TL^{EC} FLEECE 101

TL^{EC} 100: WIND BLOCKER (Blue, Green): A warm, soft, and comfortable all-purpose two-sided fleece that features a thinner micro velour outer face with a moisture wicking mesh back side. It is slightly thinner than the others, but it blocks most of the wind, and offers 2X faster moisture wicking than other windproof fleeces. Its hidden stretchy membrane offers notable breathability for all day comfort. The thinnest, most packable of these three, it also wins a silver medal for warmth.

TL^{EC} 200: WIND PRO (Grey): A new, denser, "super fleece" that is extremely breathable yet provides 4x better insulation and draft resistance than traditional fleece, with increased durability. This medium thickness two-sided grey heather fleece features a soft, smooth

midweight low velour face outside, and an even softer, fuzzier velour back side. It provides the thickest, bulkiest insulation and is the most breathable of the three.

TL^{EC} 300: SOFT SHELL (Titanium): This beefy fleece blocks 98% of the wind, and offers faster moisture wicking and improved breathability. Outside is a tight, smooth, mat-finished face and there's a warm, cozy high loft fleece inside. The Soft Shell is excellent for off-bike wear because of its luxurious lofty inside, and wears amazing as a mid-layer because your riding gear slides so easily against the smooth outer surface as you move. It's in the middle as far as packing small goes. Our warmest/most advanced fleece.

AEROSTICH FLEECE SWEATERS

This comfortable sweater is the perfect layer for traveling, especially on chilly mornings or through sudden temperature changes. The offset front zipper reduces multi-layer "zipper stacking." A deep placket provides adjustable comfort, and details like the windproof stand-up collar and lycra bound cuffs and hem are reasons it will never see the back of your closet. The lightweight TL^{EC} fleece has a reputation for superior coziness. It packs to nothing, is great over an Electric Vest, and provides maximum layering versatility. Self-stores in its own pocket. S-XXL.

"I searched quite some time to find a replacement for my old 1/4 zipper fleece sweater which was just worn out. This piece is so soft and warm I am amazed. It fits perfect under my heavy leather jacket and stops the wind completely. 30 degree temps don't phase it a bit, I stay toasty warm. If you're thinking about purchasing this sweater, hesitate no longer. Buy it, you won't be disappointed." —Wind Pro Review by Danno

AEROSTICH FLEECE JACKETS

More than common and generic 'outdoor' fleece jackets, these are both tailored and engineered for riding. Each Aerostich fleece jacket is made right alongside the Roadcrafters and Dariens, and is designed to work perfectly within all of your riding gear. It's a warm, draft-blocking, comfortable, lightweight layer of insulation perfect for three and four season rides. They wear wonderfully off-the-bike, too.

The details make a difference you can feel. We start with genuine Polarfleece (The original...there are many inferior copies) and YKK zippers. Each collar is tapered for more comfort with a helmet strap and the sleeve diameter is trimmed down for less bulk under riding gear. Sleeves are more forward rotated, too. And the long underarm ventilation zippers match Roadcrafter suits. Durable Lycra/nylon bindings at the hem and sleeves are comfortable and stop drafts without absorbing water.

The torso is also a bit shorter in front and longer in back for a better fit, and the sleeves are usefully a bit longer than you'll find in typical fleece jackets. Zippered inside and outside chest pockets secure valuables like wallets, and zippered side pockets are placed slightly forward for easier access. A quick-draw inner chest pocket is ideal for sunglasses or a bandanna.

A high-warmth, low-bulk jacket that will become your favorite the first time you put it on. Machine wash. S-XXL.

AEROSTICH FLEECE PANTS

On extended trips you can count on experiencing higher elevations, all-day cold snaps, or some chilly early starts. These TLTEC pants are made to a functional, comfortable pattern and pack light and small. For ventilation and convenience, #5 YKK two-way zippers run down the inside, just like the Roadcrafter pant design, so they go on easily, even over boots. Step through the right leg, attach the top left full length zipper and slide both zipper down. Putting them on is faster and easier than changing into long underwear. Many riders wear them over their jeans and under a riding suit. They provide a remarkable amount of extra warmth. Machine wash. S (28-30), M (32-34), L (36-38), XL (40-42), XXL (44-46).

"I was weary of spending the money on these pants, but I gotta say I'm impressed. I substitute these pants for my normal pant liner over my jeans and my legs have never been so warm in cold weather. Very nice pants and so much easier to on/off than long underwear." —Review by Taetor

AEROSTICH WINDSTOPPER® JERSEYS

A lightweight, thin and versatile garment that's a perfect layering component in mixed weather, especially as a pullover shirt for cool mornings or evenings. Folds/packs compactly into a self-storing pocket so you'll have it along when the weather changes and as you need added protection. Made of GORE-TEX® WINDSTOPPER® fabric that stops, as you would imagine, all wind from drawing your body heat away. Elbows incorporate light padding and a zippered pocket on the left arm is perfect for a phone or iPod. A handy and practical clothing item alone or worn over fleece or electrics and beneath your outer gear. Looser cut facilitates easy on/off. Green, Blue or Tan. M-XXL.

AEROSTICH LIGHT WEIGHT WINDPROOF WATERPROOF INNERSHELL

Keep the wind where it belongs. This innershell is a highly breathable mid-layer that adds significant warmth and comfort in a tiny package.

Pull-over design slides on easily over your base layer or street clothes. The diagonal zipper allows you to easily reach a shirt pocket without removal, and closes around your neck for draft free comfort.

Made of 40d 3-layer breathable, waterproof ripstop nylon fabric that's strong, yet light as a feather. Fully seam-sealed so it's waterproof, too. Great as an everyday off-bike layer with a single outer zippered pocket low on the right side that's perfect for storing keys, phone, wallet or other quick access items and also doubles as an integrated self-store pouch, allowing the shell to pack down a compact 9"×6"×2.5 bundle that stows anywhere. 8 oz. Black or Yellow. M-XXL.

"Easy to don & doff. I really like the fact that it's a MUSA (Made in USA) product. I am 6'2", 190 pounds, and wear a size 44 Tall men's suit. I ordered the Extra Large so it would fit over warm layers, such as sweaters or a fleece top. The fit is perfect. The stitching is top-notch, and all seams are taped on the inside to help keep water out. The green color is one I haven't seen before, very distinctive. Even if you don't like green this would fit into your color scheme. When it's on and zipped up, it has a vague Star Trek quality to it, which adds to its character. There is one zippered pocket down low on the right side front. It's a good addition to one's wardrobe to have a garment with a minimalist feel to it - not too many flaps, pockets, zippers and stuff." —Review by David

MICROFIBER PACKABLE SHIRTS

The best travel shirt available. Supplex nylon has a unique moisture-management treatment to help disperse perspiration. It looks and feels like cotton, but dries much faster. A loose cut and strategically placed mesh panels allow plenty of airflow. This shirt has a UPF (UV Protection Factor) of 30. Its extra high, flip-up collar protects your neck and the rubber buttons won't scratch anything. One chest pocket and one "Napoleon" pocket. Imported. Light Tan or Blue. M-XL.

MICROFIBER CONVERTIBLE PANTS

Not only are these pants more versatile and lighter than your jeans...they'll wear more comfortably, too. One secret is the two layer Supplex® twill which is soft-but-strong and has been specially treated to move moisture away from your skin. Both the seat and knees are reinforced for long wear. The waist features a unique conical curve for a perfect fit over your hips. A soft microfiber chamois lines the waistband. A gusseted crotch provides freedom of movement and ankle zips allow you to slip them on and off over your boots. Two front cargo pockets and two rear hook & loop pockets. Great UPF protection. These are the best and most comfortable zip-off leg travel pants made. Imported. Tan or Grey. M (31-33), L (34-37), XL (38-41).

AEROSTICH PROTEKT JEANS

Clean, simple, old school straight leg blue jeans...with a great trick: **TF³** Impact armor-holding pockets at the knees, accessed via a hidden zipper. Armor is removed or replaced in seconds, easily, while wearing the pants. All the rest is classic denim jean spec., with fit and cut similar to Levi's 501s.

Specifically, these are carefully sewn of unwashed dark blue or black 100% cotton 14 oz denim fabric, which is a bit heavier-duty than the more common 10-12 oz denim, but it still shrinks-to-a-custom-fit after a wash or two, which makes these pants extra comfortable and wear a lot longer.

For protektion there are three generous hidden areas of abrasion resistant Breathable-Waterproof HT 500D Nylon (...as used in many AEROSTICH suits) located at the seat and knees. For 'commando' comfort this extra-abrasion-resistant fabric is backed by soft 100% cotton.

As you'd expect there are five traditional pockets, five belt loops and a reliable metal fly zipper, too. But as you wouldn't expect, the hidden seat-protective breathable-waterproof abrasion layer means you can sit on a freshly rain-wetted saddle and not get a wet butt. Nice!

The optional knee armor is positioned in the correct location when riding, and when you're off the bike it's comfortably flexible and easily removable.

Stitching is double and triple wherever needed, and a crotch gusset provides extra ease and comfort that's great when mounting up and also as you move around in the saddle.

Fit, quality and protection that's quick, easy and comfortable. They'll quickly become your favorite jeans, both on and off your bike. Black or Blue. Size 32-30, 32-32, 32-34, 34-30, 34-32, 34-34, 34-36, 36-30, 36-32, 36-34, 36-36, 38-30, 38-32, 38-34, 38-36, 40-30, 40-32, 40-34, 40-36, 42-30, 42-32.

"Wanted to buy a pair of riding jeans for a long time but didn't like the design of the other brands. checked out the protekt jeans liked what I saw especially the knee pads and heavier denim and the fact they are made in the USA, but read the reviews and was concerned about the pads not fitting correctly then read the review that aerostich posted (thank you aerostich for listening to your customers) and they corrected the problem. I bought a pair and I am very happy with the fit of the jeans and the knee pads stay in place and are very comfortable. I definitely recommend the protekt jeans to anybody thinking of buying a pair of riding jeans." —Review by Larry B

"Very satisfied. I got these pants primarily for around town riding. They are very comfortable and the sizing is accurate. The zippers for the knee pads work well and are not visable. The fabric is heavy but breathes well and the pants aren't too hot for summer rides. For better or worse, the pants look more like dress pants than motorcycle pants. ENGINEER'S COTTON RIDING SHIRT

You just can't find this sort of heavy-duty 9 oz. long sleeved 100% cotton shirt anymore, not even at those incredible hardware stores you see in rural small towns. We've sold this style shirt for more than 25 years, but when the original supplier recently started making them somewhere else and the quality got crappy, we found another manufacturer still making them right here in the U.S.A., with better durability and higher quality than the originals.

It's perfect for riding because it combines superior comfort with cast iron durability. Like denim, it becomes better with multiple laundering and wear. You won't see this shirt on someone else unless they're driving an ElectroMotive diesel. White & blue. M-XXL.

BACK-A-LINE LUMBAR SUPPORT

This is not a stretchy support girdle from a local home improvement store, but real, dynamic back support system that reduces lower back pain, ensures firm lumbar support and improves your spinal mechanics. Muscle support and postural assistance are achieved with the built-in curve of the patented-shaped back pad integrated into the snug-fitting non-elastic belt. Allows your back to work naturally, providing exceptional support and back pain relief for even long, strenuous rides. This Backaline DBX back pad also is great for off-bike wear to help reduce or eliminate back pain, correct posture, build strength and muscle memory, and develop a healthier back. Sweat-resistant, washable and breathable wick-away fabric. Black. Small (27-32" waist), Medium (31"-36" waist), Large (35"-40" waist), XL (39"-44" waist), XXL (43"-48" waist).

THE TEXTILE RIDING SUIT PROBLEM...

Nylon or polyester fabrics worn directly between you and a riding suit's nylon (or polyester) outer layer are not especially comfortable when things turn warmer. You want something against your skin that will absorb, disperse, and wick body moisture.

Step out of your gear at a roadside stop wearing only cotton boxers (or briefs) and as comfortable as this might be, someone might call the fashion-police, and they might come and haul your skivvy-clad butt off to fashion-jail in the back of their fashion-squad car.

THE THOUSAND MILE DAY SOLUTION

Old-school all-purpose 100% cotton twill shorts are what you need. Simple. Unlined. The kind that become softer and better the more you wash them.

We looked all over the place for nice old fashioned cotton gym shorts exactly like these. You'd think finding some would have been easy, with Google and Alibaba and everything else right there on the internet. And with Asia full of hungry garment sewers. Not so.

Finding the perfect shorts was like finding the right temperature porridge in 'The Three Bears' children's story. Some were too lightweight. Some were too elaborate. Some needed a separate belt. Some were too expensive. All had some type of goofy problem.

After a couple of years we gave up and stopped looking and the hell with it. We made our own. Now they are being sewn every day,

here. Right along with the riding suits. In five colors and two lengths. Of a wonderful old-fashioned 100% cotton medium weight twill that gets softer and better every time it's washed.

These all-purpose shorts last forever and they don't look bad when you are just standing around somewhere in your riding boots and a t-shirt. Wear under your riding suit or pants, with or without other underwear. (Try commando.) When you are not in your riding gear they look like respectable shorts, yet function like comfortable underwear when you are. Especially after a few washes.

Cotton riding shorts like these are essential riding equipment when you wear synthetic protective textile rider's gear. Try them. You won't be disappointed. Ride all day in sweet comfort.

AEROSTICH MID-WEIGHT COTTON SHORTS

These comfy 100% cotton shorts are great for wearing under a riding suit or anywhere. And everywhere else, too. Hand-made quality using a mid-weight cotton twill that gets soft and more comfy with each laundering. An elastic waistband and adjustable front belt, and two side pockets to hold stuff. "I've had these shirts for at least 10 years. They wear like iron. I have 10 pair and I wear them every day. Not one seam has raveled, not one tear or hole... They are great to workout in pulling the moisture away from your body... On long road trips you can wash them in a sink and they will dry over night. In the cold they add warmth yet when its hot they keep you cool..." —Review by Mike

"When I opened the package my first thought was wow what a nice shirt. It did not disappoint! I wore this shirt everyday for 12 days in summer temps & northwest rain under my Darien Jacket. I washed it once, and the other times I rang it out in the hotel sink. The shirt kept its shape, neck did not get stupid. AEROSTICH MICROFIBER RIDING SHORTS

One of the best technology crossovers from bicycling to motorcycling is padded, stretchy shorts. If you've never worn these things on a long ride, you owe it to yourself to try a pair. They seem to add another couple hundred mile range to a day, as they keep fatigue at bay longer than yer basic briefs. These are a modified version of bicycle shorts, cut slightly shorter in the legs, and with all the Lycra and fleece of the originals. Put a stop to chafing, stay comfortable and keep riding! (Also an old Iron Butt rider's secret weapon.) Black. S (24–28), M (28–32), L (32–36), XL (36–40).

"I've had these shorts for a few years now and they get worn a lot. They have held up amazingly well, not showing any signs of wear. I got a couple of pairs when I was a bit heavier and I found that they make the ride better. I've lost a bit of weight and now I find these shorts to be very versatile. I use them for working out, bicycling, yoga, and whatever else I try. I got XL when I had a 40" waist; they still fit now that I'm down to a 34. I think I'll be getting a L next time though. The only gripe I have is that they are a bit tall, if you don't have a flat stomach you will probably roll them down when you sit down." —Review by Zig08

BAMBOO-COTTON BASE LAYER 1/4 ZIP JERSEYS

There's no arguing...women and men agree a Bamboo 1/4 Zip Jersey is must have kit for on and off the bike. It's a great layering piece, light and soft, with a practical cut great for wearing under a button-up shirt on a cold day. Darn comfy on it's own too. The women's version is cut, well...a little more girly and more form fitting than the men's, which is more straight patterned.

The ladies version has thumb-holes at the end of the sleeves too, which prevents the sleeves from bunching when suiting up and keeps cold drafts at bay, which is a nice touch (sorry guys... deal with it). Both sport a semi-lock zipper that stays in place, and of course all the benefits of bamboo fabric apply: Moisture wicking, anti-odor, natural temperature regulation, UPF 50+ protection and 4 way stretch. 55% Organic Cotton/40% Viscose from Bamboo/5% Elastane. AEROSTICH KEEP CALM

Mass air attacks and bombs falling on London in WW2 (The Blitz, which over a two month period killed about 40,000 men, women and children, and destroyed about 375,000 homes) isn't directly comparable to today's roadways replete with cruise missile taxis and fully-laden minivans piloted by soccer moms in full hair-fixing-friend-texting-sit-down-and-leave-your-sister-alone-gotta-get-to-practice mode, but still our modern traffic situations do sometimes get frightening (In the USA, roughly 4,000 riders are killed per year and 85,000 are injured). "Smart people from history have said the same thing in many different ways, that we conceive and design and then create our technologies, and then we start to use these things and from thereafter our things create us. In other words, if someone starts wearing a one piece Aerostich suit, it changes how, when, where and why they ride. And how they consume 'motorcycling.' And that leads to more riders who want to split lanes and use their bikes in more useful ways." —Mr. Subjective, 4-17

These suits get better and better the more they are worn, for many years. Especially compared to how long denim lasts after it 'gets good.' And because it is more a piece of equipment for everyday personal mobility than any fashionable sportswear style, it's a very subversive product. Everyone else's powered mobility default is a car, a taxi, a subway or a bus. This suit makes you one in ten thousand. Literally." —Mr. Subjective, January, 2017

AEROSTICH ROAD GRIMED ASTRONAUT

Do people in grocery stores and gas stations see your one-piece coverall or teched-out armored adventure suit as peculiar? Have you ever ridden past a bedraggled looking group of bevested and bechapped riders standing around under a freeway overpass smoking cigarettes and waiting for the rain to stop...and did you smile inside your helmet as you went by? Do bearded hipsters regard the uncoolness of your wonderful habiliment from saddles of their fenderless aircleanerless purified bikes or (more likely) thru their car windows as you ride by them in traffic on a cold dark day? 🇺🇸

If some of this is slightly familiar, you are a Road Grimed Astronaut. You have the right stuff. So you might want this.

"You will ride more, but you do need to get used to looking like a Road Grimed Astronaut walking around in one (an Aerostich one piece suit) whenever not actually in motion on your bike. People don't get it. Especially in places like supermarkets, office building elevators, etc. That is the toughest part of owning one, but once get past this you will be riding more.

After all my years wearing our one piece suits I mostly now enjoy having secret giggles at people's questioning and sometimes idiotic reactions. Especially when the weather is really bad and I'm riding...and then walking dripping wet into a meeting and taking the suit off. Once, at a board I serve on here I entered the room with about twenty persons standing around waiting for everyone to arrive and all at once everyone stopped talking and turned to look at me. My R-3 was dripping wet and I was holding my helmet. An otherwise intelligent lady broke the general silence with: "Did you ride a motorcycle here?" And almost immediately realized how that question came out when someone else in the room stifled a laugh. You just cannot collect wonderful moments like this without one of these suits. Not to mention how much fun it was to ride to the meeting, and then away afterward, in the first place.

TOTALLY SERIOUS BELTS

Say you park on the sixth floor of a large parking ramp when it suddenly comes under heavy attack by a group of militant anti-motorcyclists and the only way out is a 200 yard slide down a lightly insulated power line straight onto the roof of a neighboring building. Would you trust your current belt for that slide? I don't think so! These belts are for those who need to be able to count on their gear in the worst possible scenario. We love

them for jeans because they fit very comfortably, look cool in all situations, and are lightweight. In a pinch they can be used as an additional tie-down strap and the fall-rated buckle is easy to use and infinitely adjustable. These types of extreme belts are hard to find in these widths which fit standard belt loops. Simple, classy, and strong, like Bond...James Bond. Lengths measure: Sm. 40", Med. 44", Large 47.5".

WORLD'S THINNEST WALLETS

You won't find flatter, more inconspicuous and lightweight wallets anywhere. These will carry all you need for any journey, whether it's a quick errand to the store, or riding beside wildebeest in Africa. They're better for your back, and help prevent wallet sciatica. Each style comes in both leather and ripstop nylon (which is flatter than flat!). Carry nice in front or back pocket. Patented too, believe it or not. The leather version of the Executive is most recommended. The Anti-RFID versions look and feel identical to the regular models, and prevent tech-savvy bad guys from stealing the information that is encoded on your credit cards.

AEROSTICH SILK SCARVES

A classic silk scarf should be soft, thin and slippery — so you can wrap one around your neck, close up your jacket and rotate your head and neck all day in draft-free comfort, without chafing. These luxurious 100% natural silk scarves are handmade of a soft, dense weave that's perfect for riding. No synthetic fiber is warmer, softer, stronger, or more durable.

Silk provides maximum comfort across every temperature range: warm and draft-blocking when cool, and refreshing when worn wetted during hotter conditions. When you're traveling this durable silk washes perfectly in any sink, too — even with a simple bar of hand soap.

The Standard Scarf model is medium weight, single layer silk of sensuous softness. The Competition Scarf model is similar to the standard model but two layers thick. Both are premium quality, long lasting pure silk that will keep the wind, rain, dust and snow from blowing down your neck, and will pack away ultra-small inside any pocket.

No other neckwear works this well, or looks this cool. 14"×72".

MIL-SPEC SCARF HISTORY

Silk was so important that its trade probably changed world history more than any other technology. The famous 'Silk Road' connected Europe to the Far East during the middle ages, and this brought together global knowledge that advanced civilization and helped begin the renaissance.

Strategic military considerations, more than demand for fashionable garments, caused the establishment of this trade route. During the middle ages front-line soldiers lived, traveled and fought wearing coarse tunics and outer uniforms. Silk scarves allowed soldiers to close their protective battle (and outdoor survival) garments tightly around their necks without chafing or discomfort, so they could fight better and travel farther. This was a true battlefield advantage.

As recently as World War I this remained so. Early planes and cars were all 'open cockpit'. Soldiers still lived and campaigned outdoors for weeks at a time, and this meant wearing heavy warm gear. After the war civilian pilots, race car drivers, motorcyclists and movie idols (Errol Flynn...) further enshrined silk scarves as garb synonymous with bravery, courage and endurance.

Then airplanes and cars became enclosed and military dress adapted. Soft, slippery scarves became unnecessary. Silk's swashbuckler history and function was not only forgotten, it became a laughable cliché. Something only worn by old men.

The last vestiges of the silk scarves centuries-long military role evolved into the fashion of men wearing neckties with their sport coats, blazers and business suits. Silk scarves had become decorative neckwear. (Now you know where neckties come from.)

That's sort of sad ending for such an important habiliment—except once again riders have rediscovered how great these scarves work when worn with modern riding gear closed tightly around one's neck. Once you've tried wearing one, you'll never look back. Make some history.

RESPRO FOGGY BREATHGUARD

A comfortably thin, stretchy neoprene face guard that helps eliminate visor and face shield fogging on cold days. Fits (via hook & loop) into all full face helmets. Comfortable in use. Eliminates the need to tip the shield open at every stop.

#1558 \$28.00

COOL OFF TIES

Relief for sultry rides in hot weather. This 100% cotton neckwear is filled with water-absorbing polymer crystals which can hold 350–400 times their weight in water and they release it slowly (over a period of days). Hence, increased comfort in hot weather. A simple, effective tool for heat management. Non-toxic and reusable. 35.5"×1.75". Assorted patterns and colors.

#1551 \$9.00

AEROSTICH ELKSKIN ROPERS

Your favorite gloves. You just can't ride anywhere without them. When they finally wear out, it feels like you've lost a friend. Made of natural tan medium to heavy weight elkskin, they are thicker, stronger and more abrasion resistant than deerhide and they'll last much longer.

Built for cowboy and ag work, they're tough enough for barbed wire fencing, yet sensitive enough to accurately handle a lariat. The snap cuff will slightly gauntlet over most jackets or close to let wind in your sleeves on a hot day. The left thumb is equipped with a visor squeegee made of resilient squeegee material.

All California Highway Patrol Motorcycle Officers (and many other depts.) wear Elkskin gloves 8-10 hours a day, week in and week out. You too will experience how right they are the minute you put them on and grab the clutch lever. These are the best gloves for serious combat touring adventures you'll ever wear. Full and half sizes 7-13 (size 11.5 or 12.5 not available) Black may bleed slightly when wet. 

Natural #420 \$49.00

Black #440 \$49.00

Tough Screen Ropers #429 \$67.00

AEROSTICH COMPETITION ELKSKIN ROPERS

These Competition Elkskin Ropers take the Standard Elkskin Ropers to the next level with an added hook and loop wrist closure, reversed for ergonomic advantage, and also add a generous Elkskin covered TF3 impact-foam knuckle pad.

This is a premium rider's glove, made by a ranch and work glove company in Washington State. They're strong and durable enough to take on everyday rough cowboy and ag work -- from handling barb wire fences to accurately directing a lariat, and ultra-comfortable all-day because of their superb medium weight luxuriously tanned natural tan Elkskin. This comfortable abrasion resistant leather absorbs and dissipates sweat, wears cool, and quickly conforms itself to the shape of your hand.

The visco-elastic TF3 impact material padded knuckles make a protective difference in some crash scenarios, and of course, the left thumb is equipped with a resilient visor squeegee to help keep a clear view of the road in damp and rainy conditions.

These are the ultimate gloves for serious combat touring adventures and all A to B rides. Full and half sizes 8-12 (not available in size 11.5 or 12.5). Natural. 

#421 \$70.00

AEROSTICH MERINO WOOL INSULATED COMPETITION ELKSKIN ROPERS

Elkskin palm for durability and protection, and deerskin in other areas for lightweight, protective durable comfort. A knuckle impact pad adds further protection. Adjustable wrist strap is secured with both an elasticized area and a reversed hook-and-loop strap which pulls towards your body for easier adjusting. For added utility and safety, the left thumb is equipped with a resilient visor squeegee you'll use more than you think.

There's an oval shaped second layer of elk sewn across the heel of the palm to provide additional abrasion resistance.

Merino wool lining features hidden wind blocking fleece across the backside, positioned between the Merino inner and leather outer.

Full and half sizes 8.5-13 (not available in 11.5 or 12.5). Order insulated 1.5-2 sizes larger for correct fit. Natural. 

#499 \$127.00

A SECOND SKIN

Elk and Deer leather mold to one's hand really well. Two tricks to a fast break-in so they will feel great right away: 1.) Start with the exact right size. Our gloves are traditionally graded, not S, M, L, XL, so there are twice as many sizes and the incremental size-to-size fit difference is closer...nearer to custom-made, feel-wise. 2.) On a warm day when you can ride for several hours continuously, wet the gloves completely, wring them out, put them on and go for that ride. At the end they will have dried around your hand, stretching and shrinking slightly in places. From then on they'll feel like a second skin.

AEROSTICH TOUCH-SCREEN ELKSKIN ROPERS

Use every electrostatic screen controlled device with your riding gloves on. Rows of electro-conductive stitching exactly where needed let you scroll, dial, pinch-zoom, browse and navigate normally.

The Ropers themselves are the same as the model #420 on the opposite page.

Modern techno-function meets old school comfort and performance. Full and half sizes 8-12 (not available in 11.5 or 12.5). Natural.

AEROSTICH ELKSKIN GAUNTLETS AND MERINO WOOL INSULATED ELKSKIN GAUNTLES

Elkskin palm for durability and protection, and deerskin in other areas for lightweight, protective durable comfort. A **TF-3** knuckle impact pad adds further protection. Adjustable, gusseted gauntlet seals sleeve cuffs. And the wrist is secured with both an elasticized area and a reversed hook-and-loop strap which pulls towards your body for easier adjusting. For added utility and safety, the left thumb is equipped with a resilient visor squeezegee you'll use more than you think.

There's an oval shaped second layer of elk sewn across the heel of the palm to provide additional abrasion resistance. The Brown leather on the Brown/Natural version also has been specially treated to give them additional water resistant qualities compared to the Black and Natural models.

Merino wool lined model features hidden wind blocking fleece across the backside, positioned between the Merino inner and leather outer.

Full and half sizes 8.5-13 (not available in 11.5 or 12.5). Order insulated 1.5-2 sizes larger for correct fit. Natural, Brown/Natural and Black. Black dyed models may bleed slightly when wet.

WHICH ELK GLOVE?

"...As I mentioned earlier, I do a lot of sport riding and sport touring on a Honda VFR and will do occasional adventure touring on the GS, so I was leaning toward the gauntlet. Would there be any issues with that fitting over the sleeve of a Roadcrafter and allowing smooth rotation of the wrist?"

"Insulation is not really an issue, given that I live in San Francisco and the climate here is fairly consistent - rarely below high 40s or above the mid 80s." —Chuck S. (email)

"I wear both versions of the Elk glove. 90% of the time I grab either the regular or competition Elkskin Ropers. The gauntleted version is also available, but I seldom take it. Probably mostly because I don't ride a sport bike like your VFR.

"The gauntlet on the uninsulated version of the gauntleted ropers is not lined, so the suede-ish backside of the leather does drag slightly against the sleeve of a textile jacket, but it's not enough (to me) to be an issue. Also, as the gloves break the suede-ishness wears a way slightly so the drag seems even less after a few hundred miles.

"The gauntleted models are slightly more to deal with in subtle, nuanced ways. They are just 'more glove'. The fastest and most unconscious pull-on-and-go is the regular roper. You snap the wrist snap without thinking and go. Perfect for everyday short-hop, on-and-off-the-bike riding. Next fastest/easiest is the competition model. The wrist strap is much more secure than the snap, but it takes a nano-more of

consciousness to manipulate it. For all-day riding, though, I usually pick this one. The gauntlet models add another nano-bit of rigamarole, but for a sport bike rider are probably a better option. These shades of ease-of-use distinction are very slight.

"When I travel I normally take two pair of gloves — usually a pair of competition ropers for wear most of the time, and the insulated gauntleted ropers [above] or Luxury Cowhide. And the triple digit raincovers.

"Last November I rode around Lake Superior with some friends on Gold Wings. I was riding my unfaired bike which has heated grips, but is without hand guards (wind protectors). Temps every morning were about 30°F and the high each day was about 45°F. I had both of the above and switched multiple times for comparison and evaluation. In the end I liked the insulated elk ones slightly better, but it was very close.

"Since that trip (and as a result my experiences on it...) we slightly increased the insulation thickness of the wind barrier hidden within the backside of the hands and fingers on the insulated elk ropers. Before it was a layer of windproof fabric placed between the wool liner and the elkskin outer. Now it's a layer of thin windproof fleece (fleece laminated to a layer of wind blocking coated fabric).

"The elk gloves are sized by glove sizes, not s,m,l, xl, etc. Basically there are twice as many sizes. For example, both a size 9 and a 9.5 are 'm' graded. So you end up with a more precise fit. A good-fitting glove is as important as a good-fitting shoe. It's the only real difference between an ok glove and a great glove." —Mr. Subjective

LUXURY DEERSKIN THREE SEASON

Maybe only the Japanese, with their respect for and interest in cafe-racer culture, could come up with gloves that are not only ideal for 3-season usage, but which look superb and feel this great when you pull them on and lay your hand to the grips. Beautifully constructed and detailed, these gloves feature fantastic quality hides and are perforated and vented along the knuckles and palm to help keep hands cool when the weather's hot. Sturdy reinforced knuckles, palm and gauntlet make these gloves safe without sacrificing functionality or comfort. Over-size hook and loop cinch strap. The most gorgeous, luxurious gloves in this catalog. Black. Sizes: 8.5, 9, 9.5, 10.

#463 \$227.00

LUXURY COWHIDE WINTER

A top quality Japanese-built glove for colder-weather rides. And really, really comfortable. The cuff and palm are lined with soft, brushed nylon, and the backside side of the hands are lined with a warmer heavier synthetic. The fingers are articulated and pre-curved, and the knuckle area is padded with a diamond pattern quilting. The exterior shell is constructed of 1.2 mm waterproofed cowhide leather with a hidden waterproof/breathable membrane. The wrist and cuff is cinched with hook & loop. Reinforced palm. Ultra Nice. AEROSTICH DEERSKIN

Very comfortable and easy to wear—just like Elkskin, but made of slightly thinner medium weight deerskin so they're ideal for casual, everyday rides, especially commuting and touring. No break-in needed; they will be as comfortable as prewashed denim the moment you put them on. Because they're so light, absorbent and soft, they provide great control feel. Nimble enough to pick a coin off a table, yet strong enough for riding protection. The insulated versions have 3M Thinsulate and a brushed nylon lining, so they are perfect for spring and fall wear. Full and half sizes for a better and more precise fit. For insulated gloves, order 1/2 size larger than non-insulated version to ensure proper fit. Both styles feature thumb visor squeegee.

It was soon being used to clean rental yoga mats as well and she sent samples to a large yoga supplies company in California. In the meantime conducted tests of every ingredient including 25 essential oils on as many yoga mats from different companies that I could find. I sent the results to all them and followed up with a visit...In April 2016 I discovered a novel anti-microbial agent at a trade show and decided to incorporate it into our products...One of the suggested uses is to prevent odor causing microorganisms to grow on articles and surfaces. Early this year, we decided to try and find some other industries to use our product. I immediately thought of motorcycle gear since I had been testing the anti-microbial on my own boots, crash helmet, gloves and even slippers for nearly a year." —John Clarke

SELF-MOLDING FITTING INSOLES

The next best thing to a custom prescription orthopedic. Most insoles simply condense and compact under pressure. These are designed with a firm structural footbed that self-molds to your unique foot shape, cushioning and mirroring each foot for increased comfort, control and support. These are rock solid. Two thicknesses: medium profile (thicker) works best if you're between boot sizes, or low-profile (thinner) uses minimal boot space. 7, 8, 9, 10, 11, 12, 13, 14.

"I have owned other brands of rain pants for those days or times when you need to put on rain gear quickly. Although pricey, these pants are far more better in quality than others. The zippered pants legs are way much better than elastic when trying to get into the pant. Elastic draw string is also outstanding. Fit of the pant is true to form. Rode for several hours in the rain. Outstanding! These pants will allow plenty of air so that you are not sweating in a sauna as compared to other rain gear pants. Highly recommend this pant for your daily commute." —Review by Shawn

AEROSTICH TRIPLE DIGIT GLOVE COVERS

It is possible to enjoy warm, dry hands while being plastered and hammered and hosed. The thin 3.5 oz/sq yd 40d three layer waterproof ripstop nylon laminated fabric breathes during rain conditions so your skin won't become clammy. The oversize gauntlets slide on easily and allow a secure grip when used over your regular (crash protective) gloves. An elastic drawcord with a tethered cordlock keeps them in place. Hook & loop wrist cinches are ergonomically reversed and easier to use.

They pack very small, so you'll always have them ready. There's Scotchlite reflective for nighttime hand signaling, and a left thumb visor squeegee. TUCK-IN OR WEAR-OVER?

You are riding along down the highway in the rain, wearing Triple Digit Raincovers. The drawcord around the end of the gauntlet is drawn up tight. Everything is working perfectly, your hands and gloves are dry even though it's coming down in buckets. Then you must come to a stop at the end of an off ramp, and there's a stoplight. Red. You take your hands off the bars and let them fall to your sides while you wait.

All good things must come to an end. Rainwater runs down your sleeves right into the tiny opening at the end of the gauntlet where the drawcord exits. And trickles into your wrist. A few more stoplights ahead and your gloves and hands are now wet inside the raincovers.

There are two solutions: 1) Remember not to lower your arms at stoplights. Learn to fold your arms across your chest or lay them on a tank bag. 2) Wear glove raincovers which are tucked inside of your sleeves.

BAMBOO CHARCOAL SOCKS

Weird if you think about it, but nirvana for your feet. Advanced nanotechnology permanently melds the ancient beneficial properties of bamboo charcoal into the natural fibers of this sock. The result is a supple and incredibly comfortable 200 thread count knit that continues to get fluffier and softer with each washing.

Every fiber is infused with charcoal to provide true odor eating and anti-microbial properties within a unique three-dimensional weave pattern that delivers exceptional moisture wicking ability. And (...“but wait, there’s more!”) as the socks are worn and heated by the body, good negative ions are also released, promoting increased foot health and improved circulation. Made from renewable organic materials, these luxurious socks are not only good for your feet and your health, but are good for the planet too. One wearing will make you a believer. Crew height. S/M (6.5-9), M/L (9.5-13).

HORSESHOE SPROCKET

AEROSTICH HORSESHOE SPROCKET & HORSESHOE GEAR HOLDER

For centuries riders have believed that luck and good fortune would protect those passing beneath a horseshoe mounted over the door or above the gateway to any home, barn, garage or workshop. This artwork updates that good-luck tradition (especially America's old west lore from barns, stables and corrals) by welding a meticulously refinished (but well used) motorcycle counter-shaft sprocket inside the standard horse's hoof accoutrement. Even if you are not superstitious, it looks pretty cool.

Each is crafted by Bob Stokstad, a retired American scientist (neutrino detectors) and life-long daily rider, commercial motorcycle photographer, and grandfather. Add this example of his art to the wall of your bike's abode or workshop...and as you pass beneath you'll enjoy it's silent wish for a safe return from every ride. This is one-of-a-kind heirloom-quality art with a purpose. See one being made at aerostich.com/aerostich-videos. Each measures approx 6"×8". 🇺🇸

HELMET FITTING

Using a long strip of paper, have a friend measure horizontally around the largest part of your head, about an inch above your eyebrows (see illustration). Measure the length of the strip with a ruler and use the following chart to determine your helmet size:

HELMET SIZE	MEASUREMENT	CHEEK PADS
Small (6 7/8"—7")	21 5/8"—22"	15 mm
Medium (7 1/8"—7 1/4")	22 3/4"—23"	20 mm
Large (7 3/8"—7 1/2")	23 1/8"—23 1/2"	25 mm
X Large (7 5/8"—7 3/4")	24"—24 3/8"	30 mm
XX Large (7 7/8"—8")	24 3/4"—25 1/8"	35 mm

For safety, comfort, and noise reduction, your helmet should fit snugly. If you can rotate your head inside the helmet, it's too loose. Helmets have a layer of soft foam comfort "upholstery" that covers the hard polystyrene (styrofoam) impact absorbing lining. You should be able to feel each pad pressing against your head. If you hold the helmet isometrically (one hand on each side of the helmet) and try to move your head inside of the now "stationary" helmet with only your neck muscles, you should feel the

soft foam upholstery compressing between your skull and the polystyrene. If you do not feel any compression, your head will be right up against the unyielding polystyrene. The helmet padding will break in and soften during about the first ten hours of wear, so if it feels a bit too snug when new, that's normal. A helmet should be snug... not uncomfortable or over-tight.

HEAD SHAPE & ALL DAY FIT » A good fitting helmet is a safer, quieter helmet. To fit any helmet properly you should position it on your head so the top of the eye port opening is about one finger width above your eyebrows. This will tell you if the chinbar fits the shape of your jaw, and how the cranial section fits your head. Pay special attention to the fit around the crown of your head (the part that is contacted by a baseball cap's band). Sizing the helmet to better fit the face instead of the head, will result in a looser fitting, noisy helmet.

NOLAN N104 ABSOLUTE N-COM MODULAR

The N104 Absolute is a top of the line modular helmet, combining safety and comfort features into a contemporary design. The lightweight and aerodynamic Lexan® polycarbonate shell features a built-in spoiler for improved stability, improved airflow and a quieter ride. A SIMPLE GUIDE TO MODULAR HELMETS

You can't go wrong with any of these. Some models fit different head shapes (round, wide, long-oval, etc.) better than others, and you'll find specific information about this in the detailed product descriptions for each helmet. General fitting instructions and some useful tips are found in our Helmet Fit Guide.

Good — Rapha Max: Lightweight and very quiet. The standard cheek pads were very tight on my face, and (after a first day of uncomfortable wear on a trip... if you can, never leave on a trip wearing brand new gear) I had to jam a motel ice bucket tightly inside overnight, to compress and soften them up. Softer and thinner cheek pads are available for this helmet. Airflow vents are extremely effective. Double

D ring chin strap a pain after using the great Nolan chin strap latch, but you get used to them after a few days of regular use. This one is very lightweight, which is nice. Korea.

Better — Nolan N104EVO: Kind of gimmick-y in styling and features, but very nice overall. From one of the world's largest helmet

Related notes: Modular helmets provide superior versatility.

At highway speeds and on sport and unfaired bikes you'll enjoy 'full-face' protection and comfort, yet during short stops, or when riding slow

somewhere you can open up the chin bar. This can be specially nice in hot weather. If you want only one helmet to do both all-day longer-distance rides and also for frequent short-hop urban riding, we recommend them.

New helmets take a while to 'break in'. Especially 'full coverage' and modular types. They also take a while to learn the various tabs and slots that open the chin bar and visor and vents. For a while one fumbles around with a new helmet but eventually one learns to use the various bits and it all gets easier. On my old Nolan helmet everything is now second nature. —Mr. Subjective, rev 4-17

AT WORK

One cool thing about this holder's office cube adapter in-use is when your helmet and gloves are right there they not only are out of the way and not on a chair or work surface (space in most cubes is limited...) but you can also look over at them and instantly visualize that you'll be riding in a few hours, which is a nice mental thing to do in the middle of a work day...Especially if work happens to extra-boring or otherwise not be going particularly well at some moment.

Another nice thing is that this holder advertises to all the other non-riding co-workers who happen to pass by your work space that you are a rider. It might not seem like such a big thing, but I think it is. This is exactly the sort of 'advertising' that helps create new riders. People who see riding being incorporated into a co-workers life on an everyday level are encouraged by the demonstration. The helmet holder makes riding stand out as something both ordinary and extremely cool at the same time. Enjoy your commutes. —Mr Subjective, 2015

DOOR OR CUBE HANGER HOOK

WITH OFFICE CUBE ADAPTER

"My husband and I had been searching for wall mounts for our helmets and came across this one. It is a very durable piece of metal with an aesthetic design. I love that it is both minimalist and functional. We stacked one on top of the other and on the bottom mount used an s biner to hang our jackets. It's just perfect!" —Review by Luisa

ADJUSTABLE VISOR WIPE

Adjust the hook & loop strap for a perfect fit around any size glove digit. Align the non-scratch silicone rubber squeegee on a preferred finger or thumb and be ready to wipe away any rain that dares come your way. 1.5"X.25" squeegee, 5.75"X.75" strap. One wipe. Black.

AEROSTICH VISOR CLEANING KIT

The two little .5 oz bottles are a nice flat, oval shape so they pack flat in any pocket. These won't leak or spill like tiny pump sprays can, either. One's got a windshield cleaner, the other is "Protectall" (#4796), a fabulous all-purpose cleaner and polish. Also included are a microfiber cleaning cloth and a compact 3"X5" Cordura carrying case. An indispensable shield cleaning kit that packs small enough carry along on every ride, ready for use at a moments notice. No excuses. 

#1051 \$25.00

VISORCAT WASH/WIPE SYSTEM

See better and ride safer. This compact wash-wipe system mounts unobtrusively to left hand glove. Wiping left to right opens the edge of the sponge guard and scrubs your face shield free of dirt or bugs. Integrated fill tank stores washer fluid or water and is easily refillable. Swipe right to left to activate the twin wiper blades to clear residue or wipe off rain or road spray when riding in wet conditions. Adjustable wrist and finger straps secure it to your glove and loosen in one second to take your glove off. Includes sponge and bottle of visor cleaner fluid.

#1975 \$50.00

CYCLE WIPES
