## Getting Started: One's First Trip

### PACKING YOUR STUFF...

The first few days of travel dealing with the straps, soft duffels and bags, will teach you if your setup works. The idea is to have things secure, semi-easy to get to, and not too much of a problem to remove or re-load. If it takes twenty minutes every morning to load everything when you are wanting to get going, and twenty minutes again at night to unload when you are tired and just want to be done, it's frustrating.

At least one pack should be easily openable at gas

stations or on a roadside, without untying everything else. Into this should go rain gloves, a sweater, a wind shirt, a hat, and anything that you might need handy for varying weather conditions. And if you buy an extra banana or water bottle at a gas stop, it's nice to have enough available space for it there, too.

Soft bags and duffels are great, but in terms of speed and convenience nothing strapped onto the back of your bike is still as easy to deal with as hard pannier bags or boxes. Conversely, no hard bags are as light, simple and

## ORTLIEB DRY BAG SADDLEBAGS

Sometimes the best ideas are the simplest. Like this pair completely waterproof throw-over soft saddlebags: they are made of the same materials and use the same sealing system found on waterproof 'dry' bags. The easy loading top entry design rolls over and clips at both ends for a completely waterproof seal. Each bag's lower leading end is cut away

for generous passenger leg clearance. The bikeside has a full width Thermo-molded pad to protect paint and bodywork. All webbing and hardware is top grade. Inside are several carefully designed polypropylene stiffener panels as well as a handy organizer pocket, and at the rear of each bag is a Scotchlite™ reflective area. Dry Bag Saddlebags are short enough to fit ahead of the rear turn signals on all motorcycles and are ideal for use on dual sport or sport machines. You won't find frivolous details here, just intelligent and functional bags that won't stick out too far yet will easily hold enough for a weekend camping trip. They are totally waterproof. Why did it take so long for someone to invent these? Easy to install and quick to put on or remove. Black or yellow waterproof coated fabric. 15"×13"×8" each with 3173 cu. in. combined volume.

#912 \$195.00

## ORTLIEB QRL (QUICK RELEASE LATCH) DRY BAG SADDLEBAGS

Completely waterproof soft saddlebag with unique quick release mounting hooks. A built-in padded carrying handle and internal organizer pocket make this a convenient motorcycle briefcase, or attach the removable padded shoulder strap for an ideal sized travel bag or courier bag. Internal stiffener panels and a roll-top closure provide easy access to contents, while side-release buckles keep contents secure. Scotchlite™ reflective areas on both ends allow bags to be attached to either side of the motorcycle. Requires a 3/16" to 5/8" round-tubular mounting system available separately from specialist suppliers. Racks are available for most motorcycles. Contact [www.happy-trail.com](http://www.happy-trail.com) or [www.moto-sportpanniers.com](http://www.moto-sportpanniers.com) for specific applications. Order one bag for each side. Black. (Not Shown). 12"×17"×6"/1465 cu. in. each. (Sold Individually).

### WRITING JOURNALS...

There are two ways I've kept daily logs. If I am carrying a computer, I try to type a few notes in the evening or morning. Usually not more than the basics: Day, Date, Approximate Miles, Location, Weather and anything interesting I experienced or thought about. Some people like to keep exhaustive and detailed expense records, road and turn notations, bike maintenance records and meteorological information. Not me.

If something broke on my bike, I'll note it, and the

circumstances involved in fixing it. If I experienced cold, wet or had headwinds, I'll note those things. Perfect weather, too. Later I can fill in descriptions of briefly noted occurrences and scenes from memory, if I want to. If I am traveling light, I use a little notebook and a space pen. No smaller than 6" x 9" and always bound on the left side. Same things recorded as in the computer, but longhand.

It's interesting to note the way one's handwriting changes during the course of a trip. If it is your first-ever motorcycle (or on a new-to-you motorcycle), it will be especially good to capture your feelings and ideas. You can only do anything for the first time once. Years from now you may find yourself looking back, and you'll have

some idea of the situations you were in, and what you experienced. Some may be embarrassing, but it will all bring back memories and smiles.

The kinds of memories any journal brings back are completely different than the kinds of things a photograph captures. A journal holds what you were thinking, on that day. It helps me to write for some imagined reader: anyone whom you care about is always good. Someone you'd want to share with, and who cares about you, is the best.

### KEEPING LISTS OF THINGS TO DO, POST-TRIP...

The other thing to keep in the trip notes is a record of

things about your motorcycle and kit to pay attention to later. For example, list little easily forgotten items like:

- replace lost ear plug bag
- file off rough edge by seat bar
- shorten rear view mirror stem
- buy mini toothpaste

This sort of a list is best kept separately from the daily notes, located above the daily entries in a text file, or on a separate page of an analog journal.

### AEROSTICH PADDED LAPTOP SLEEVES

Made of soft nylon with a foam padding, this lightweight sleeve has a hook and loop closed top flap and a plush interior. ## Why We Make Padded Sleeves and Cases...

"Because the ones in stores suck. Especially for everyday motorcycle and scooter riding. AeroStich padded cases and sleeves are not overly-complicated, or overly anything. They are simple, practical designs, made at our Duluth shop, using a very lightweight yet flexible (but still semi-stiff) open-cell foam (not floppy neoprene) sandwiched and laminated between two durable fabrics. And no redundant zippers or pockets either.

Inside is thin soft polyester fleece laminate. Outside is a lightweight abrasion-resistant slightly slippery twill laminate. And around the edge is a strong Nylon binding tape.

"Slide your tablet or notebook in. It stays there by slight friction against the fit and fleece. Comes out faster and easier, too. If a cover flap is involved it secures with only a few simple pieces of hook & loop. Your device is protected and ready to pack along without extra weight or bulk.

"Lastly, these cases are really durable. I'm still using a ten year old prototype every day. And it's showing only minimal wear."

## AEROSTICH LP (LIGHTWEIGHT PORTABLE) BAG

Carrying small spur-of-the-moment-errand stuff on your bike is often a problem. This lightweight, ultra-compact water-resistant/repellent sil-nylon reusable grocery bag is the solution. It packs anywhere and doubles as a functional backpack. Jam one of these behind the headlight or a side panel and it will stay there until needed, or toss in a back pack.

These are built to last, better for the environment, and work great for a lot more than just groceries. All seams are reinforced with binding for durability and strength. The two generous handles are tacked and bound, then reinforced again - so they won't rip or pull off. Two draw cord closure straps of nylon flat webbing, sewn through the top lip of the bag secure a quick cinch closure. And the bag's bottom corners are reinforced with Cordura pack cloth.

The nylon webbing draw cords feature grommet style cord locks to adjust the cords to desired length so they can function as backpack-style shoulder straps. And a neat self-storing stuff-pocket is located high on the interior to double as easy-access storage for keys, phones, money, etc.

This bag also works great for surface street urban distances by threading one's left forearm through the handles so the bag hangs just in front of the left knee, too. These LP bags were inspired by Mark Lindemann, motorcycle industry veteran and author of 'The Total Motorcycling Manual' (#5506). Have one along and be ready. Assorted colors. 4.5"x3.75"x2" (compressed), 19"x20"x18" (expanded).

## AEROSTICH MESSENGER BAGS

The most versatile over-the-shoulder bag that can be used on a bike. You'll love it for its size and fit. Triangular in cross-section, messenger bags wrap around your back and stay in position when riding. The original 'Courier' size holds a small briefcase, a few magazines and some files...plus a tablet and notebook computer...with room to spare. It is the most versatile and best selling size.

All sizes are constructed of super-strong 1000D PU-backed Cordura nylon, with a seamless bottom for maximum strength and durability. All also feature water-proofness, simple functional beauty and long-wearing qualities, combined with a bright yellow reinforced PVC waterproof inner lining. Also inside is a usefully-sized organizer pocket (two on the Parcel size) and 'clip-on' key loop. They quickly become soft, supple and feel like an old favorite as soon as you strap it on.

After long use they'll develop a uniquely beautiful 'experienced' patina that reflects your individual patterns of use and wear. This bag's appearance becomes uniquely yours, and its looks continue to improve with use.

The 2" military-spec nylon shoulder strap adjusts quickly and easily with a cam lock buckle for a secure, comfortable all-day fit. An oversize, removable, load-spreading shoulder pad (in color-matching 1000D Cordura, with a grippy Ultrasuede surface) provides all-day carrying comfort (this pad optional on the 'Letter' size).

The large flap closes with a wide strip of hook and loop as well as adjustable side-release buckles to accommodate small or large loads. There's also a handy carrying handle on the top center that's way more everyday-useful than it looks. And visibility is assured with a wide strip of 3M Scotchlite™ reflective running across the flap. These bags are as simple to put on as a guitar, and easier to learn. Red, black, grey, hi-viz lime yellow, or blue (or limited edition pink [not shown] in letter, dispatch, and courier sizes only).

## These Are the Original Modern Messenger Bags

The first Aerostich messenger bag was introduced in 1985. It was a few years before other messenger bag companies (Timbuk2, Chrome and others) existed. Outdoor fashion companies such as Patagonia and North Face also introduced their messenger bags many years later.

In 1985 only two similar bags were available. Both were produced in small numbers for professional messengers only. (Everyone else who carried things by bicycle or motorcycle wore small back packs.) We patterned the first Aerostich Courier bag closely after one of those 'proven-by-messengers' designs.

Both commercial-use-only messenger bags were made of cotton canvas, and they had no hook-and-loop (Velcro) on their lids, no reflective material anywhere, no strap-length cam adjusters and no side-release flap buckles for oversize loads. Aerostich was the first to incorporate these features and also to employ modern materials like Cordura nylon, hook-and-loop, 3M Reflectives, plastic high strength buckles and strap adjusters to this style bag.

Today's Aerostich Messenger Bags remain more strongly made than similar looking bags sold at bicycle, outdoor and college bookstores. And because they are made for commercial users they are tougher, so they last longer. We know of many 20+ year old examples still in daily use.

The construction details of Aerostich Messenger Bags are different, too. An example is how the top flap is constructed. Common bags connect the inner flap's fabric to the outer fabric with an inexpensive 'binding' stitched around the outside edges of the flap. That's fast and easy, but not especially durable. Every Aerostich messenger bag flap is first sewn inside-out, then turned right side-out and edge-stitched the same way a dress shirt collar is made. This looks 'right' and lasts much longer.

Another example is the Aerostich oversize shoulder pad. It is oversized to spread your load better, and is carefully constructed of several materials. When you carry a messenger bag, you'll want this pad.

Aerostich messenger bags are hand made in Duluth alongside the riding suits. There really is a difference.

A Duluth sandwich and smoked fish shop, Northern Waters Smokehaus, recently decided to start a bicycle delivery service for their sandwiches and chose Aerostich Messenger Bags to transport their precious cargo to the hungry local populace. How are the bags working out, we asked? "These bags are super! Easy to use, they fit so many sandwiches at a time, they're like magic." was their response (via Twitter).
