# OTL COOL GEAR & A GOOD READ

bars with white knuckles. Enjoy the ride, not to see how fast you can cover ground, because someday that same ground will cover you!"

— Dave Maly

A couple of cool items from WhiteHorseGear.com:

### No Ordinary Flashlight

The big problem with most flashlights is that you have to hold them to put light where you need it. That leaves you only one hand to do the work. Not so, with the BikeMaster 18 super-bright LED work light! A powerful, built-in magnet holds the light securely to ferrous metals and the tilting head stays exactly in the position you choose. The matte black, no-slip, rubberized finish feels great. Turns on when open, off when closed. It's hands down the best flashlight we've ever used. Many of use here at Whitehorse Gear own several of these beauties. The resident gadget guy has one stuck to his home circuit breaker panel, another on his refrigerator, and a third on his rolling toolbox. At just \$15.00 each, get a couple for your garage and saddlebags!

### What On Earth is It?

What are these little white disks anyway? Pour some water on one, and instantly you'll have a wet washcloth ready to wipe your face, clean your helmet or goggles, or you name it! They're just amazing, and 100% biodegradable to boot. They may look like peppermints, but don't eat 'em or you'll be disappointed! Keep a few in your pocket, more in your tankbag, and you'll be glad you did.. Just \$6.95 for 50 disks and a convenient carrying tube!

with the bike (and the road). So refine your spirit and train your body and follow your own path to greater enlightenment. Be the ride you seek. This is as deep as it comes, grasshopper. But in a good (though slightly humorless Euro/Germanic/rationalistic/empricisstic) way. Enjoy this tasty toasted Muesli...it's said to be very good for you. And for the most part, it is. By Bernd Spiegel. Translated by Meredith Hassall. Available from Aerostich. 🇩🇪

### Riding lessons from Germany

This is the best-selling, multi-reprinted, much-acclaimed Ger-man book about riding skills and how-to-think-about-riding. Deservedly so. It is terrific and goes well beyond everything similar. Now finally available in English, the reader is guided through five sections that build upon our evolutionary biology, conscious actions and capabilities, and integration of man and machine to achieve higher levels of performance in the ultimate quest to become one

### The Upper Half of the Motorcycle

on the unity of rider and machine
