BLACK COMPETITION SILK SCARF

Aerostich's Competition weight silk scarf is now available in a rich, dense weave of luxurious 100% natural, handmade black silk. Perfect for riding, silk is warmer, softer, stronger and more durable than synthetic fibers, providing maximum comfort across every temperature range: warm and draft-blocking when cool, and refreshing when worn wetted in hotter conditions. Wrap it around your neck and close up your jacket for all-day draft free comfort, without chafing. The deep black lends a distinct bad-ass look, and does a much better job of hiding the dirt and road-grime. And this durable silk washes well too, if you're into that sort of thing. No other neckwear works this well, or looks this cool. Really.

Features:

- More comfortable during extended rides.
- Warm draft-free comfort when cool.
- Tremendous evaporative cooling when wetted.
- The most hypoallergenic of all fabrics containing a natural protein with 18 amino acids.
- Extra style points.
- The choice of experienced riders for one hundred years.
