"Owning a motorcycle is more than a matter of polishing the fenders, tuning the engine periodically and riding it forever — or at least until the weather turns cold and wet."
—Chiltons Complete Guide to Motorcycles, 1971, Donald W. Koch

Photo: Mike Crane and his 1947 Indian Chief at Aerostich HQ, 2015.

AERO^{STICH} LANE SHARE TOOL

The deal is this: Throughout most of the USA, lane-sharing (aka “filtering”) is illegal, but that’s not so in the rest of the world. This is for civilly-disobedient riders who may occasionally want to show those stuck in backed-up traffic there is a better way.

Installation involves routing the wire between the plate rotation motor and the handlebar mounted control button. Then connecting the fused battery leads midway. Touch the button and the alternate message displays for ten seconds—then the tool automatically folds back to show your plate normally. Or, holding the button down for five seconds displays the alternate message continuously until the button is touched again. An LED next to the button indicates the alternate message is being shown..

A total of ten available message panels, including: “Lane Share Test,” “One Less Car,” “Share The Road,” “Thank You,” a Mr. Happy Puppet “happy face,” (We recommend Mr. Happy...or the Jolly Roger.) Includes a CD with about fifty additional formatted messages ready to print and use and a video installation guide. 12V. Anodized aluminum. Mounting hardware included. But deploy at your own risk. More info online at aerostich.com. 10.75"×4.5" (9" open). 

#3305 \$187.00

AERO^{STICH} BLANK LANE SHARE TOOL PANELS

A set of blank panels for the Lane Share Tool. Paired with the included markers, you can create a customized message to use the LST as a public platform to exercise your freedom of speech with amusing portable versatility. Like your own private soapbox bolted to the back of your bike. Keep it clean, or not—but use at your own risk. 

#3278 \$12.00

AERO^{STICH} LICENSE PLATE HOLDERS

These license plate holders state clearly 40, 50, 60, or 70 MPG followed by the popular phrase “one less car,” or more boldly “THIS IS MY CAR.” A 7.5"×5" durable plastic backing with drilled holes for mounting, the lettering is 0.65" high. Specify 40, 50, 60, or 70 MPG, THIS IS MY CAR, RIDE EVERYWHERE or RIDE EVERYDAY.

40, 50, 60, or 70 MPG or THIS IS MY CAR #3396 \$5.00

Ride Everywhere #3419 \$5.00

Ride Everyday #3420 \$5.00

AERO^{STICH} LICENSE PLATE FRAMES

Basic black, lightweight plastic frames that surround your license plate with Deeper Meaning to puzzle and annoy the world at large.

One Less Car #3357 \$5.00

Ride There #3358 \$5.00

No Car #3361 \$5.00

BIG APPLE PLATEPULLER

Commuting on two-wheels in The City has certain inherent risks, but a bent or stolen license plate doesn’t need to be one of them. A Platepuller lets you easily slide your plate in and out through a discreet side slot. Take your plate with you when off the bike to prevent theft and flummox parking-ticketing authorities. CNC’d from a solid aluminum, the rounded edges also protect your bike’s cover from rips and tears of a sharp plate edge. Includes mounting hardware. Black. 7.5"×4.5"×4".

#3400 \$60.00

SEAT SAVER

AEROSTICH ULTRALIGHT BIKE COVERS

Small enough to take on all your road trips, these pack into a built-in self-storing pocket about the size of your hand. Overall, it's half the size of the next smallest full-coverage cover because it's made from a thinner, lighter fabric. The strong opaque 1.1 oz siliconized ripstop nylon is plenty tough and keeps water and dust off your bike... it's widely used in parachutes, sailboat spinnakers, kites and skysails.

The integrated elastic cinch cord tightly snugs all covers close to your bike so it won't blow off during a breeze, and additional grommets allow for further binding or tying down. The Aerostich label is purposefully placed at the front bottom center, right on the hem, so it's easy to find the front of the cover.

SELF STORING

For improving overnight security at the seediest, darkest motel parking lot, the self-storing pocket on the hem of the cover also doubles as a portable battery powered motion-detecting alarm holder, to scare the pants off of whoever wants to take a peak at what's below.

Large size covers loaded GS1100's, Gold Wings and other dreadnought sized machines. Medium fits all sportbikes, standards, dual sports, and sport touring bikes with smaller windshields. Small fits scooters. Seat Saver model fits all bikes, covering vital areas of instrument pod, handlebars, gas tank and seat. Black, White or Grey. 

**Large #1735 \$167.00
Medium #1733 \$157.00
Small #1738 \$147.00
Seat Saver #1741 \$142.00**

SECURING FOR HIGH WINDS

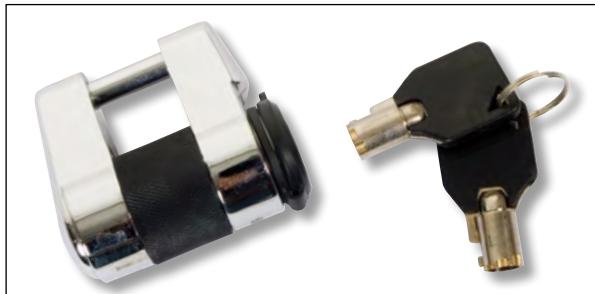

"Aerostich Ultralight Bike Covers have two neat grommets mid-way for a locking cable to be passed through beneath the middle of the motorcycle. But for fast additional security in high-wind situations, and to further-strengthen the cover's 'anti-tampering' deterrent, first pull the elastic hem drawcord tight and lock it in place with its cord-lock. Then stretch the loose end of this cord over the saddle and down the other side of the motorcycle until you can loop over the shift lever or footrest. This will 'capture' some of the cover around the shift lever. After the cord is drawn tight around the bottom of one's motorcycle there is always enough cord left to stretch across the bike and reach the shift lever. Doing this makes the billowy cover fit tight and stops it from flapping around. The technique has kept my Aerostich Ultralight Bike Covers securely attached though some violent overnight storms with very high winds." —Mr. Subjective, 6-13

GORILLA REMOTE ALARM

An ultra compact 120dB loud motion sensing alarm with keyring remote transmitter. The motion sensor and siren are both adjustable. A unique two stage shock sensor provides seven levels of sensitivity and less irritating false alarms. The alarm will also activate if a hot-wire attempt is detected. A "panic" feature allows the remote to activate the alarm from up to 100 feet away. Simple two wire installation. Small size mounts in tail section, under seat, behind side-cover...anywhere. 3"×3.5"×1.75".

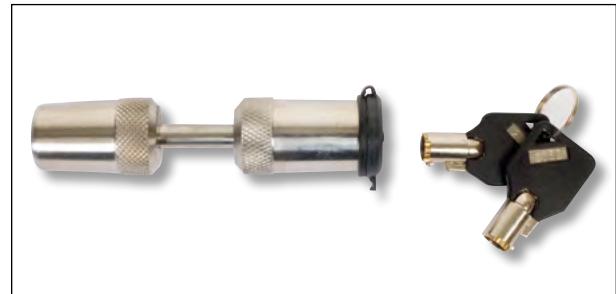

#4557 \$127.00

AEROSTICH LEVER LOCK

Adapted from a trailer hitch lock, it works quite well as a bike disk lock. Compact, light-weight security that is easy to carry and use. Hardened zinc alloy design features 7mm diameter steel shackle. Internal O-ring and weather proof cap seal out water, dirt, grime and corrosion. Protective rubber bumper guards against rattling and abrasion. Locking arm rotates 360° for easy latching. Lifetime warranty. Includes 2 keys. 2"×2"×1", .5 lb

8mm Pin #1180 \$17.00

AEROSTICH DOG BONE LOCK

Made of stainless steel, this sleek disk lock is super-compact and lightweight. Hardened design thwarts attempted cutting, sawing or blasting. Patented dual lock design, no internal springs to seize or break. Rubber cap and O-ring protect keyhole from water, grime and dirt. Lifetime warranty. Includes 2 keys. 4"×1"×.75", .5 lb

7mm Pin #1181 \$27.00

QUANTUM SINGULARITY GARAGE REMOTE

This minuscule opener is ideal for motorcycle use when accessing your personal Bat Cave. Keychain-style for convenience, this unit can also slip into the smallest of pockets or mount inconspicuously on a triple clamp with hook & loop or double stick tape. Easy to program, it is compatible with most major brands of garage door and security gate openers. Not compatible with rolling code openers. Works on pre '97 opening systems. 1.25"×2.5"×.5"

#1420 \$25.00

PROGRAMMABLE MULTI-GARAGE REMOTE

This frequency scanning three button remote can be programmed to operate up to three different devices, as long as they are either **Chamberlain, Sears, Liftmaster, Craftsman, or Raynor** models with an orange "smart" button and yellow indicator light. The "Security +" rolling code feature provides maximum protection and makes code grabbing impossible. Works on '97 and newer opening systems. Measures only 1.5"×0.5"×2.5".

#1436 \$37.00

MINI-MULTI GARAGE REMOTE

Equipped with the latest Series II electronics, this **Genie** remote will operate up to three different Genie Intellicode door openers as well as being compatible with Code Dodger openers by **Overhead Door**. Measures even smaller than the Quantum Singularity Remote. Works on '97 and newer opening systems. 2.5"×1.5"×.5"

#1472 \$35.00

SHACKLE / DISC LOCK

A half inch diameter shackle made of superior steel is what sets this lock apart. A reinforced sleeve-over-crossbar construction adds exceptional strength. Impervious, anti pick/pull/drill, dual steel ball locking M-cylinder mechanism with an integrated dust & water cover. White LED spotlight on main key and 4 spare keys. Includes disc reminder and belt clip carrying pouch. Also includes an anti-theft protection warranty. 4.3"×4"×1.3". 3 lbs.

13mm Pin #1174 \$45.00

STAPLER DISC LOCK

Put one of these on your bike and rest assured it's not riding anywhere without you. High-security Anti-pick/pull/drill, Z-Key cylinder offers optimum deterrent against physical attack. Ultra-hardened 5.5mm steel pin. Total of 5 precision laser cut keys, including one with integrated micro white LED spotlight. Includes coiled disc reminder cable and belt clip carrying pouch. 5.5 mm (2.75"×2.25"×2", 2 lbs.). Lifetime warranty.

5.5mm Pin #1172 \$40.00

ALARM DISC LOCK

A massively intimidating anti-theft alarm encased in a seriously strong lock, complete with double-locking 14 millimeter carbide reinforced locking pin with 60mm throat width and pick-proof, ice-spray proof key-barrel. Auto-arming, shock or motion-sensitive 120dB alarm powered by a single, long-life CR2 lithium battery for high-performance in all weather conditions. Rugged, corrosion resistant high-nickel content 304 stainless steel mono-block construction. If you want to keep your bike safe, this I lock will do the trick. Includes 3 keys. 10"×3"×8". 1.8lbs.

**14mm Pin #1184 \$99.00
Chain Adapter #1183 \$20.00**

DISC LOCK REMINDER

A lightweight, 3mm, easy-to-carry, bright orange coiled cable intended for use as a reminder that your disc lock is on and thusly preventing you from riding away unawares with predictable/dire results. Also handy for locking up clothing and helmets. 5' (extended).

3mm 5' #1176 \$6.00

STOP LOCK REMINDER

This handy item is a reminder that slots into your ignition lock and will help in the task of keeping self-inflicted mechanized Darwinism at bay. The Stop Lock is a bright red plastic device that has an attached ring allowing you to keep it on your lock so you'll always have it when you need it.

#1164 \$4.00

GRIP LOCK

An interesting alternative to disc locks, this device allows you to immobilize your bike by clamping it over your throttle and brake lever or, alternatively, your clutch lever. There are four locking positions for your controls, and the Grip Lock is supplied with three different inserts allowing it to fit 98% of all handgrips. Featuring an anti-drill lock barrel and heat treated steel reinforcing bars molded inside, it's as tough and effective at deterring theft as it is easy to use (and remember). Small enough to fit in a pocket. 6"×1.75"×2".

#1165 \$69.00

Review by Doug — "Very visible on my bike, not only better than a disk lock, it's all a good visible deterrent to people looking for a bike to mess with, or push off of your center stand. Quick to put on, don't need to key to lock it. Small and light, great alternative for securing your bike."

AEROSTICH TRAVELLER CABLE LOCK

Originally made as a spare tire lock for pickups and SUVs, this is a fast deploying and easy to carry cable lock that's ideal for moto-travel. Although the thick 12mm cable and Ace cylinder lock does not provide the ultimate heart-of-darkness bank vault security, this lock is so easy to use it's perfect for everyday lockups.

When traveling it can be quickly stored as a straight length of cable...it lays perfectly alongside your duffel or your bikes frame. Has an o-ring sealed lock mechanism that keeps moisture out of the internals.

3 ft / 12mm #1153 \$20.00

ALL AROUND COMBINATION LOCK

A 12mm flexible steel cable with a secure combination lock. The long cable is covered by a tough vinyl cover that protects against scratching. Includes convenient strap for compact storage. Tough protection that's easy to bring on every ride.

6ft / 12mm #4837 \$22.00

GONZO FLEXWEAVE™ CABLE

It coils, drapes and threads nearly like a wet rope, but is actually tougher than hell. Special 'Made In USA' proprietary cable manufacturing technology has more internal wires for maximum cut-resistant security. The UV protective vinyl coating will stand up to years of sun and abuse. Works great with #1174 Shackle on previous page. 9/16"×5'.

5 ft/14mm #1477 \$37.00

KEY COMBO CABLE LOCK

Strong, thick 15mm premium steel cable combines lightweight convenience, flexible practicality and dual locking security. Lock using the individually programmable four-digit tumblers or keyed cylinder. PVC-coated to prevent scratching. A powerful, portable deterrent against theft or tampering. Included two keys and PIN recovery tool in event of a forgotten code. 1.29 lbs. Length 2'9". Black.

2ft 9in / 15mm #1123 \$39.00

STEEL-O-FLEX ARMORED CABLE LOCK

Highly mobile and robust security with excellent flexibility when it comes to keeping your bike, helmet or gear where you left it. Double security with overlapping hardened steel shells protecting the inner steel of this 22mm thick cable. Long-life protective mesh sleeve prevents scratches or damaging paint. Premium cylinder lock body is extremely tough and resilient to manipulations. Versatile 2'9" length offers variety of mounting options. 3 lbs. Black.

2 ft 9in / 22mm #1125 \$59.00

GEAR LOCK

Equipped with a super-tough vinyl coated 8mm steel cable, the lightweight and easy to pack locking cable is long enough to lock up a lot of stuff in a secure manner. Run through the sleeve and leg of a Roadcrafter and through a helmet, and this lock will allow you to roam unencumbered by gear or (an excess of) worry at rallies or races. Lock has a changeable combination and is non-corrosive. Length: 10'.

10 ft / 8mm #1060 \$19.00

RETRACTABLE CABLE LOCK

Secure your helmet, suit, tank bag or duffel bags in seconds. Works just like a tape measure but uses a spring retractable 36" coated 2.5mm steel cable and resettable three dial combination. Small and light in your shirt pocket but strong enough to discourage bad guys. Locks solid to any length. Lets you relax when seated at some restaurant where you can't keep an eye on your bike.

3 ft / 2.5mm #1011 \$19.00

CITY X-PLUS CHAIN LOCK

When you just want to make sure your bike and gear is still going to be there when you return. Hardened steel 10mm chain and integrated X-Plus cylinder uses automatic keyhole cover to protect against dirt and corrosion. Long 2'9" length allows options for securing, including fixed objects or joining multiple bikes together. Two included keys. One with a handy built-in LED light. Fabric sleeve prevents scratching. 4.6 lbs. Black.

2ft 9in / 10mm #1126 \$169.00

AEROSTICH CABLE HELMET LOCK

This lock is made for police, fire, hospital, and airport security use, but is ideal for locking up your jacket, helmet, and tank or seat bags. Light, fast and easy to use. One end terminates in a no-scratch, vinyl booted, aluminum sleeve that protects a recessed Ace cylinder lock. The other end of the flexible, nylon covered, 7" over 7" stainless steel aircraft cable, releases. The 4mm cable is hard to cut and small enough to thread through tight places. The lock is hard to break.

1.5 ft / 4mm #1156 \$42.00

FLEXWEAVE ANTI-THEFT CABLES

Take your pick from 2 or 6 feet of ultra flexible, light-weight vinyl-coated security. Constructed of 5mm steel cable with looped ends, these cables enable you to use your own padlock or the bikes helmet lock for on-bike security of clothes, helmets, bags, and the like. The high-pressure swaged connectors that secure the loops are covered with heat-shrink tubing, a nice touch. Easy to carry peace of mind.

2 ft/5mm #1046 \$6.00

6 ft/5mm #1036 \$7.00

STEEL-O-CHAIN LOCK

Serious protection and affordable security in a rugged 7mm square, hardened steel chain and locking mechanism. Keyed cylinder attaches easily with ergonomic 90-degree lock body design. It is drill protected and highly tamper resistant. The 3'7" length offers more options for securing to larger fixed objects. Fabric sleeve protects your bikes shiny parts from scratches. At 4.2 lbs, it's not light to carry, but sometimes there's no substitute for maximum security. Includes two keys. Black.

3ft 7in / 7mm #1128 \$54.00

CABLES, CHAINS AND SHACKLES: SECURING MOTORBIKES

BIG HEAVY UGLY CHAINS

If you must leave your bike somewhere bad on a regular basis, pre-station a large, hardened chain around something. Just leave it there. The bigger the better. Huge good quality hardened steel chains take a while to cut thru with a cutoff grinder. That also makes a fair amount of noise and sparks. (Bicyclists who need this level of security rely on hardened 'U' locks. This provides about that level of grinder-resistance.)

BIG FAT UGLY CABLES

Not as good as a big, heavy, ugly chain, but a lot lighter and easier to carry. They cut more quickly with an electric cutoff grinder.

LIGHT & MEDIUM WEIGHT CABLES

Fast to deploy, easy(er) to carry, and enough to keep honest people honest. The pre-coiled bicycle types are a bit harder to thread through stuff compared to a straight cable.

FOLDING BARS

A newish compromise. A bit harder to bolt-cutter snip than a cable of similar weight. And still cuttable with a grinder, but again, plenty of sparks and noise. Easier to carry than either a chain or a cable. More 'threadable' than a U lock. Maybe one of these will help you secure your scooter to a nearby anchor?

LITES

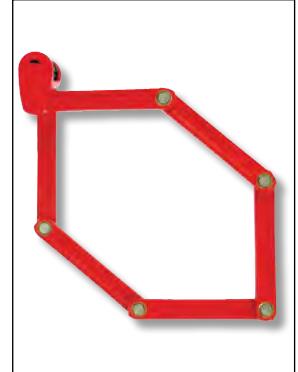

UGRIP

BIG

GRANIT X-PLUS

ABUS FOLDING BAR LOCKS

These revolutionary folding locks offer a good mix of security, portability and ease of use, in a unique linked bar construction. The design provides ample length for securing front or back wheels alone, or to nearby anchor points. Compact folding design for easy storage. Not the cheapest locks out there, but the links are way harder to snip through than cables.

LITES

Light ferrous alloy bars with protective plastic coating. Weighing only 1.4lbs, these 2' 9" folding locks pack up small to stuff into a tank bag, pocket or even attach to a frame tube with the included velcro holder. The keyed version includes two keys, um, in case you misplace one...and the combo version is user settable. 1.4 lbs. Length 2'9".

Key Lock #1120 \$99.00

Combo Lock #1121 \$99.00

UGRIP

Rugged and cost effective protection with 5mm folding steel bar construction joined with specially designed rivets. Link construction allows for compact folding. Premium cylinder offers high protection against being picked. Includes carrying bag and two keys. 1.8 lbs. Length: 2'7". Orange.

uGrip #1130 \$79.00

BIG

Burly 5mm steel bars with an extra soft dual component coating to protect against scratching paintwork. Two additional hardened steel links give a long 2'11" reach, yet still folds up compact for storage. Premium cylinder for high security against picking or tampering. Includes two keys and carrying bag. 3 lbs. Black.

Big #1131 \$149.00

GRANIT X-PLUS

Thicker 5.5mm linked bars made with special hardened steel. Integrated link protection shield and X-Plus cylinder offer excellent protection against sawing, picking or manipulation. Extra soft coating prevents scratching. Compact folding and storage bag for quick storage. Includes two keys – one LED lighted version – and a card for an additional or replacement key. 3.5 lbs. Length 2'9". Red.

X-Plus #1132 \$179.00

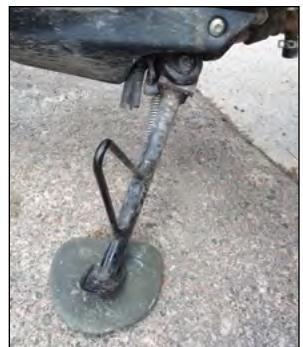

AEROSTICH ROCK-OF-AGES SIDESTAND PLATES

Beautiful sidestand support on soft earth and warm asphalt surfaces. Each of these reliable Duluth Gabbro stones are hand-selected for size, shape, strength and beauty, from remote secret locations long the northern shore of Lake Superior. The stone shown here belongs to well-known motor-writer Dexter Ford (dexterford.com), who kindly suggested the idea. Two versions: Standard and Deluxe (autographed by Mr. Subjective).

Standard Stone Plate #2775 \$20.00

Deluxe Signed, Limited-Edition Stone Plate #2976 \$24.00

AEROSTICH CARBON FIBER SIDESTAND PLATE (CFSP)

Whip it out for high performance on hot asphalt. The CFSP looks and works better than a flattened can, which is never around when you need one anyway. Stiff and light, the Carbon Fiber Sidestand Plate is about the same dimensions as a pack of cigs (but thin), so it will fit into your pocket with room to spare. Included is a natty Aerostich Ultrasuede carrying sleeve that protects you from earthen parking lot dirt. The sleeve may be attached to the inside of your bike's fairing so it's always at the ready. 4"×2.5.

#1424 \$20.00

AEROSTICH CFSP MK II DELUXE

The 62" black nylon utility cord loops over the left grip to eliminate bending to retrieve. When you're ready to go, just reel it in while comfortably saddled. Includes a "Remove Before Flight" ribbon so you'll never accidentally leave it behind. Same black ultrasuede storage bag as the CFSP.

#1425 \$30.00

KICKSTAND KRITTERS

'Hey Rocky, watch me pull a frog outta my hat...Rocky? Rock...AHHHH someone squished my squirrel friend under a motorcycle!' These 'roadkill' critters keep the bike upright with style. A durable 4" disk insert keeps the kickstand from melting into hot asphalt or sinking into soft dirt. Furry fabric is fully washable...or not, if a real roadkill appearance is desired. A functional, furry mascot for the next parking lot, roadside stop or rally. Choose Splattered Squirrel or Flattened Frog. 9"×7"× Flat.

Squirrel #3438 \$19.00

Frog #3439 \$19.00

AEROSTICH TITANIUM SIDESTAND PLATE

Well, if titanium is good enough to build high-performance fighter aircraft out of, it stands to reason it will suffice to keep your bike from falling over. Measuring 2.5"×4", this thing is as thin and hard as Clint Eastwood on a bad day, and will keep your scooter up and off of the soft stuff in high metallurgical style.

#4640 \$24.00

TRIPLE CLAMP SAVING KEY CHAIN

Created by a moto-obsessive perfectionist, this key chain has soft, woven nylon loops and a rubberized centerpiece which eliminates that scratched-and-shot-peen-hammered look surrounding most motorcycle ignition switches. 6.5"×.5"×.25".

#1479 \$5.00

OMNI-CRUISE

When you hit that unavoidable long, monotonous stretch of road and your fingers begin to go numb and your wrist is starting to ache... simply lift up on the Omni-Cruise control thumb lever to transfer the weight of the throttle return off of your wrist. Pulling the brake lever or rotating the throttle forward turns it off. Simple to install, quick to adjust and safe and easy to use on any bike. High quality powdercoated CNC-machined billet aluminum construction, adjustable tension thumb screw and easy to adjust thumb tab. A quality, well-functioning throttle control device, made with pride in the USA.

#1774 \$49.00

NEP CRUISE CONTROL

The simplest flip lever cruise control available. Light-weight snap-together Zytel® Nylon construction. A single screw. Fits/adapts to many bikes. (Even MZs...) Designed for dual cable Honda.

#1896 \$22.00

VISTA CRUISE

Light, simple and very compact. Molded from durable glass filled Zytel® Nylon. Clean, unobtrusive look when installed (looks like it belongs). Fits most older ('70s, '80s, '90s) Honda and Kawasaki dual cable throttles. Specify dual cable or Yamaha. For 7/8" handlebars.

#1895 \$27.00

UNIVERSAL VISTA CRUISE CONTROL

The most popular "universal fit" model. Accurate, no-slop friction ring setup. Fits most Honda, Yamaha, Suzuki, Kawasaki and Moto Guzzi. Specify 7/8" or 1" handlebars.

#1893 \$37.00

GO CRUISE UNIVERSAL THROTTLE CONTROL

A universal one-size-fits-all design crafted from sturdy CNC Aluminum 6061 alloy. Attach to your throttle for simple, effective speed control and wrist fatigue relief. Adjustable gear allows quick one-hand operation and easy tension control. Dual engagement by either pressing down with index finger or rotating by pushing up with thumb. Disengage by rolling forward on the throttle or flipping clamp up. Easy on/off installation, no tools required. Simple, durable and effective throttle control. Choose Black or Chrome.

Black #1785 \$32.00

Chrome #1786 \$37.00

GO CRUISE™ THROTTLE CONTROL

An amazingly clever, simple solution to relieve wrist fatigue on long rides. Installs over any throttle grip in seconds, no tools required. The patented smart-clip tension design locks easily into place against the brake lever to maintain your cruising speed, without the need to hold the throttle. Disengaging is as easy as returning the throttle to a closed position or giving the break lever a squeeze. High-mile rides just got a little more comfortable. Two sizes: Small (for Street and Sport Bikes), Large (for Cruisers). Black.

#1757 \$20.00

Review by mark — "Wow, I like this better than any others I've used, including the "factory" jobs. IF I'd thought of it, I'd be sitting in the Bahamas right now."

CRAMPBUSTER

The simpler, easier-to-use twist grip cruise control. It's a single piece of shaped acrylic plastic that springs open and slips right onto any throttle grip. You can rotate it forward 360°—yet when a downward pressure is applied it

stays perfectly in place without squeezing. This is the original cruise control. Its still-unique design makes it the easiest one to use.

Standard #1474 \$10.00

Wide #1482 \$10.00

MANUAL THROTTLE FRICTION LOCKS

Also known as 'cruise controls'. We sell simpler ones which actuate 'on-off' ergonomically and easily, and which separate on-off function from adjusting applied frictional resistance. For less wrist fatigue you want to be able to micro-adjust the precise amount frictional resistance so only barely enough is applied to hold engine speed steady, and nothing more.

Easiest types to install simply clamp over the twist grip and rest against the top of the front brake lever. These must be continually reset each time you open the throttle a little farther, which is fine for most situations, but better solutions are the permanently installed types.

There are three general styles of this type: 'Bar-end' locks, 'Thumb-lever' locks and 'Throttle-housing' (screw-in) locks. And there are two versions of each style: Types which separate on-off function from frictional force applied, and those which don't.

INSTALLING AND ADAPTING

Bar-end types are bolt-on replacements for bar-end-weights. A few separate adjusting frictional resistance from on-off function. Those that don't are less ergonomically convenient because they require multiple rotational motions with the heel of your hand to incrementally screw them on or off.

Bar end throttle lock which requires rotating hand and heel of palm several times to add frictional resistance. Simple bolt-on installation, though not the easiest to 'off-on' actuate.

Bar end lock with oversize knurled end to help make adjusting on-and-off easier.

Bar end lock with separate frictional adjuster (knurled wheel behind knob) and separate on-off flip lever.

NEP brand thumb flip friction lever owner-adapted to Ducati Multistrada. Owner modifications include: 1.) stationary end held with zip tie, 2.) friction adjustment screw replaced with custom made oversize aluminum knob, 3.) inner friction surface circumference filed/sanded/enlarged to exactly match throttle housing diameter.

Vista Cruise Control, owner adapted to Honda XR650L. Owner modifications include: 1.) Stationary side of clamp held to throttle housing with small set screw via owner-tapped threaded hole. 2.) Friction screw pressure adjuster modified to be adjustable without tools.

Universal Vista Cruise type owner-adapted to BMW R1200R. Owner modifications include: 1.) Throttle housing cover modified to provide stationary attachment point via custom steel plate, flush set-screws and JB Weld epoxy. 2.) Friction adjustment screw modified to be adjustable without tools. 3.) Twist grip inner flange modified/partially removed to allow inner friction ring to be installed.

Flip-a-lever cruise control for BMW Airheads, showing both BMW optional screw and Flip-a-lever replacement. Optional BMW screw doesn't separate on-off from adjustment of applied frictional resistance. Similar screws available for many Harley Davidson models.

Owner modified low profile Flip-a-lever on BMW R80 model, showing shortened flip lever, shortened inner nylon friction material and shortened screw section.

Screw-in types sometimes require tapping a threaded hole in a throttle housing in exactly the right place, but many older BMWs and Harley Davidsons already have this and all one needs to do is remove a plug and screw in the correct part.

Flip-lever types sometimes bolt-on simply, but many application require a little improvising and adapting. Thumb lever-actuation is ergonomically easiest for most riders to manipulate. Filing and drilling their plastic parts where needed is usually simple, and is done either to hold one side of the clamp stationary, or to radius the inner frictional surface to exactly match the diameter of the throttle housing.

CAUTION AND WARNING

For safety, throttles must self-return to idle. Throttle locks defeat this important feature. Although we have never learned of anyone who's experienced safety-related problems with these locks, it's still possible. If you are not confident about working with and adjusting these kinds of mechanical devices, find someone competent to help you. After the lock has been installed, and before your first ride, be absolutely certain that whenever the lock is disengaged or 'off', your bike's throttle returns to idle the instant you take your hand off the twist grip.

HID HEADLIGHT BULB KITS

Super bright and high-quality headlight update kits that provide both whiter and bluer illumination compared to conventional lighting, giving your motorcycle the cutting edge in aesthetics and safety. Throws a 6000 Kelvin beam. Replaces standard headlight on most bikes, choose either H4 or H7 style bulb to fit your motorcycle. Includes 35 watt digital slim ballast which is in a small (3.3"x 2.4" x .6"), sealed aluminum box that can be mounted anywhere and is completely waterproof. Light output is 3 times amount of halogen bulb and 10 times the output of a standard bulb. Specify H4 or H7 Kit. 3200 lumens.

#4449 \$89.00

HALOGEN EXTREME WHITE HEADLIGHT BULBS

Super bright replacement halogen headlight bulbs. Xtreme White Plus technology produces a whiter light color of 4,000K and provides the equivalent of 110 watts of illumination from only 55 watts. These are brilliant replacements that will light up road hazards and street signs long before a normal halogen bulb.

**H4 (55w/60w) #4690 \$39.00
H7 (55w) #4691 \$39.00**

LED HEADLIGHT BULB REPLACEMENT

Prepare to see, and be seen, with unparalleled headlight bulb brightness upgrade, via this reliable 3800 Lumen LED H4 replacement. The update installs easily, is vibration proof, water resistant and lasts ten times longer than a standard bulb, with a 30,000 hour lifespan.

Draws only 20 watts (low) and 40 watts (high) to consume less power compared to the 55-60 watts needed by a typical (1100-1500 lumen) incandescent bulb. Throws a warmer 5500 Kelvin light beam and provides a superior high/low beam contrast too. Replaces any standard H4 headlight.

H4 Headlight Bulb #2990 \$65.00

EAR CANNON AIR HORN

This is a full-power railroad locomotive/ocean liner type compressed air horn squeezed into a bike-mountable package. Totally overkill, until you need to wake up some lethal driver. It's got both the high and low ear-splitting tones of the individually sold Fiamm Freeway Blaster Horns, plus a little more oomph. The 139dB high and low tone blasters combine via air induction to cut through the din and make the most distracted of drivers drop their cell phones and pay attention. Installs easily on all bikes with a 4.5"x3"x4.5" space for mounting. The loudest motorcycle horn available. If Ethel Merman, Sam Kinison and John Philip Sousa ever had a band, and played through a wall-of-sound amp rack, it would sound like this. 12V. 18A. 1 lb 4 oz.

Black #3837 \$40.00

Chrome #4749 \$55.00

Wiring Kit #3839 \$12.00

FREEWAY BLASTER HORN

They're not kidding about the "Blaster" part. This horn generates a shattering 132 decibels and will likely get just about anybody's attention, even if they happen to be ensconced in a giant SUV with a phone glued to their ear. And that, of course, is a good thing...we all know that stock motorcycle horns are at times rather underwhelming. Fix all that and let 'em know you're there with this important safety device. Available in High and Low tone versions. If you are using only one, go with the low tone. 12V. 10A. 3.5"x3.5"x2.5".

Low Tone #3830 \$18.00

High Tone #3831 \$18.00

FLASHING HALOGEN TAILLIGHT BULB

It's a bright taillight...until you hit the brakes. Then, it flashes four times fast—pauses—three flashes a little slower—pauses—two more real slow, and it's on full time as a stop light. The entire flash/pause sequence takes 4 seconds and repeats each time you re-apply the brakes. This complex pattern is commonly and intuitively recognized as a deceleration warning. The bulb's reliable digital electronics are all contained inside the bulb's base. It uses a widely available, easily replaceable "G-4" halogen bulb. (An easy to carry extra is also included.) Fits standard 1157 dual filament brake/taillight bulb sockets. Legal disclaimer: May not be approved for use in all states.

1157 (Blue-White) #2544 \$69.00

MINI LICENSE PLATE LIGHT

Black anodized aluminum body with super bright white LED that will mount through any 6mm or 1/4" hole. Can be used as a plate mounting bolt. Comes complete with stainless steel mounting hardware.

#4780 \$35.00

PLUG-N-PLAY WIRING HARNESS

Pre-assembled wiring harness makes Ear Cannon installation a breeze. Mount the horn to the bike, plug in the wires from the harness, route the wiring to the battery and connect to the terminals. Simple, quick installation. Includes 30 Amp relay and fuse, insulated terminals, 18" total of wire and complete instructions...not that you'll need them.

#4767 \$24.00

12V 40A SEALED RELAY

12V, 40A Bosch-type relay for use with high amp draw electronic accessories like big driving lights, extra loud horns, double sided arm jesters, etc. Waterproof sealed plastic housing with metal mounting tab. Includes installation and wiring instructions. 2.125" x 1" x 1.25".

#4667 \$4.00

LED REPLACEMENT SIGNAL BULBS

Bright, warm 700 lumen output in a plug-and-play replacement signal bulb set. High quality for superior output and performance, brighter than stock signal lights. Heat sink equipped to dissipate excess warmth generated in use. CAN-bus compatible. Sold in pairs. 10W. 1156 equivalent. Available in White or Yellow.

#4896 \$59.00

LED TURN/BRAKE/RUNNING LIGHT

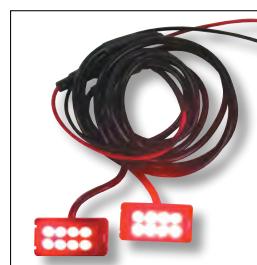

Simply a row of super bright red LEDs made to be attached directly to the top or bottom of your license plate using the same mounting holes. Connect to your brake light wires and you're ready to wake up anyone following a little too close behind you, day or night. No rear end worries. In addition to the brake light feature of the Stopper, the Versa Light version looks the same but also functions as a running light and turn signal indicator. Clearly indicate your intentions. 7" x .75".

Stopper #4635 \$28.00

Versa Light #4656 \$42.00

ELECTROPODS

Two pods of eight super bright red LEDs that are wired into your bike's brake light circuit. When the brakes are applied they light up and flash for added safety. For all 12v systems, and easy to install. Includes complete instructions and cable ties.

#4636 \$32.00

HEADLIGHT SHIELD

It can be unbelievably expensive to replace a cracked or rock chipped headlight lens. Some lenses are over two hundred dollars. Apply this cut-to-fit, double polished, ultra-clear, flexible film and you'll be ready for common detours, gravelly back roads and the big Cassiar-to-Alcan-to-Anchorage (and back) ride. The headlight shield goes directly on the headlight lens so there is no place to trap moisture, dirt, and bugs. It is also UV resistant, won't affect light pattern or output, and is all but unnoticeable. Uses a unique, durable, peel and apply, later-removable, 3M adhesive. Face oncoming traffic on gravel surfaces without fear. Also great as a custom see thru tank pad.

Medium (12" x 12", 14mil) #4910 \$24.00

Large (12" x 24", 14mil) #4912 \$40.00

AERO STICH E-FILL SIPHON

A self-priming fuel transfer system. No matter where you are, this ultra compact system won't leave you stranded for long. Throw away that length of gnarly old hose and safely siphon fuel from any gas-powered device without getting a mouthful of gas.

This is one siphon that doesn't suck. Simply insert the self-priming end into any non-empty gas tank, and put the other end into the transferring container/carrying case (that works a heck of a lot better than a crinkled Mountain Dew can). A few up and down motions and you'll be siphonin' away. The handy stopper clip maintains siphoning even when in the "off" position,

so there's no need to begin the process all over again between container transfers to your tank. The included super soak towel quickly cleans up any excess spills and everything fits neatly back into the transfer container/carrying case. Carrying case is 10.1"×2.6"×1.25" and holds 1/8 gallon of gas. Siphon is 68" long.

Entire system weighs less than 4 oz.

#4986 \$27.00

ALUMINUM GAS PUMP NOZZLE KEY

If you've ever encountered the charmingly termed "evaporative recovery nozzles" at gas stations, you know what a semi-spastic wrestling match with one of these flammable-spewing horses appendages can be like. All you're trying to do is refuel your motorcycle, right? However, for those of us so afflicted, this nozzle key artfully retracts the corrugated... forepart of said alloy proboscis

and allows you to gas your bike with a minimum of fuss and splatter.

#2818 \$8.00

GASCARD

Beat the Evaporative Fuel Nozzles and top off your tank with relative ease with this lightweight, 1/8" thick, credit card sized tool. Durable ABS plastic prevents damage to the paint finish on your fuel tank. Unique teardrop shaped cut-out allows sliding over gas nozzle to depress and hold back the EFN boot while adding fuel to your tank. Won't slip off either. Works for filling gas cans too. Even if you don't live in a state with these booted nozzles, sooner or later you'll need one of these. Fits easily in your wallet, jacket pocket or tank bag. Prevents fuel filling frustration. 3.3"×2.2".

#2937 \$5.00

BEADRIDER SADDLE PAD

Wooden beads provide the movement and airflow riders need to stay comfortable in the saddle, mile after mile. Prevents "monkey butt" on extended rides. Proven by one million long-suffering taxi drivers over billions of miles. Available in four sizes and any color you want...as long as it's black. Replace the tied on straps with the optional ROK Quick Release Straps for fast, easy on/off.

10"×12" #1829 \$32.00

12"×12" #1816 \$34.00

13"×13" #1819 \$36.00

14"×14" #1824 \$38.00

Quick Release Straps #1764 \$24.00

ANTI MONKEY BUTT POWDER

This will save your ass on long, hard rides. It's purpose-built for your butt, but also works great in underwear and everywhere that is sensitive to chafing, burning, reddening rashes. More than a re-packed drugstore talc or a baby powder, this proprietary formula eliminates getting painfully chafed, raw and rashy during sweaty butt-busting activities. It also provides an immediate 'aaaahhh-oooohhh' skin relief on (or after) tough rides. Good for motorcyclists, truck drivers, off road and road drivers, bicyclists, etc., whenever your butt takes a pounding all day. Choose 6 oz. Bottle or convenient 1.5 oz. Travel Size.

6 oz bottle #1881 \$6.00

1.5oz travel size #2168 \$3.00

AEROSTICH SHEEPSKIN SADDLE PADS

Sheepskin cushions, cools and lets air circulate. When it's sticky hot, you'll sit cooler. And when it's freezing, sheepskin is warm and comfy. Between extremes it's always luxurious. Sheepskin has long been used by those who sit for extended periods because of how it cushions and vents.

These are luxurious top grade sheepskins, laminated with an Aerostich-exclusive, non-skid 3/16" PVC foam mesh base, so they won't creep around on your saddle, even if you ride aggressively. They also won't hold or absorb much water. Saddle sheepskin pads help you stay more comfortable, refreshed and alert on long rides. Each pad features eight strategic bungee attachment points, two lengths of adjustable bungee, and four no-scratch nylon hooks for a custom installation. 

(A) Rectangle (11"×14.5") #1890 \$77.00

(B) Small Rectangle (9"×11") #1887 \$67.00

(C) Tapered (13"×18") #1892 \$77.00

(D) Small Tapered (14"×14") #1883 \$77.00

AIRHAWK™ SADDLE CUSHIONS

Iron Butt? Air Butt. Really. The individual cells conform to your shape and eliminate pressure spots that cause discomfort. The outer cover is nylon and lycra, with a nonskid polyester and vinyl base. Designed to stay in place and not creep around during 'active' riding or on day-long rides, it simply lifts off when not needed. As far as seat cushions for long-distance endurance riding goes, this is state of the art. Stay in the saddle longer with more comfort.

Original AIRHAWK™ cushions (A-D) use a thick, stretchy neoprene rubber inner bladder for maximum comfort and a much more substantial and luxurious feel, especially noticed at the end of a long day in the saddle.

AIRHAWK 2™ cushions (E, F) use a lighter, thinner polyurethane air bladder that does not stretch as much as neoprene. Designed for riders who need some help on occasional long rides, they offer excellent comfort compared to other gel/foam/synthetic options, at a lower cost than the original. 

A Large Rectangle (11"×14") #1830 \$167.00

B Small Rectangle (9"×11") #1831 \$157.00

C Tapered (12"×18") #1832 \$167.00

D Small Tapered (14"×14") #1833 \$167.00 E Small Rectangle

(9"×11") #1787 \$87.00

F Tapered (12"×18") #1788 \$97.00

AEROSTICH TOW-N-TIE

If you venture into terrain and trails off the road, you know the importance of carrying a towstrap to get back to civilization in the event of mechanical difficulties. What sets this apart is that it doubles as two 1400 lb. rated tie downs which can come in handy in case that guy (or gal) in the pickup you flag down is amenable to hauling your busted bike somewhere. Rolled up tight in their nylon bag, they measure just 8"×1.25", small enough to stow anywhere. Includes two 6'×1" adjustable cam nylon web straps with looped ends and 8" strap loop on cam buckle. Rollercam version uses Rollercam power strap technology for 10x greater tie-down force.

#2627 \$27.00

Rollercam Version #4877 \$32.00

HOW TO TOW A BIKE, MORE-OR-LESS SAFELY

1. Attach fixed end of strap to strong place on rear of towing bike where it won't become tangled in the rear wheel or break off a turn signal.
2. Run the free end under the lower triple clamp and between the forks of the broken-down bike, then upward to the left hand-grip.
3. Wrap the free end around the left grip once and cover tightly with your hand.
4. Have the towing bike carefully move forward to take up any slack. Then begin towing.
5. All acceleration for both bikes provided by towing bike. All braking for both bikes provided by the being-towed bike.
6. If anything goes wrong, loosen hand on left grip and free end of strap will self-disconnect from towed bike.

1" CAM STRAPS

These straps are rated to 900 lbs. Cam cinches strap and locks things down tighter than a bungee or simple ol' rope.

9' #9036 \$7.00

15' #9037 \$8.00

BUDDY TOW MOTORCYCLE TOW STRAP

Twelve feet of 1" nylon web (1700 lb. test) with loop end, carrying pouch, and use instructions.

#2500 \$17.00

"Luckily I haven't had a chance to use this yet, but for the price and size, it's something that everyone should carry. If you are the type that ventures of the beaten path, you definitely need one. You'd be surprised how long it takes to walk what you just rode in a few minutes. You can of course use a rope, but chances are it won't be rated as high as this strap and it will most likely not be as small and compact." —Review by bsjm

"We were deep in the woods - in snow - when our buddy on his DL-650 V-Strom lost his clutch plowing through the snow.

"Since there were hills to get over to get out he'd have to have left the bike about 20 miles in the forest & it was going to snow again that night!!!

"I've been carrying my Buddy tow around for 10+ years & this was the 1st time it was needed & it saved the day! Now everyone carries one. Nice thing is they're small & light & don't take up much room and can fit anywhere." — Review by David

ROLLERCAM POWER STRAPS

Patented roller technology eliminates most of the frictional losses of traditional cam straps, resulting in 10x the holding force in a strap that is far easier to use. An integrated hook and loop containment strap ensures neat storage when not in use, eliminating the coiled viper pit of tangle associated with other straps. Technically superior and simple to use, these straps are by far the best 1" webbing. Blue.

6' Strap #4850 \$8.00

9' Strap #4851 \$9.00

12' Strap #4852 \$10.00

BUN WARMER KIT

Make riding on the most chilly days more enjoyable by heating yourself from the core outward. It makes a huge difference that you'll feel all over your body. The Bun Warmer uses the same basic technology as automobile seat warmers, and it's specifically designed for motorcycles to provide the same "Ahhhhh..." factor on cold rides. Draws only 1.5 Amps, installs easily and securely (and usually unnoticed...) under your bike's seat cover. Comes with an on/off switch, and an internal thermostat ensures that you or your saddle won't overheat.

8.75" x 8.75". 1.5 amps/**20 watts**.

#1765 \$97.00

HEATED GRIP KIT

A flexible, adhesive, wrap-around heating element with printed-circuit-type elements that fit between the handlebar and grip, keeping your digits from turning into frozen turkey feet of limited utility during cold weather

rides. We all remember what that phenomenon feels like, right? Comes with two elements, wiring, resistor, and an on/off, hi/lo switch. Super, almost unbelievably effective, and a great comfort as well as a safety enhancer. For 12V systems. 3 amps/**40 watts**.

#1400 \$37.00

UNIVERSAL HEATED GRIPS

This highly efficient, functional heated grip design uses a push button five-level temperature controller to quickly deliver just the right amount of heat to keep your hands warmer through a wider range of conditions. These specially selected, weather-resistant open-ended construction rubber grips heat faster than traditional heated grips and provide a comfortable, secure grip year round. Fit 7/8" handlebars. 12V DC. 4amps/**48watts**.

#1602 \$57.00

AEROSTICH WARM WRAP GRIPS

These thin, electrically heated grip pads are made of heat and moisture resistant material and securely wrap over your grips with hook & loop. Enjoy riding with warm hands on even the coldest days, without having to install replacement electric grips. Current draw is only 1.6 amps and they pack away easily when not needed. Heated grip pads let you wear lighter gloves for greater control feel on cold days. You can leave them on all winter if you want to. Standard (up to 36" wide handlebars), Long (up to 44" wide handlebars). 1.6 amps, **22 watts**.

**Standard #103 \$47.00
Long #1433 \$47.00**

ARCTIC GRIP HEATERS

A quick flip of the three position (Hi/Lo/Off) switch creates warm grips, for a longer more comfortable ride, no matter how low the thermostat dips. The flexible mylar backed heating elements attach discretely under the grips on any style bike.

Right and left heaters are calibrated differently for maximum heat control, so no throttle-side resistor is needed to equalize temperature. Includes everything needed for installation: grip heating elements, two stage metal toggle switch, hardware, tie wraps and instructions. For 12V systems. 3 amps/**40 watts**.

#1600 \$57.00

LUXURY-SPORT HEATED GRIPS

State-of-the-art adaptive thermal regulation technology combines sensors in each grip combined with intelligent micro electronics in each external controller to allow the rider to select between six temperature settings with the push of a button. Blue LED indicator shows both the selected temperature setting and heating status, automatically varying generated heat output to maintain temperature, with individually adjustable settings for each grip.

Specially formulated grip material provides tacky yet durable surface. Comfortable in all temperatures and riding conditions for exceptional feel, reduced fatigue and improved comfort and control. Automatically turn off if battery voltage drops below 12.5V. 3.5amps/**45 watts**.

#1682 \$139.00
