### WHY GREEN?

It's better than white light, because when you turn it off there's no 'light blind' adjustment period. Also very easy to read a book by, compared to red night lighting. Another cool element is night vision goggles don't pick up green so well. So green lighting has a tactical advantage if you happen to be in a war theatre, some evening. Green is also the toughest color to find in camping stores. Here it is.

### WHY THIS LIGHT?

A few years ago the American company making the original (...with handy mini-bungee pony tail hair thing attached) discontinued their 'Foxfire' model, so we had to drop it. Apparently not enough bicyclists were interested in them.

We started looking for replacements immediately but there wasn't any. Searched all over the internet. Nothing.

Then one day I wandered into a baby and toy store, and there they were! Except this time packaged and marketed by an Australian company as an attachment for baby strollers! Hahaha... Nearly identical design, exact same functions. Yyyyyy! Give them a try.

*Review by Garth Furler — "Works well. The Cord is a good length. Don't have to maneuver your bike around at all to adjust for length. Wraps up very compact. Recommend a plastic bag or something of the like to keep it small and the cord rolled up. Power on/off switch is very small, however that could also be looked at as an advantage."*

### GLOCK SPADE

Drill sergeants and grunts alike call the familiar field shovel the "E-tool," short for "entrenching tool." But compared to the Glock spade, the standard shovel is stone age. Glock, the world famous maker of sophisticated weapons, combined lightweight alloys and advanced resins to produce a tool of sheer genius that is so superior you might end up seeking out rough camping areas just to have the pleasure of using it. (...Naah) The 180° foldable, extendable handle contains a sawblade and the shovel blade's angle is adjustable. The saw extension hidden inside the handle cuts wood fast. #1581 \$5.00

"Why carry pooping-in-the-woods trowels? Because we carry all those silly Sporks. They also present and reinforce a perspective about riding and 'exploring the world'. I've carried the folding steel one above for years, and a small roll of TP flattened inside a zip-closed plastic bag. When needed there's no substitute. Boot-heels work only on the softest soil. Having a trowel along frees one to ride and camp just about anywhere, anytime. Which is the point." — Mr. Subjective, 8-2014

### WOODSMAN'S PAL

This rather nasty-appearing device is actually quite useful, well-made, and sports a distinguished pedigree of service with our armed forces (60+ yrs). Featuring a specially annealed high carbon steel blade, the Pal is extremely strong and works great for chopping up kindling for the fire. The chisel-sharp sickle hook works great for sweeping an unimproved campsite free of ground-level sprouts and saplings to make for a more comfortable tent site. Unusual in form, the Pal fits your hand nicely and is so well balanced, it truly feels like an extension of your arm. Black oxide coating prevents rust and corrosion, and a "safety toe" one inch from the end of the axe side of the tool reduces deflective injuries. Cordura belt sheath included. Total length of 17". 1 lb. 14 oz.

#2440 \$97.00

Equipped with a .25" thick x10" long parkerized black carbon steel blade and heavy-duty Cordura and leather sheath, the Ontario SP-8 is a very useful, simple and formidable heavy-duty device. If you cannot make a great pile of firewood with it, you should give up on camping entirely. 1 lb. 3oz.

#3557 \$87.00

Great for splitting or carving a new tent stake. I have cut down 4" trees with little effort. Every camper needs this machete."*

### USMC KA-BAR UTILITY KNIFE

Any big pig sticker of a knife is incredibly versatile. This one is a lot lighter to carry than a hatchet or machete, but still large enough to hack up firewood easily. Ergonomically optimized by generations of field experience, this big boy is the right tool for digging, cutting, food prep and all general camp chores. It's also the same genuine KA-Bar knife US Marines use (as a weapon and tool) all over the world. Black coated blade and slip resistant handle. Blade is 7.75". Total length of 12.75". 9 oz.

#2438 \$87.00

*Review by Jerry — "Wasn't sure what I'd use this for but it looked neat to have in my bag. Never know what a person will run into on the road, it did not take up much room, and not a big ticket item. So why not put it in my 'handy tools bag'. With this, my multi tool, knives, and full tool bag I should be good to go."*

#2068 \$4.00

This opener was invented during WW2 and is considered by some military historians to be one of the allies key technological advances, and a significant contributor to winning the war. Some scholars have argued that it was just as important as the A-bomb, the Norton Bomb sight and a bunch of other crucial (and more complex) allied technologies. The 'official' name for this can opener is 'p-38' because it took 38 turns to cut open the lid of a standard can. Keep one in your cook kit and you'll always be able to open something good.

### K.I.S.S. ASSIST KNIFE

Elemental in design, this knife comes equipped with a Fail Safe assisted opening mechanism for easy one-hand operation. The exclusive Spyderco designed thumb hole in the blade makes it the easiest and surest one-hand opening locking blade knife. ## PORTABLE CHAIRS ARE IMPORTANT

Not as obvious as it might seem. These small chairs are the real key to great camping experiences. Having one along gives you much more than a good spot to park your butt no matter where you are at the end of the day. They really give you a chance to invite yourself to sit around another camper's fire and share a few stories, gain wisdom and make some new friends. So bring your own chair (and maybe a flask?) and sit down and make some wonderful memories.

Some specifics: The Kermit chair is by far the most comfortable, beautiful type here. Over the past two decades it's become a genuine made-in-USA American motorcycle camper classic. If you ride a touring bike and have the space, it's still the bomb, but at five pounds it's a bit heavy and bulky for adventurous dual-sport and sport bike rides. Of the others, I like the Mantis best. It's nearly as comfortable as the Kermit but packs much smaller and only weighs a pound and a half. It also sets up and takes down slightly faster and easier. And for extreme ultra-light and super-compact packing, any of the others make great choices, too. Just bring one.

### THE KERMIT CHAIR

Chances are you've noticed the twisted, broken remains of many a plastic and aluminum discount-store folding chair abandoned or stuffed into garbage cans after rallies and events. Ah, wasteful, race-to-the-bottom consumerism... You will never see The Kermit Chair suffer such an ignominious end, however, because this is the real deal, a hand-crafted piece of artistic sitz-tech that will keep your butt off the ground with unmatched elegance, ruggedness, and utility.

Constructed of beautiful oak and aluminum structural elements, with Cordura fabric, the Kermit weighs only 5 lbs. and packs into a 4"×6"×23" Cordura bag. When you are ready for your last folding chair, the Kermit Chair awaits. Blue, green, burgundy, or black.

## CAMPING STOVE DIFFERENCES

Over the years I've used several different stoves. First was a Svea 123 (#4146). Used probably ten years, and still have, ready to go, inside an old Sigg Tourister cook kit. But to prime a Svea one must pre-heat the burner by spilling a little fuel into it's burner cup and lighting it. When it's just warm enough you crack open the jet for a self-sustaining (and loudish) flame.

It was replaced by a Coleman Peak 1 which was configured similarly but had a priming pump so it was easier to pressurize and light. Unfortunately, this model was discontinued a few years ago. The closest comparable stove available now is the Optimus Multi-Fuel (#4145).

For the last ten years I've been trying to like stoves with the removable tanks and can't quite get there. I've used several models and brands. They are excellent for some applications, but the extra step of connecting the tank to the burner has sometimes been a problem because I fumble and get gasoline on my hands, which is the last thing you want when you are hungry and about to be handling food.

Gas canister stoves are convenient, lightweight and clean, with replacement canisters widely available. We sell two good ones, but I still like being able to siphon fuel from my bike right into a stove when needed. A quick-disconnect to the fuel line makes refilling stoves easier. We also sell these: (#4197 \$129 and #4128, \$99.)

And these luddite fire starting kits are also apparently OK to carry thru TSA checkpoints. It's no small satisfaction to know that one can always make a big fire in a few moments, regardless of where one is with one of these. TSA signage says 'no matches, no Bic lighters, no BS of any kind' with a cute row of about ten 'prohibited:' icons. But flint & steel sets aren't shown. And now you know what's in my carry-on...Mr. Subjective 2013

### FIRESTEEL SCOUT

Channel your inner caveman. Use small spark, make big fire, ugh. Scrape a knife or the included striker down the length of the FireSteel rod to release a massive shower of 5400°F sparks. Timeless back-to-basics fire starting tool works even when the conditions are wet and cold to ignite a stove, paper, dry grass or any dry tinder. Twenty years from now it will still work perfectly, too.

## COOKWARE METALLURGY

Aluminum? Titanium? Stainless Steel? Titanium is the lightest and most costly, but it doesn't cook best because it transfers heat unevenly. If you want to cook anything fancier than boiling water for tea or making ramen noodles, it's not ideal. Stainless Steel is the heaviest, most durable and least expensive. It works fine for most kinds of cooking. Hard anodized non-stick aluminum is the best for providing the kind of even heat dispersion that helps you do a good job in a variety of cooking situations. Its non-stick surface makes it the

quickest type to clean, too. Aluminum pots are lighter than stainless, heavier than titanium and slightly less durable than either. So when do we eat?

### POLY FLASKS

As you stare into a mesmerizing campfire on a damp evening you might want a sip of Scotch. This is the way to carry it. Any distilled spirit you carry here has a higher intoxicant density per ounce (or volume) than beer. Don't worry where the nearest store or tavern is. Travel light (and don't drink and ride).

10 oz. #2015 \$4.00

16 oz. #2014 \$5.00

### ELECTRONIC WATER PURIFIER

This is just plain cool. Push the activation button, stick the wand in a glass of "questionable" water and watch the wand glow. Swirl and wait for the light to turn off while repeating the following words, "Potius sero quam nunquam..." (...these words must be spoken or the unit will not function properly...) Presto! Safe drinking water anywhere on the planet. No tablets, no drops, no iodine or chlorine aftertaste.

Works by ultraviolet light to kill 99.9% of all harmful organisms. If the water is especially murky, we suggest filtering it first—unless you like drinking brown water with unidentifiable floaties. Purifies up to 32 ounces (1 liter) in 90 seconds or less. Provides up to 8,000 treatments. Protective pouch included. 6"×1.5"×1", 3.6 oz. (with two 123A batteries).

#4003 \$97.00

### IODINE WATER PURIFICATION TABLETS

Contains ol' tried and true iodine, but it doesn't taste horrible. Two tablets treat one liter of water in about 30 minutes. 30 tablets.

#4115 \$8.00

### CHLORINE WATER TREATMENT

A 2-part water treatment made of chlorine dioxide (contains no chlorine). Treats up to 30 gallons. Two 1 oz. Bottles.

#4005 \$14.00

### AEROSTICH NAIL CLIPPERS

An uncommon European design (...actually made in Asia) allows this clipper to be folded totally flat. Admittedly, such space-saving rectilinear cleverness is no big deal in a tool this small, but you'll still enjoy the classic precision and feel of this nicer shape. Made super-sharp to accurately clip, too. The incorporated diamond-type file and cuticle tool also work better than those truck-stop cheapies. In a pinch these also double as a wire stripper or 1/8" flat tip screwdriver. Stainless steel. 2"×.5" Includes a leather storage sleeve.

#1515 \$7.00

### BACKCOUNTRY ORGANIZER

A silicone-coated ripstop nylon construction keeps the weight and bulk minimal without sacrificing durability of this handy organizer pouch. Contains a multitude of pockets and zippered compartments inside and out to hold travel docs or small personal, first-aid, or kitchen items. 9"×5.5"×2.5", 4 oz.

#9145 \$30.00

### BRAUN SHAVER

A quick clean shave is no problem with this cordless shaver. It features a unique twist cap that extends the shave heads to full function when open and protects the heads when closed. Includes built-in cleaning brush. Compact design is small enough to fit right in your shirt pocket. Two AA batteries included.

#3887 \$32.00

### DR. BRONNER'S PEPPERMINT SOAP

With a bracing, deep-cleaning peppermint aroma and a claimed variety of uses including shaving, massages, clothes cleaning, and toothbrushing, this is one versatile soapy substance that will do just about all the cleaning required when on the road. (Don't know about that toothbrushing bit though—let us know.) Also features an amazingly wordy and somewhat strange label that could double for reading material if you are trapped in your tent (or the can) during a downpour. Dr.

Bronner's soap is super-mild, environmental, biodegradable, safe to use in rivers and streams, ...and leaves whatever you wash (you, your clothes, etc...) clean and fresh.

4 oz. #2061 \$5.00

8 oz. #2062 \$7.00

### CAFFEINATED SOAP

We tried this stuff and felt refreshed and alert afterwards. The idea behind this soap is that the infused peppermint and caffeine absorb into your skin, leaving you zippy as a squirrel after use. The jury is out on whether the caffeine, peppermint or both do the trick, but whatever it is, it works. All natural & smells nice without the usual poisons, perfumes or chemicals. 4.5 oz. 3.75"×2.25"×0.6".

#4101 \$5.00

### HEADNETS

After swarms of mosquitoes & flying pests play an irritating little game of chicken with you, THEN they bite you! Keep the little devils off your face, neck, and head instead of running around willy-nilly and swatting at the air like a crazy person. Or smearing yourself with smelly, greasy concoctions of poisons. All nets fit easily over a hat—even wide brimmed ones (hats shown are not included).

### MOSQUITO

An effective but less expensive version that does not have no-see-um mesh, but features an elastic band at the bottom to help gather the net close to your collar.

#4098 \$8.00

### BLACK FLY

Does not have a spring ring or no-see-um mesh, but features a cinch cord at the bottom and folds up & fits into an accompanying bag about half the size of your hand.

#4061 \$12.00

### HORSE FLY

A foldable spring-ring keeps the no-see-um mesh off your face, not to mention the nasty little critters and whatnots further away from your skin. A hidden pocket within the headnet wraps it all together in a neat, snapped bundle so there's no extra storage bag to lose. There's also a draw cord at the bottom to seal the net close to your shirt.

#4060 \$18.00

## MICROFIBER TOWEL TECH

Microfiber towels are softer, thinner and more absorbent than conventional towels. They use an ultrafine fiber that's woven like no other textile. Each square inch of a microfiber towel contains about 90,000 microfibers that are a blend of 80% polyester and 20% polyamide. These provide tremendous absorbency. Holding up to 7 times the fabric's weight in moisture...yet they dry quickly.

In addition to having a luxurious texture and fast drying ability, these towels are chemical free, lint free, non-abrasive, and hypoallergenic. Dampened with water they are great for cleaning any washable surface. They'll leave even the smoothest surfaces (eyeglasses, CDs etc. . .) lint and streak free. They pack in a third of the volume of normal towels, which is perfect for any trip.

### AQUIS TRAVEL TOWELS

It's a luxury to have towels this large when traveling. Both styles will completely dry you after a shower (or swim), absorbing more water than cotton towels, yet fold small enough to be carried on extended travels. Hang dry overnight to pack in the morning. Hand or machine wash. No bleach, no fabric softener. Dryer safe. Medium is 19"×39", 3.5 oz. Large is 29"×55", 6 oz.
