WATERPROOF ADAPTIV TPX 2.0

Updated electronics and blistering performance in a compact, portable bike specific radar & laser detector design. Simple plug-and-play installation, this waterproof and vibration resistant unit can be installed/removed in just seconds for easy portability (and theft avoidance) with integrated quick release system. Detects all police radar and laser bands with top-rated sensitivity and 360° protection with false-alert-reduction logic, additional band lockout modes and a robust, versatile cable connection. Large, backlit, glove-friendly buttons and daylight-visible, front-mounted LCD for ease of use. Includes wiring harness and 3.5mm audio output jack.

#2373 \$299.00

ADAPTIVMOUNT™ HANDLEBAR MOUNT

Specifically designed to minimize the vibration transferred between your bike and mounted electronic device, using a patent-pending dual plate vibration dampening design to absorb vibrations before they reach your gadget. Double ball-joint design allows for optimal positioning, easy adjustment and simple installation. High strength steel and aircraft grade aluminum components combine with absorbent, anti-vibration technology. Ideally suited for Adaptiv TPX Radar Detector (#2373) and can be fitted to mount most GPS, Cell Phone, MP3 Players and other devices.

#2377 \$85.00

ESCORT SOLO S3 CORDLESS

The most powerful, longest range and best performing cordless radar detector available. Period. Signal sensitivity and range is 400% greater than previous generation cordless detectors and its new power management digital circuitry gives more miles of use per pair of AA batteries—up to 40 hours of continuous run time, with low-battery alerts when they need replacing.

Nine programming options allow customizing for your specific riding style and a brilliant new high-resolution OLED graphic display is readable at a glance in all light conditions. The 3.5mm earphone jack equipped S3 is extremely easy to use, offers 360° detection and features a unique AutoSensitivity mode to eliminate distracting false alarms. Plug in an optional 12V SmartCord to show five additional status screens, including a voltage display to indicate the health of your bikes electrical system. Band identification is displayed by X, K, Ka and Laser. Signal strength is shown by a progressively lighted left-to-right bar graph and unique audible alerts. 5.25"×2.90"×1.16". 6 oz. Black.

#2347 \$300.00

ESCORT PASSPORT

This top rated 12V radar/laser detector features an earphone jack... which is a big deal if you ride. It also carries a very smart micro-processor providing 360-degree detection, including the stealthy 'pop' radar guns, with plenty of warning time. In addition to superb long range detection it features advanced EZ programming and offers proprietary Traffic Sensor Rejection software to eliminate false alerts. The multi-color display allows user-selectable colors and new illuminated graphic icons to identify the type of threat at a glance. Compared to earlier radar detectors the exclusive AutoMode circuits separate false signals from real threats better than you'd believe possible. Built-in Bluetooth wireless technology allows pairing with your mobile device for instant alerts real-time speed traps reported by others. Comes pre-programmed and includes a comprehensive owners manual, 1/8" earphone jack, a coiled SmartCord powercord and an automobile mount. 5.3"×3.2"×1.3".

#2331 \$350.00

ESCORT PASSPORT MAX 2

Ride smarter with this ticket-protecting marvel. Incorporates advanced military Digital Signal Processing technology to identify real threats faster and more accurately across all bands while separating out RF interference using a patented AutoLearn feature to remember GPS locations and individual frequency data. Adjustable variable speed sensitivity further eliminates false alerts. DEFENDER® database equipped to alert for active red light and speed camera locations throughout North America. Stunning multi-color display with intuitive graphics to identify the type of threat at a glance and show your current speed and alert settings. Bluetooth technology pairs with smartphone app to warn of nearby alerts reported by other area riders, including access to local speed limit data for over-speed alerts. Customizable set-up to fit your riding style and stay up-to-date with the latest data. Includes soft-sided travel case, windshield mount, 12-volt Combo SmartCord® and quick reference guide. 1.3"×3.2"×5.3".

1" Bars #2297 \$35.00

WIRELESS IN-HELMET VISUAL RADAR ALERT SYSTEM

The Helmet Assisted Radar Detector (H.A.R.D.) visually indicates radar detector activation, wirelessly. This military style 'heads up display' uses micro-technology and a helmet mounted LED. When the red LED comes on, a glance at the detector readouts provides detailed bogey information. The system's plug-and-play transmitter fits next to the detector and the receiver tucks behind the cheek padding or attaches with hook and loop to the outside of the helmet. It's tiny and powered by a replaceable CR2450 lithium coin cell battery.

If your ears are already overloaded with communication systems, earplugs and music players, this is the way to go. Works with radar detectors equipped with an RJ11 jack to power the transmitter. For Adaptive Radar Detector users, a transmitter is not required because the unit already transmits a signal for this receiver. Durable, water resistant and proven reliable in any condition. The LED means the receiver's battery life is measured in months of riding (about 7,000 miles). Transmitter 1.5"×1.25"×.75", Receiver 2"×1.25"×.375".

TRANSMITTER

WIRELESS IN-HELMET AUDIO ALERT

The helmet speaker alerts the rider of the radar or laser signal detected. Designed to fit most full or open face helmets with the

speaker attaching to the ear-pocket or between the linings of the helmet. Water resistant construction and powered by a lithium coin cell battery (included). Out-of-the-box wireless compatibility with TPX detector systems, or add a Transmitter for compatibility with all Beltronics, Escort, Valentine and other radar detectors equipped with an RJ11 jack. Receiver is 1.9"×1.75"×.75", Speaker is 2.25"×.75" and Transmitter is 1.5"×1.25"×.75"

BLUETOOTH TRANSMITTER

Wirelessly syncs with a Bluetooth audio system to send alerts from a TPX (or any other) Detector. Compatible with most Bluetooth systems, transmitter can also wirelessly transmit music and sound from MP3 Players, cell phones and other audio devices. Uses A2DP communication protocol. 3.5mm stereo jack. Includes USB charger.

#2378 \$55.00

VISUAL ALERT

You'll never miss this bright 3-LED flash when a signal is detected. Adjustable brightness for day or night conditions. Plugs in to 3.5mm headphone jack on most brands of detectors. Water resistant and compact design can be mounted to any convenient visible location with included straps. 1.25"×.6", 8' cord.

#2375 \$45.00

AM/FM STEREO WEATHER RECEIVER

Sure your high-tech, app-infested mobile do-everything phone thingy will show an up-to-the-minute-radar map-in-motion and allow you to find out what the weather is going to be anywhere, a week from some Tuesday...but even if you are off the cell service grid, this compact pocket radio easily tunes in your local weather forecasts on AM, FM and all seven NOAA Weather Alert frequencies. Features include a built-in speaker, headphones with 4' cord and 3.5mm jack, clock, removable belt clip, auto channel seek, 19 memory presets, battery power indicator, external plug-in antennae, 90 minute auto shut off option and PLL synthesized tuning system. Uses two AA batteries (not included). 4"×2.5"×.75".

#3916 \$69.00

AM/FM STEREO SHORT WAVE RECEIVER

An amazing pocket radio for travelers that packs a ton of exceptional features and performance into a compact case with an anodized aluminum front. This direct entry PLL synthesized receiver has a folding stainless telescopic antenna, 30 memory presets, manual and seek tuning, an alarm and an LCD display light. Also has a clear built-in speaker and comes with an external antenna, stereo earphones, an AC adapter and a soft fleece carrying case. Uses two AA batteries (not included). A great value. 4.5"×2.75"×.75".

#3863 \$49.00

FOUR CHANNEL AUDIO MIXER + AMPLIFIER

The MixIt2 is designed for motorcycle applications. It provides four inputs for connecting and combining signals from radar detectors, radios, CD players, MP3 players, XM receivers, talking GPSs, CBs, FRS radios, cell phones, etc. Power is supplied by an internal 9V battery (lasts about 25 hrs) or a filtered 12V external power jack to provide clean, noise-free listening.

This signal mixer prevents feedback damage when combining multiple audio sources, and its internal amplifier helps portable music players sound louder, cleaner and better. Features include a power/volume control knob, two stereo inputs, two isolated mono inputs (that do not require special cables for Garmin GPS and

Escort radar detectors), an output jack and 'power on' and 'battery low' indicator LEDs. Rotary volume controller allows you to mute all devices simultaneously, which is handy in urban situations or at toll booths. 5.5"×2.5"×1", 5.5 oz.

#3950 \$159.00

RECHARGEABLE POST AMP

This tiny amp is designed to boost the output of any mobile device by 200%. A rugged little unit with a smooth-action machined aluminum volume control. Go lightly, though. If used at full volume and

output over an extended period of time, you may potentially damage your hearing or headphones. Functions over 20 hours on included rechargeable battery. 17" audio cord. A/C charger and dual output audio jack/splitter included. 1.4"×2"×.6", 1.2 oz.

#3966 \$62.00

TWO JACK POST AMP

Many personal players do not provide quite enough volume to blast over wind noise or past earplugs. The Boostaroo can help. Plug it into the

audio jack of your radio/scanner/whatever, then connect your helmet or earplug speakers. Voila, the sound level is increased by about a third. Input device volume adjustments remain functional, but everything tops at a greater volume. Clearly and cleanly, too. About a 12dB gain in a typical ear speaker. Two AA batteries (not included) last about 20 hours. There are two jacks so a passenger can listen along. 40mw per channel.

#3075 \$27.00

NOISE FILTER

If your teeth are on edge from dealing with an annoying noise in your speakers or headphones, chances are you need this. Greatly minimizes stray electrical noise or whine produced by some motorcycle ignition/electrical systems. Simple installation.

#4930 \$15.00

INLINE EARSPAKER VOLUME CONTROL

All headphones and earspeakers should have volume controls. This compact thumbwheel control box may be used inline or mounted anywhere handy using double stick tape or adhesive

#3687 \$24.00

Universal X-Grip Holder Review by BigLittlelan — "Most mounts for smartphones require you to take the phone out of the case... a real hassle. This little sucker will adapt to any case and hold on tight. The nubs are a firm sticky rubber that grab other rubbery and plastic surfaces very tightly.

"Mounting it horizontally is the safest orientation, since the nubs cradle it from underneath, rather than just 'grasping' it if vertical. Also, the flatter you mount it (i.e. the device's face is parallel to the ground) the better it will hold. Common sense really."

RAIL-HANDLEBAR MOUNT KIT

An evolved system for quickly and securely mounting your smartphone to your bike. The included X-Grip® cradle has a spring-loaded four leg design that sports great holding power without hiding your phone behind foam pads and plastic, expanding and contracting for a custom fit. The mount is designed with a RAM 1 in. ball and socket system adjustment points

at both ends of the double socket arm, allowing for almost infinite viewing angles. A zinc coated u-bolt base attaches securely into handlebars, or any tube up to 1.25" in diameter. Works with devices with or without a case. X-Grip Dimensions: Min. width = 1.875", Max. width = 3.25", Depth = 0.875".

THE FIRST (AND STILL BEST) NOISE-BLOCKING IN-EAR SPEAKERS

Etymotic Research was founded in 1983 to provide products that protect hearing, and enhance the listening experience of musicians and music lovers everywhere. With deep roots in acoustic research, Etymotic invented the first insert earphones in 1984. The original design used balanced armature receivers and immediately established these speakers as the gold standard for high definition in-ear earphones.

In 1991, Etymotic introduced the first noise-isolating high-fidelity in-ear earphone, the ER-4, which became the basis of all subsequent in-ear earphones and in-ear monitors worldwide, and created an entire category of consumer electronics.

The ER-4 earphones are still produced and channel-balanced to within 1 dB in Etymotic's labs in the US. These earspeakers are used by scientists, professional and amateur musicians, and others (including many motorcyclists) who insist on superior sound quality. If you try a pair of Etymotic earspeakers, we are confident you will not be disappointed. Hear the difference quality makes.

ER 4P MICRO PRO EARSPEAKERS

An investment quality earspeaker for musicians, sound engineers, audiophiles and discriminating motorcyclists. Featuring balanced-armature, precision-matched, custom-tuned drivers, these earspeakers offer unsurpassed frequency response accuracy and sound quality...you'll immediately notice a richer texture of nuances, shadings, hues and details. Sounds you've never heard before. Superb noise isolation characteristics reduce unwanted outside sounds by as much as 98% (35 dB to 42 dB) while delivering a world-class auditory experience. Comes with a complete array of adapters and accessories to enhance and personalize the fit and comfort. Includes hard cover storage case, nylon travel pouch, airline adapter, ¼" stereo plug, shirt clip, filter tool with extra filters and an assortment of replacement ear tips. 60" cord with standard 1/8" (3.5mm) headphone jack.

HF5 EARSPEAKERS

No compromise, high-performance noise-isolating earphones that deliver best-in-class benefits at an affordable price. These comfortable wearing earsets reduce external sounds by about 35-42 dB which surpasses even active noise cancellation systems (for comparison, the Koss blocks about 8-12 dB). These fill that silence with an extended high frequency range and an excellent deep bass response. Includes nylon travel pouch, three pairs of replacement ear tips (3-Flange, Foam and Glider styles), adjustable keeper-clip, filter removal tool and replacement filters. 48" cord, 1/8" (3.5mm) headphone jack.

HF5 Review by Steve — "There are no clearance problems in my helmet and they isolate sounds well. A lot of the annoying sounds are blocked out (even at 100MPH), but I can still hear elements of traffic so I still have an awareness of my surroundings. Best of all, I can keep the volume on my iPod/iPhone below the halfway point and still hear my playlists easily. I'm also in airplanes a lot and these are lifesavers when a family with little kids are on board."

KOSS EARPLUG SPEAKERS

Earplug and earbud design helps seal out wind noise and directs speaker sounds right into your ear canal for a deep bass and greater clarity. Foam ear cushions expand slowly for a comfortable custom fit and good noise isolation. The Koss Earplug Speakers are an affordable way to experiment with sound... they are just foam earplugs with quality, built-in speakers, and they're perfect for use in places with high levels of outside noise. Affordable, comfortable, effective. Not for Riding Use because you might get in an accident if you miss any road noises. (What about cars with air conditioning, lots of sound insulation, and big stereo systems? What about those, huh?). 4' cord.

Review by augie — "For the longest time I tried to stretch my work ear plug over my ear phones so I could get noise blocked while at the same time hearing something to ease the boredom. Then wala these came along. Its was like someone read my mind and solved the problem. Ive been using these for more than a decade. They don't come any better, that is the sound, than the over-priced fancy looking ones. Heavier cable and a different jack could improved the durability . The big plus for any earphone is the high tech foam that delivers the lows that make this im my opinion the best earbuds ever. Try a pair and be impressed."

3D BASS HELMET SPEAKERS

These helmet speakers pack a punch. A low, low-down in your bones punch. At only .5"×1.8", will fit any helmet and will improve the sound of whatever you've been listening to. A revolution in helmet audio technology. Comes with integrated hook & loop patches and detachable 25" connector cable with volume control. 3.5mm 1/8" headphone jack.

Review by James — "Bought a pair almost 2 years ago. Used in Nolan 102 and replacement 103, with iPod Clickwheel, now Shuffle. Sensitive enough to stop using amplifier, even with Cardo G4 speakers on top. Liked em so much just replaced the set in my wife's helmet with the same. Could they be louder? Of course but I still like to here whats going on around me. Like the volume control just below the helmet. No problems from my end."

Review by 990 Adventure Rider — "I bought a set of these 2 years ago, since then I have logged over 11,000 miles and these have always been on. I use the Boostaroo amp to help drive them from my MP3 player.

"I find that these work very well, you will not be able to listen to an audio book and hear every word crystal clear, but I can enjoy my favorite albums and have the piece of mind that I can still hear my bike and what's going on around me.

"I have been very happy with them and will buy another set if and when my first set wear out."

Review by Rick Waschek — "I purchased a set of these prior to my annual trip from my home in Minnesota to Peoria, IL for the TT races. They performed exceptionally well once they were properly aligned inside my helmet. They performed equally as well on my other annual trip to Springfield, IL for the Mile races. And you guessed it, they performed equally well on my trip to the Indy GP. In between going to watch other people ride motorcycles better than me I have to go to work. That involves a 120 mile round trip commute each and every day. These speakers work amazingly well for my daily ride also...These speakers deliver fantastic sound quality, have held up to aproximately 8,000 miles of relativey high speed use and are stupid easy to mount...They are fantastic and the purchase price makes them even more so."

EARSPEAKER PROTECTOR CASE

MOTORCYCLE COMPUTER/SPEEDOMETER

With this one you get a longer, sturdier wire to the wheel sensor and a tougher mounting system than a bicycle cyclometer. You also get a pin-point accurate speedometer with features for everyday rides and long trips.

Stores data to let you measure average speed, maximum speed, acceleration, trip distance/time, braking distance and even a quarter-mile Drag Race format, including top speed and time. Even has a clock.

Large, easy to read 1.25"×1.34" LCD screen with push-button backlight function. Included CR 2450 battery lasts up to four years before needing replacement. Simple installation with included bracket and mounting materials and extra long sensor cable. Water tight construction ensures durability. Easy to calibrate to your bike's exact wheel circumference. Measures max speed up to 250MPH.

STRIKEALERT

So you're happily riding out in the great wide open and you notice a storm approaching. It's a beautiful scene... just you, an approaching storm, and a 500 lb lightning rod under your body. FEMA estimates that strikes kill 200 people and seriously injure 750 more per year—including the occasional rider.

This detector will let you know if a storm is approaching or departing, and will alert you of approaching strikes up to 40 miles away. A good thing on a long night ride. We have no clue how it works, but it really does. Small, dependable, accurate and effective. Comes with belt clip, and easy to use bar or fairing mount. Included batteries last up to 100 hours. 2"×2.75", 3 oz.

AEROSTICH HANDLEBAR CLIPS

An accurate, durable, easy-to-read liquid-filled compass that simply clips onto any 7/8" or 1" handlebar. Luminous 1" floating dial on jeweled pivot provides smooth rotation. Clip is easy to remove for accurate readings away from steel motorcycle parts.

Also as durable as the compass is an easy to read, liquid filled -20°F to +160°F thermometer. It too clips onto any 7/8" or 1" handlebar. One inch diameter dial.

The clock clip is specially made for us and features a sweep-second quartz movement that is not really intended for outdoor use but the prototype survived two seasons on Ed's 500 single so we think it's OK. YMMV, however.
