplace, as it has a built-in program-yourself combination lock.

The die-cast body is impenetrable, an engineering design it exchanges for weight. Because of its rock-solid construction materials, it's a bit on the heavy side, but the included carrying pouch makes it tote-friendly. The hi-viz orange color will prevent most of us from attempting to ride away prior to removal (Who? Not us...?). 10mm pin, 4.25"x3"x1.5", 1.75 lbs.

10mm Pin #1179 \$42.00

WARNING SIREN DISC LOCKS

An integrated motion-sensing alarm that chases off jokers who think they have a right to move your bike, and also lets parallel parkers know, "Yes you did make contact with that motorcycle in the rear view mirror, and if you keep going you'll knock it over." It's even the perfect size for pitching at the heads of people who mouth off - it'll be right in your hand during the time after approaching your bike and before riding away - when everyone seems to think they have the right to talk to you. (For some reason the pacifist Europeans who designed Xena didn't put this valuable information on the package...) Xena's 120db screamer also keeps you from charging off with it still shackled to your disc, avoiding embarrassing smashed calipers and summersaults. She's a simple alarm and a sturdy lock that wards off evil and gives you peace of mind. The smaller, yellow XX6 has a 6mm pin, 3.2"x2.3"x1.3" 1.32 lbs., and the larger Stainless Steel XX 15 has a 15mm pin, 4.2"x2.7"x1.3" 1.99 lbs.

6mm Pin #1151 \$79.00
15mm Pin #1161 \$109.00

DISC LOCK REMINDER

A lightweight, 3mm, easy-to-carry, bright orange coiled cable intended for use as a reminder that your disc lock is on and thusly preventing you from riding away unawares with predictable/dire results. Also handy for locking up clothing and helmets. 5' (extended).

3mm 5' #1176 \$6.00

STOP LOCK REMINDER

Hey, good thing you'd never roar off with your disk lock still on and crash like an idiot in front of the bar, right? Then you don't need this. For the rest of us, this handy item is a reminder that slots into your ignition lock and will help in the task of keeping self-inflicted mechanized Darwinism at bay. The Stop Lock is a bright red plastic device that has an attached ring allowing you to keep it on your lock so you'll always have it when you need it. Keep it a brake (not a break) lock with the Stop Lock Reminder.

#1164 \$4.00

GRIP LOCK

An interesting alternative to disc locks, this device allows you to immobilize your bike by clamping it over your throttle and brake lever or, alternatively, your clutch lever. There are four locking positions for your controls, and the Grip Lock is supplied with three different inserts allowing it to fit 98% of all handgrips. Featuring an anti-drill lock barrel and heat treated steel reinforcing bars molded inside, it's as tough and effective at deterring theft as it is easy to use (and remember). Small enough to fit in a pocket. 6"x1.75"x2".

IMMOBILIZER LOCK ANCHOR

This thing ain't goin' nowhere without a blasting cap. Attaches to the ground, a wall, or any immovable surface you want to put it on. And stays put. The 5/8" hardened carbon alloy steel shackle lays flat when not in use, making it safe to walk or drive over. Comes with big honkin' masonry bits and bolts for optional installation in driveway, garage, etc. 7.5"×1.7", 6 lbs.

#1167 \$87.00

"Dear Mr. Subjective,

I think I have everything I need for motorcycling. I'm all set. I've been at it a long time. Then all of a sudden on another return trip to California I opened a motel room door one morning and there's the KLR crashed on its side. Maybe the disk lock thwarted the thieves. Maybe they noticed what it was and threw it down in disgust. Now, I have the new Lock Alarm in front of me, along with several other useful items from your fine and entertaining catalog.

Next time I'll be able to wake up, look out the window and determine just how mean I'll want to be...or not. Oh, and thanks for the little book: *Lightweight Unsupported Motorcycle Travel*. I'd have saved a ton of money buying and maintaining those big heavy bikes if I'd been able to read it 50 years ago. Truly is the gospel for this niche of motorcycling. Amen, Terminal Case."

—Bill Goodan, 9/07

GEAR LOCK

Equipped with a super-tough vinyl coated 8mm steel cable, the lightweight and easy to pack locking cable is long enough to lock up a lot of stuff in a secure manner. Run through the sleeve and leg of a Roadcrafter and through a helmet, and this lock will allow you to roam unencumbered by gear or (an excess of) worry at rallies or races. Lock has a changeable combination and is non-corrosive. Length: 10'.

10 ft / 8mm #1060 \$19.00

AEROSTICH CABLE LOCK

Six feet of plastic coated 10mm straight, flexible cable with a heavy duty integrated key lock. A good all-around security tool. Plenty long enough to connect several bikes together at a motel and big enough to slow and/or thwart thieves. Small enough to coil up and carry easily 10mmx6' Affordable, versatile security.

6 ft / 10mm #1177 \$15.00

CABLE LOCKS

The appearance of these cable locks alone is enough to thwart any would-be theft attempt. The massive 20 or 25mm twisted super strong steel cable is wrapped with hardened steel links and covered in thick vinyl. They feature rubber coated, anti pick/pull/drill, dual steel ball locking M-cylinder mechanisms with integrated dust & water covers. There is a white LED spotlight on main key and 4 spare keys. Superior craftsmanship and strength. Lifetime warranty. 20mm is 6' and 1.5 lbs. 25mm is 5.5' and 5.8 lbs.

6 ft / 20mm #1170 \$57.00

AEROSTICH TRAVELLER BIKE LOCK

Protect your bike anywhere with this fast deploying and easy to carry cable lock. Although the thick 12mm cable and Ace cylinder lock does not provide the ultimate heart-of-darkness bank vault security, this lock is so easy to use and carry that it's perfect for travelers and everyday lock-ups when on errands. When traveling it can be quickly stored as a straight length of cable...it lays perfectly along your duffel or your bikes frame. This thoughtfully designed midweight security setup also has an o-ring sealed lock mechanism that keeps moisture out of the internals.

3 ft / 12mm #1153 \$20.00

RETRACTABLE CABLE LOCK

Secure your helmet, suit, tank bag or duffel bags in seconds. Works just like a tape measure but uses a spring retractable 36" coated 2.5mm steel cable and resettable three dial combination. Small and light in your shirt pocket but strong enough to discourage bad guys. Locks solid to any length. Lets you relax when seated at some restaurant where you can't keep an eye on your bike.

3 ft / 2.5mm #1011 \$24.00

CABLE LOCK ALARM

Secure and alarm your bike and gear in seconds with this versatile cable-and-alarm combination. The ultra-hard 8'x3mm plastic coated cable resists cutting and sawing, but if it ever becomes broken by any method, the loud 120 decibel siren instantly shrieks...and it will be heard a long way away. The steel alarm housing comes with a wall bracket that can be permanently installed at home or work parking areas... but this compact alarm system is also perfect for travel. The electric alarm circuit conducting cable is long and flexible enough to thread through multiple bikes and piles of packs and gear in seconds. Requires a standard 9V battery (not included). An Aero/RWH exclusive. 3"x5.5"x2.5".

8 ft / 3mm #4555 \$27.00

RETRACTABLE ALARM LOCK

If someone tries to tamper with this lock while it's on your bike, they'll either be scared silly or they'll be rendered temporarily deaf and dazed. The ear-piercing 100 decibel alarm will sound if the 2' x 1.5mm coated steel cable is cut or the lock itself is messed with, so you'll definitely hear it even if you're far, far away from your bike. It also has a movement sensor that can be switched on or off to sound the alarm if the lock is moved in any way. No keys to lose or misplace, it comes with a built-in program-yourself combination lock. Also comes with a laptop computer lock. Batteries included. 3.5"x2.5"x1", 3.5 oz. 2 ft x 1.5mm Cable

2 ft / 1.5mm #4962 \$22.00

AEROSTICH CABLE LOCK

This lock is made for police, fire, hospital, and airport security use, but is ideal for locking up your jacket, helmet, and tank or seat bags. Light, fast and easy to use. One end terminates in a no-scratch, vinyl booted, aluminum sleeve that protects a recessed Ace cylinder lock. The other end of the flexible, nylon covered, 7' over 7" stainless steel aircraft cable, releases. The 4mm cable is hard to cut and small enough to thread through tight places. The lock is hard to break.

1.5 ft / 4mm #1156 \$42.00

FLEXWEAVE ANTI-THEFT CABLES

Take your pick from 2 or 6 feet of ultra flexible, lightweight vinyl-coated security. Constructed of 5mm steel cable with looped ends, these cables enable you to use your own padlock or the bikes helmet lock for on-bike security of clothes, helmets, bags, and the like. The high-pressure swaged connectors that secure the loops are covered with heat-shrink tubing, a nice touch. Easy to carry peace of mind.

2 ft/5mm #1046 \$6.00
6 ft/5mm #1036 \$7.00

CRAMPBUSTER

The simpler, easier-to-use twist grip cruise control. It's a single piece of shaped acrylic plastic that springs open and slips right onto any throttle grip. You can rotate it forward 360° – yet when a downward pressure is applied it stays perfectly in place without squeezing. This is the original cruise control. Its still-unique design makes it the easiest one to use.

Standard #1474 \$10.00
Wide #1482 \$10.00

THROTTLE ROCKER

Sounds like a video game or some such, but it's actually a tough, injection molded polymer device that's secured onto a stock throttle grip with a hook & loop strap giving the rider a relatively large, flat surface to rest the heel of the hand on, easing the normal hand and finger hold. This makes for far less effort to maintain a constant cruise speed, handy on those long days in the saddle. Simple and effective. Installs/removes without tools and packs away in no space when not needed.

#1826 \$10.00

THROTTLE BOSS

A simple solution to the age-old problem of throttle-hand and arm fatigue. This easy-to-install palm rest for your twistgrip is made of a high grade, resilient and comfortable polymer. Fits 7/8" or 1" bars and installs without tools. Nice..

#1475 \$12.00

NEP CRUISE CONTROL

The simplest flip lever cruise control available. Lightweight snap-together Zytel® Nylon construction. A single micro-adjustable Allen setting screw. Fits/adapts to many bikes. (Even MZ's...) Designed for dual cable Honda.

#1896 \$22.00

VISTA CRUISE

Light, simple and very compact. Molded from durable glass filled Zytel® Nylon. Clean, unobtrusive look when installed (looks like it belongs). Fits most older (70's, 80's, 90's) Honda and Kawasaki dual cable throttles. Specify dual cable or Yamaha. For 7/8" handlebars.

#1895 \$25.00

GO CRUISE™ THROTTLE CONTROL

An amazingly clever, simple solution to relieve wrist fatigue on long rides. Installs over any throttle grip in seconds, no tools required. The patented smart-clip tension design locks easily into place against the brake lever to maintain your cruising speed, without the need to hold the throttle. Disengaging is as easy as returning the throttle to a closed position or giving the break lever a squeeze. High-mile rides just got a little more comfortable. Two sizes: Small (for Street and Sport Bikes), Large (for Cruisers). Black.

#1757 \$20.00

UNIVERSAL VISTA CRUISE CONTROL

The most popular "universal fit" model. Accurate, no-slop friction ring setup. Fits most Honda, Yamaha, Suzuki, Kawasaki and Moto Guzzi. Specify 7/8" or 1" handlebars. BMW adapter fits "R" or "K" models from 1985-1998.

#1893 \$35.00

BMW Adapter #1894 \$12.00

E-Z FILL NOZZLE KEY

If you've ever encountered the charmingly termed "evaporative recovery nozzles" at gas stations, you know what a semi-spastic wrestling match with one of these flammable-spewing horses appendages can be like. All you're trying to do is refuel your motorcycle, right? However, for those of us so afflicted, this nozzle key artfully retracts the corrugated... forepart of said alloy proboscis and allows you to gas your bike with a minimum of fuss and splatter. Small, light, packable, and a real help for those of us afflicted with such infernal devices. Get one, carry it in your tankbag and be prepared!

#2818 \$8.00

KICKSTAND KRITTERS

'Hey Rocky, watch me pull a frog outta my hat...Rocky? Rock...AHHHH someone squished my squirrel friend under a motorcycle!' These 'roadkill' critters keep the bike upright with style. A durable 4" disk insert keeps the kickstand from melting into hot asphalt or sinking into soft dirt. Furry fabric is fully washable...or not, if a real roadkill appearance is desired. A functional, furry mascot for the next parking lot, roadside stop or rally. Choose Splattered Squirrel or Flattened Frog. 9"×7"× Flat.

Squirrel #3438 \$19.00

Frog #3439 \$19.00

HEADLIGHT SHIELD

It can be unbelievably expensive to replace a cracked or rock chipped headlight lens. Some lenses are over two hundred dollars. Apply this cut-to-fit, double polished, ultra-clear, flexible film and you'll be ready for common detours, gravelly back roads and the big Cassier-to-Alcan-to-Anchorage (and back) ride. The headlight shield goes directly on the headlight lens so there is no place to trap moisture, dirt, and

bugs. It is also UV resistant, won't affect light pattern or output, and is all but unnoticeable. Uses a unique, durable, peel and apply, later-removable, 3M adhesive. Face oncoming traffic on gravel surfaces without fear. Also great as a custom see thru tank pad.

Medium (12"×12", 14mil) #4910 \$24.00

Large (12"×24", 14mil) #4912 \$40.00

AEROSTICH TITANIUM SIDESTAND PLATE

Well, if titanium is good enough to build high-performance fighter aircraft out of, it stands to reason it will suffice to keep your bike from falling over. Measuring 2.5"×4",

this thing is as thin and hard as Clint Eastwood on a bad day, and will keep your scooter up and off of the soft stuff in high metallurgical style. Waay cooler than a stomped beer can. Dood.

#4640 \$15.00

AEROSTICH CARBON FIBER SIDESTAND PLATE (CFSP)

Whip it out for high performance on hot asphalt. The CFSP looks and works better than a flattened can, which is never around when you need one anyway. Stiff and light, the Carbon Fiber

Sidestand Plate is about the same dimensions as a pack of cigs (but thin), so it will fit into your pocket with room to spare. Included is a natty Aerostich Ultrasuede carrying sleeve that protects you from earthen parking lot dirt. The sleeve may be attached to the inside of your bike's fairing so it's always at the ready... or just whip it out of a jacket pocket. The official membership card of the secret "Hey, dude" riders club. 4"×2.5

#1424 \$20.00

Mountable #1453 \$22.00

MOUNTABLE

AEROSTICH CFSP MK II DELUXE

Eliminates needless bending to retrieve sidestand plate. This Mark II Deluxe CFSP has a 62" black nylon utility cord for looping over the left grip. When you're ready to go, just reel it in while comfortably

saddled. Includes a "Remove Before Flight" ribbon so you'll never accidentally leave it behind. Same black ultrasuede storage bag as the CFSP.

#1425 \$24.00

CYCLE E-PASS

Low profile holder for riders who use electronic toll tags like EZ-Pass, M-Tag, I-Pass, Smart Tag, Fast Pass, etc. Use the electronic lanes and never stop at

another toll booth again. What's that worth? Mounts easily on all handlebar sizes. Specify Standard or Sportbike. Black.

Standard #4275 \$22.00

Sportbike #4277 \$22.00

TRIPLE CLAMP SAVING KEY CHAIN

Created by a moto-obsessive perfectionist, this key chain has soft, woven nylon loops and a rubberized centerpiece which eliminates that scratched-and-shot-peen-hammered look surrounding most motorcycle ignition switches. 6.5"×.5"×.25".

#1479 \$5.00

ELECTROPODS

Two pods of eight super bright red LEDs that are wired into your bikes brake light circuit. When the brakes are applied they light up and flash for added safety. For all 12v systems, and easy to install. Includes complete instructions and cable ties.

#4636 \$32.00

HYPER-LITE

Hyperlites are comprised of sets of superbright LEDs and state-of-the-art flasher circuitry that is both rugged and attention-getting. As a brake light enhancement, these lights come on and flash as your standard brake light activates. We all know the feeling of uncertainty about the folks who tend to follow a bit aggressively and whether they've seen us or not. This should help as the dual LED modules are quite dazzling when turned on. This

is a universal kit and includes two 8 LED units, a flasher, connectors, and instructions. Each light is only .25"×1".

#4552 \$72.00

TURN SIGNAL REMINDER

We've all forgotten to switch our turn signals off. It's embarrassing. To other motorists, we sometimes look weird enough for choosing to ride in the first place... without any endlessly blinking reminders. And some drivers might dangerously misinterpret our temporary feeble-mindedness for actual intentions.

This device monitors your turn signals and begins a crescendoing tone when your signals have been left on too long. Comes pre-programmed, installs easily and can be re-programmed to your own personal preferences. Avoid looking like an idiot, when you're not. 1.2"×1.6"×1.75".

#4641 \$82.00

TWO-WAY BAR END INDICATORS

These high-visibility indicators contain 8 bright LEDs per side that will increase your safety by further enabling you to let others know your intentions more clearly, whether you're coming or going. LEDs do not have a time delay on

operation, so they'll be instantly at full, bright power when you turn your signals on. Made of CNC machined billet aluminum with an anodized finish, they're designed to blend with your bike and not stand out like a sore thumb... until you need them. Installs easily with included fasteners and fits all 7/8" hollow handlebars. Shake proof and melt proof. Set of two. Amber. 2"×1.25".

#2516 \$172.00

360° LED TAILLIGHT BULB

13 superbright LEDs in a 360° radius replace the common 1156 single filament that are probably in your bike right now. No modifications are necessary – installs just like the regular bulbs. LED bulbs have a much greater life span and will withstand vibrations better than all conventional incandescent bulbs – so you'll have less chance of being caught with no taillight or turn signals.

Newest LED technology is 50% brighter than early LED's, but still draws less juice and produces less heat. This may be the last taillight and turn signal bulb you'll ever buy. 12V.

1157 (Red) #8228 \$20.00
1157 (White) #8229 \$30.00

XTREME WHITE TAIL LIGHT & TURN SIGNAL BULBS

Replace your standard 1156 or 1157 tail/turn signal bulbs with 27 watts of bright blue-white light at wavelengths that are closer to what HID lights produce. These provide a pure white light color difference that's noticeable in traffic. No wiring upgrade necessary – just exchange the bulb and go. One pair (2 bulbs) per package. 12V.

1156 (Blue-White) #4685 \$20.00
1157 (Blue-White) #4686 \$22.00

FLASHING HALOGEN TAILLIGHT BULB

It's a bright taillight...until you hit the brakes. Then, it flashes four times fast – pauses – three flashes a little slower – pauses – two more real slow, and it's on full time as a stop light. The entire flash/pause sequence takes 4 seconds and repeats each time you re-apply the brakes. This complex pattern is commonly and intuitively recognized as a deceleration warning. The bulb's reliable digital electronics are all contained inside the bulbs base. It uses a widely available,

easily replaceable "G-4" halogen bulb. (An easy to carry extra is also included.) Fits standard 1157 dual filament brake/taillight bulb sockets. Legal disclaimer: May not be approved for use in all states.

1157 (Blue-White) #2544 \$72.00

PIAA EXTREME WHITE PLUS HALOGEN HEADLIGHT BULBS

Super bright replacement halogen headlight bulbs. Xtreme White Plus technology produces a whiter light color of 4000K and provides the equivalent of 110 watts of illumination from only 55 watts. These are brilliant replacements that will light up road hazards and street signs long before a normal halogen bulb. A Blue topcoat on these bulbs adds a slight blue tint to the lamp, which looks nice when the headlight is off, too.

H4 (55w/60w) #4690 \$52.00
H7 (55w) #4691 \$52.00

"A growing trend in NYC. People here are freaks about mopeds right now (past 3 years). Mopeds are customizable modifiable bikes among a growing crowd that won't even bother looking at dudes on bike bikes. They do really nice mods, then tear ass around town without license plates or helmets, leaving streets filled with grey smoke. They're locked up on bike racks all over the place."

– David Allaband, by email 10–2011

EAR CANNON AIR HORN

This is a full-power railroad locomotive/ocean liner type compressed air horn squeezed into a bike-mountable package. Totally overkill, until you need to wake up some lethal driver. It's got both the high and low ear-splitting tones of the individually sold Fiamm Freeway Blaster Horns, plus a little more oomph. The 139dB high and low tone blasters combine via air induction to cut through the din and make the most distracted of drivers drop their cell phones and pay attention. Installs easily on all bikes with a 4.5"x3"x4.5" space for mounting. The loudest motorcycle horn available. If Ethel Merman, Sam Kinison and John Philip Sousa ever had a band, and played through a wall-of-sound amp rack, it would sound like this. 12V. 18A. 1 lb 4 oz.

Black #3837 \$40.00
Chrome #4749 \$62.00
Wiring Kit #3839 \$12.00

FREEWAY BLASTER HORN

They're not kidding about the "Blaster" part. This horn generates a shattering 132 decibels and will likely get just about anybody's attention, even if they happen to be ensconced in a giant SUV with a phone glued to their ear. And that, of course, is a good thing...we all know that stock motorcycle horns are at times rather underwhelming. Fix all that and let 'em know you're there with this important safety device. Available in High and Low tone versions. If you are using only one, go with the low tone. 12V. 10A. 3.5"x3.5"x2.5".

Low Tone #3830 \$17.00
High Tone #3831 \$17.00

PLUG-N-PLAY WIRING HARNESS

Pre-assembled wiring harness makes Ear Cannon installation a breeze. Mount the horn to the bike, plug in the wires

from the harness, route the wiring to the battery and connect to the terminals. Simple, quick installation. Includes 30 Amp relay and fuse, insulated terminals, 18" total of wire and complete instructions...not that you'll need them.

#4767 \$24.00

WIRING KIT

12V 40A SEALED RELAY

12V, 40A Bosch-type relay for use with high amp draw electronic accessories like big driving lights, extra loud horns, double sided arm jesters, etc. Waterproof sealed plastic housing with metal mounting tab. Includes installation and wiring instructions. 2.125"x1"x1.25".

#4667 \$4.00

LED TURN/BRAKE/RUNNING LIGHT

Simply a row of super bright red LED's made to be attached directly to the top or bottom of your license plate using the same mounting holes. Connect to your brake light wires and you're ready to wake up anyone following a little too close behind you, day or night. No rear end worries. In addition to the brake light feature of the Stopper, the Versa Light version looks the same but also functions as a running light and turn signal indicator. Clearly indicate your intentions. 7"x.75".

Stopper #4635 \$28.00
Versa Light #4656 \$42.00

FLEX COMBO

FLEX STICK-ON

SOLID BOLT-ON

MINI LED TAIL/BRAKE LIGHTS

These combination tail light and stop lights feature 16 high-quality, low-draw LEDs, so they reduce both the weight on your bikes rear fender, and the load on the electrical system. So compact they fit any rearward surface, yet large enough to provide good lighting. Each version includes plug type terminals for installation, and features a tough, high impact, all-weather case. Both Flex lights (4.3"x.75"x.35") have adhesive backing and are bendable for mounting to curved surfaces like your rear fender. Flex Combo has two holes for a more secure installation with included nuts and bolts. The Solid Bolt-On (4.3"x.75"x.75") is virtually the same light as the others but features a thicker, solid, non-flexible backing with two fixed post bolts for mounting. Functionally these can augment or replace your bikes tail light. 12V.

Flex Combo #4996 \$36.00
Flex Stick-On #4997 \$32.00
Solid Bolt-On #4998 \$22.00

AEROSTICH SHEEPSKIN SADDLE PADS

Sheepskin cushions, cools and lets air circulate. When it's sticky hot, you'll sit cooler. And when it's freezing, sheepskin is warm and comfy. Between extremes it's always luxurious. Sheepskin has long been used by those who sit for extended periods because of how it cushions and vents. These are luxurious top grade sheepskins, laminated with an Aerostich-exclusive, non-skid $\frac{3}{16}$ " PVC foam mesh base, so they won't creep around on your saddle, even if you ride aggressively. They also won't hold or absorb much water. Saddle sheepskin pads help you stay more comfortable, refreshed and alert on long rides. Each pad features eight strategic bungee attachment points, two lengths of adjustable bungee, and four no-scratch nylon hooks for a custom installation. Use on a long trip and remove for daily urban riding...or just leave on all the time.

AIRHAWK™ SADDLE CUSHIONS

Iron Butt? Air Butt. Really. We all know that on those really long rides, a motorcycle seat can resemble a medieval torture device. Enter the Airhawk™. Its adjustable air-filled neoprene core looks something like the backside of an ice cube tray. The individual cells conform to your shape and eliminate pressure spots that cause discomfort. The outer cover is nylon and lycra, with a nonskid polyester and vinyl base. Designed to stay in place and not creep around during 'active' riding or on day-long rides, it simply lifts off when not needed. The new AirHawk R model features a strategically designed cut-out area that create 3 no-contact points in the most, um, sensitive areas of one's underside. As far as seat cushions for long-distance endurance riding goes, this is state of the art. Stay in the saddle longer with more comfort. Rectangle (11"x14.5"), Small Rectangle (9"x11"), Tapered (12"x18"), Small Tapered (14.5"x14"), Rear (14"x15.25").

BEADRIDER SEAT

Wooden beads provide the movement and airflow riders need to stay comfortable in the saddle, mile after mile. Prevents "monkey butt" on extended rides. Proven by one million long-suffering taxi drivers over billions of miles. Available in four sizes and any color you want...as long as it's black. Replace the tied on straps with the optional ROK Quick Release Straps for fast, easy on/off.

- 10"x12" #1829 \$30.00
- 12"x12" #1816 \$36.00
- 13"x13" #1819 \$38.00
- 14"x14" #1824 \$40.00
- Quick Release Strap #1764 \$22.00

QUICK RELEASE STRAP

AEROSTICH HEATED HANDGRIP THERMOSTAT

This thermostat works by digitally regulating the amount of power to your hand grips. It draws less than the full 45 watts at intermediate settings. (Resistance type thermostats draw full power at all settings.) It features a rotary on/off switch and an LED that blinks faster as you turn up the heat. (At the maximum setting the light is on continuously.) The case size is 1.5"×2.25"×.75". Dash mount.

#187 \$69.00

AEROSTICH WARM WRAP GRIPS

These thin, electrically heated grip pads are made of heat and moisture resistant material and securely wrap over your grips with hook & loop. Enjoy riding with warm hands on even the coldest days, without having to install replacement electric grips. Current draw is only 1.6 amps and they pack away easily when not needed. Heated grip pads let you wear lighter gloves for greater control feel on cold days. You can leave them on all winter if you want to. Standard (36" wide handlebars), Long (44" wide handlebars). 22 watts.

Standard #103 \$45.00
Long #1433 \$45.00

BUN WARMER

Make riding on the most chilly days more enjoyable by heating yourself from the core outward. It makes a huge difference that you'll feel all over your body. The Bun Warmer uses the same basic technology as automobile seat warmers, and it's specifically designed for motorcycles to provide the same "Ahhhhh..." factor

on cold rides. Draws only 1.5 Amps, installs easily and securely (and usually unnoticeably...) under your bike's seat cover. Comes with an on/off switch, and an internal thermostat ensures that you or your saddle won't overheat. 8.75"×8.75".

#1765 \$99.00

HOT GRIPS®

Toasty warm heated grips add value to your bike and will increase your cool weather riding. This is the best heated grip system available. The grip's ribbed pattern and molded material are comfortable feeling and secure

holding all year round. Includes complete wiring kit with resistor, switch, and excellent installation instructions. Draws 24 watts on low and 36 watts on high. Specify open end model for bikes with bar end weights. Spacers included. 4.75"×¾".

#1891 \$109.00

HEATED GRIP KIT

A flexible, adhesive, wrap-around heating element with printed-circuit-type elements that fit between the handlebar and grip, keeping your digits from turning into frozen turkey feet of limited utility during cold weather rides. We all remember what that phenomenon feels like, right? Comes with two elements, wiring, resistor, and an on/off, hi/lo switch. Super, almost unbelievably effective, and a great comfort as well as a safety enhancer. For 12V systems. Draws: low (2 amps/28 watts), high (3 amps/40 watts).

#1400 \$32.00

ANTI MONKEY BUTT POWDER

This will save your ass on long, hard rides. It's purpose-built for your butt, but also works great in underwear and everywhere that is sensitive to chafing, burning, reddening rashes. More than a re-packed drugstore talc or a baby powder, this proprietary formula eliminates getting painfully chafed, raw and rashy during sweaty butt-busting activities. It also provides an immediate "aaaahhh-ooohhh" skin relief on (or after) tough rides. Good for motorcyclists, truck drivers, off road and road drivers, bicyclists, etc., whenever your butt takes a pounding all day. 6 oz. bottle.

#1881 \$7.00

ARCTIC GRIP HEATERS

A quick flip of the three position (Hi/Lo/Off) switch creates warm grips, for a longer more comfortable ride, no matter how low the thermostat dips. The flexible mylar backed heating elements attach discretely under the grips on any style bike. Right and left heaters are calibrated differently for maximum heat control, so no throttle-side resistor is needed to equalize temperature. Includes everything needed for installation: grip heating elements, two stage metal toggle switch, hardware, tie wraps and instructions. For 12V systems. Draws 3 amps/36 watts on high.

#1600 \$52.00

E-FILL SIPHON

A self-priming fuel transfer system. No matter where you are, this ultra compact system won't leave you stranded for long. Throw away that length of gnarly old hose and safely siphon fuel from any gas-powered device without getting a mouthful or lungful of dangerously deadly toxins in the process... or accidentally spilling the caustic, foul smelling stuff all over you or your bike's finish. This is one siphon that doesn't suck. Simply insert the self-priming end into any non-empty gas tank, and put the other end into the transferring container/carrying case (that works a heck of a lot better than a crinkled Mountain Dew can). A few up and down motions and you'll be siphonin' away. The handy stopper clip maintains siphoning even when in the "off" position, so there's no need to begin the process all over again between container transfers to your tank. The included super soak towel quickly cleans up any excess spills and everything fits neatly back into the transfer container/carrying case. Carrying case is 10.1"×2.6"×1.25" and holds 1/8 gallon of gas. Siphon is 68" long. Entire system weighs less than 4 oz.

#4986 \$24.00

AEROSTICH TOW-N-TIE

If you venture into terrain and trails off the road, you know the importance of carrying a towstrap to get back to civilization in the event of mechanical difficulties. What sets this product apart is that they double as 1400 lb. rated tie downs. This can come in handy when you do get towed back to the highway, in case that guy (or gal) in the pickup you flag down is amenable to hauling your busted bike somewhere. Rolled up tight in their nylon bag, they measure just 8"×1.25", small enough to stow anyplace. Don't be forced to leave your bike on the side of the road. Be prepared to tie-down, strap-up or tow back anything, anywhere, any time. Includes two 73"×1" adjustable cam nylon web straps with looped ends and 8" strap loop on cam buckle.

#2627 \$24.00

BAR HARNESS

It's a fact that tying down a fully-faired motorcycle presents challenges when it comes to not crunching bodywork. Sometimes you can get up under the front to the lower triple tree, and sometimes you just can't, due to the angles and all that. Enter the Bar Harness. It's a compact unit with a polar fleece padded strap that crosses over the bike and slips over your bar grips. Loops off the ends of the harness for attaching standard tie downs keep them well away from any of that bustable, expensive plastic. Soft Cuff models use a sturdy red fabric cuff that quickly and easily loops over the handlebars. Cup versions use a polycarbonate cup, reinforced with steel in-lay, that fit over the end of the grips, preventing possible damage to softer grips and hold the cross straps further out on the bars to fit a wider variety of fairings. Constructed using 5500 & 1200 lb. tensile webbing. If you need it, you need it.

- 39" Cruiser - Soft Cuff #3525 \$30.00
- 33" Scooter/Sport/Standard - Soft Cuff #2667 \$30.00
- 36" Cruiser - Cup #2693 \$30.00
- 32" Scooter/Sport/Standard - Cup #2669 \$30.00

BUDDY TOW MOTORCYCLE TOW STRAP

Twelve feet of 1" nylon web (1700 lb. test) with loop end, carrying pouch, and use instructions.

#2500 \$15.00

HAWK FIRE EXTINGUISHER

Hey! Your bikes on fire! Just kidding, but wouldn't that suck? Cover your assets with this compact device and make sure you keep it readily accessible. The beauty of this extinguisher is that it is NON-CORROSIVE which means that you won't trash your bike in the process of saving it. The active ingredient is HR-95, a highly effective, biodegradable and non-toxic compound that is safe to use around children and pets and won't hurt your scoot. HR-95 is not a powder, so you can use part of the contents and the valve will re-seal effectively. Works on class A (ordinary combustibles) and class B (flammable liquids) Pressurized peace of mind. 10"×3.5". 16 oz.

#4027 \$20.00
