“A motorcycle functions entirely in accordance with the laws of reason, and a study of the art of motorcycle maintenance is really a miniature study of the art of rationality itself.”

—Robert M. Pirsig,
Zen and the Art of Motorcycle Maintenance

PARK AND MOVE CENTER STAND DOLLY

Garage too small? Limited on space? With an ultra-low profile and heavy-duty 360°, non-marring, locking casters, this 1000+ lb. rated heavy-duty aluminum dolly allows a bike to be moved around the garage or workshop by one person, with minimal effort. Works with your bikes center stand to easily move, rotate, store and work on your motorcycle. Works great for scooters too. 20"×16"×3.9". 14lbs. 

#3658 \$223.00

"For winter storage, I place the RT in the back left corner of the garage and "walk it" back and forth to get it "between" that corner and the stairs leading into the house (the steps are about center of the back wall in a 2 car garage). The bike is about 2" shorter than that space, and once the bike is near the steps, it is impossible to maneuver it closer to the back wall. Consequently, there is more of an opportunity for backing the 2012 Jeep Liberty into it. With the Dolly, I can easily push the bike flat to that back wall with about an inch to spare on either end between the steps and side wall...perfect place.

"The down side, is that it takes a bit of muscle to rock the bike on center stand, onto the Dolly; humbly, I asked a neighbor to help - better than dropping the bike. I suppose more practice will help." —Review by KRUZYNRT

WHEEL JOCKEY

A sensible tool for motorcycle chain and wheel work. Non-skid backing keeps the steel frame in place and aluminum rollers with sealed ball-bearings allow you to smoothly rotate for chain maintenance, tire inspection and cleaning. For bikes up to 650 lbs. Small and lightweight enough to stow under a seat or in a tank bag for on-the-road use. For road bikes only, not for off-road tires. 4"×4.5", 1.25 lbs. 

#2697 \$60.00

"I've ridden this bike from Toronto to Buenos Aires, with no GPS, no maps, no internet packing lists. No camping gear, no spares, no puncture repair. One contact lens, no insurance, no license. I've checked, mooched and slunk across 26,000 miles and 21 countries. I've cheated and I've won. Right now that's the funniest joke I've heard." —Dan Walsh in Ushuaia, Bike Magazine, January 07

TURNCYCLE

The robust, heavy-duty steel turntable is rated for up to 1000 lbs and features a rubberized non-slip surface. At 1/2", choose from either 16" or 20" diameter to easily accommodate most center stands. Wall-hangs neatly out of the way when not in use. Includes 2 leveling mats that raise your bike just enough and help level it up perfectly, making lifting your bike onto the turntable the same effort as when flat on the ground. Bright yellow markings help when lining up a center stand. Smooth rolling ball bearings and a lifetime warranty. Made in Canada. 16" version weighs 8.3 lbs. The larger 20" version uses thicker material to prevent flexing and will work better with bigger touring motorcycles (BMW F800GS, KTM Adventure, older air head BMW's, etc.) and weighs 17.7 lbs..

16" #4870 \$175.00
20" #5006 \$204.00

GARAGE ROLLASTAND

If your sporty scooter does not have a centerstand, this is the easy way to keep its chain lubed. It slips under the back tire and that's all there is to it. Heavy duty powder coated steel sides and solid steel rollers. If you ride a lot, you'll use this often. Under 750cc is 10.5"×7.75"×1.5", 3.3 lbs. Over 750 cc is 10.5"×8.5"×1.75", 4 lbs. 🇺🇸

Under 750cc #2573 \$35.00
Over 750cc #4907 \$40.00

SNAPJACK

Whether you are on the road or at home, this easy to use, portable jack is a sturdy addition to simplify chain lubricating, adjustment and maintenance. For use with most makes and models of modern motorcycles, it can quickly be deployed to lift the rear tire up to 1/2" off the ground to spin freely. Features a wide, stable cradle, multiple adjustment heights and locks in place for safety. Made from high strength low-alloy steel. Includes two protective floor pads and protective carrying bag. Folds to a compact 8.5" for easy storage anywhere. 🇺🇸

#4421 \$49.00

"Simple idea, makes chain cleaning, lubing, and adjustment so easy. Gave mine away, ordering 2 more."
 —Review by Wally

PACKJACK

A take-along stand that allows you to clean, lubricate, adjust and maintain your motorcycle's chain anywhere, anytime. Durable constructed from lightweight anodized aluminum and weighing only 9.5 ounces and measuring 1"×2"×7" when stored, it is small enough to stick in your pocket, store under the seat or keep in a tankbag or backpack. Simple to use, just pivot open and place under right rear swingarm while bike is resting on sidestand. Press with your foot to fully extend and lift rear wheel for easy rotation for chain maintenance. Works with all dual swingarm bikes, sets-up in 10 seconds and provides great stability. Improve bike efficiency and performance by easily performing regular chain maintenance. Includes storage bag. 🇺🇸

#5042 \$32.00

FLEXIBLE NITRILE GLOVES

These tough, yet lightweight mechanics gloves fit like a second skin and wear like iron. Air-infused nitrile palm-coating for exceptional gription on oily surfaces. Shaped to be über flexible, comfortable and extremely durable. When the dirty part of the job is done, these digit protectors are machine washable too. Gloves have a smooth black coating and are suitable for abrasive work. Black. M, L, XL.

Nitrile 380 #1401 \$6.00

DISPOSABLE MECHANIC GLOVES

These nitrile gloves were designed specifically for mechanics, and they feature textured fingers and palms to make it easier to handle slippery parts. Powder free and tear resistant, are a toolbox must for dirtiest jobs. Nitrile is much more resistant to chemicals than latex and these actually fits better the longer you wear them. One Nitrile glove fits either hand, so there's no need to screw around with which glove fits what. Black. L or XL. 100 pack.

#1451 \$24.00

MULTI CHARGER-MAINTAINER

State-of-the-art charging technology that recovers, charges, tests and maintains 12V batteries. Includes a special reconditioning function that restores stratified and deeply discharged batteries.

Additional features include maintenance charging, optimized cold-weather step-charging and programming to meet the demanding specifications for maintaining AGM batteries. Fully automatic 8-step program. Also features manually selectable 800mA OR 4.3A. steady-state output. Provides early warning of problems and even recovers deeply sulfate damaged batteries. Fully automatic operation includes safety features such as reverse polarity protection and no spark connection. Recommended for all Standard 12V batteries and sealed AGM 12V lead-acid batteries. Includes two connection sets, battery clips and fuse-protected ring terminals. Charging voltage 14.4/14.7/15.8V Max 4.3A. CAN-bus compatible.

#2978 \$103.00

LITHIUM CHARGER-MAINTAINER

Specifically designed to optimize and protect any Lithium Iron Phosphate (LiFePO4) battery, maximizing performance and lifespan. With up to 4.3 Amps of charge current, the multi-step charge program automatically adjusts to battery condition and balances cells quickly and efficiently. Precise charge control insures that even over-discharged batteries are correctly and safely recovered. Efficient low voltage mode is safe for long-term charging applications with alternating hourly maintenance and test modes.

Includes two connection sets, battery clips and fuse-protected ring terminals. Spark-free, reverse polarity protected and short circuit proof. Max current charge 4.3A, charge voltage 13.8/14.4V. CAN-bus compatible.

#2977 \$87.00

SYSTEM TESTER + CHARGER-MAINTAINER

Advanced charger with unique battery and alternator testing features. Combines advanced micro-processor controls with battery and alternator test function. Patented automatic desulfation program and a special reconditioning setting that will revive and restore deeply discharged and stratified batteries.. Float/Maintenance mode is ideal for long-term maintenance.

Three programs test battery voltage, start power and alternator performance, providing a complete picture of battery and vehicle charging system health. Reverse polarity protection and no spark connection. Recommended for all Standard, sealed AGM & sealed GEL 12V lead-acid batteries. Charging voltage 14.4/14.7/15.8V 800mA - 4.3A.

#2979 \$97.00

BATTERY TENDER PLUS®

The latest version of the famous Battery Tender®. Lucky for you (and your battery) the cost is the same. The enhancements to the original design are in the circuitry that ensures better charge absorption and a built-in 72 hour safety timer to protect a marginal battery from being overcharged. The display improvements tell the user that AC power is on, when it is charging, that the battery is 80% charged, that full charge has been attained, and when the unit is in "float" charge mode. Electrifying. 12V, 1.25A.

Battery Tender Plus® #2504 \$54.00

Battery Tender Plus® for BMW Gel Batteries (not shown) #4908 \$53.00

BMW Adapter Plug #116 \$20.00

AEROSTICH WATERPROOF 12V DIGITAL VOLTMETER

Know the health of your bikes charging system in real-time with this compact, waterproof, digital voltmeter. Reads tenths of a volt (12.6, 12.7, 12.8, etc) and is easy to install. Compact, easy to read, waterproof, vibration proof and dust proof.

Install with super-strong permanent double-sided mounting adhesive tape by attaching to the side an instrument panel, triple clamp or fairing or use the removable (file or grind off) bosses for bolt-on dashboard installations.

Installation notes: Shortish 6" leads mean you'll probably need add a bit of wire for most installations, and the display is bright enough to be read easily in direct sunlight so it may be overly bright at night...which can be adjusted/dimmed with nail polish or a thin fog of overspray. Specify Red, Green or Blue display color. Measures voltage from 3.5 to 30V. 1"x.6"x.7".

#4393 \$13.00

THREE DIGIT ACCURACY

Connect to any circuit that's powered when your bikes' key is in the 'run' position and you'll see the battery's voltage. Then hit the starter and the display will indicate the a slight voltage drop as the engine cranks over. And you'll notice similar tenth-of-a-volt electrical fluctuations whenever a brake light, driving light, electric grips, horn or other electric load is added, and a correctly functioning charging system will stabilize the readout nearly instantaneously. Reassuring. But if you notice the system voltage is for some reason slowly dropping you've either added too much load, or the charging system isn't working right, which is nice to know before unexpectedly finding yourself on the side of the road somewhere. Most bikes will run for some time if the charging system fails, so you can get to someplace better than a lonely roadside. A café, bike shop, motel, or home. Inexpensive peace of mind for the electrically paranoid.

LED VOLTAGE GAUGE

A precise, continuous way to monitor your bike's alternator output and battery condition. An essential instrument if your bike has bigger or extra lights, or other powered accessories. Its solid state, waterproof, ultra compact design is extremely durable. Small so it fits anywhere. Indicates from 9V to 16V using eight colored LEDs. A sensor auto-dims the LEDs at night. If the voltage readout goes below 10V, a red LED alert flashes. Small electrical system changes are noticeable at a glance. Two-wire installation. 2"x.75"x.2".

#2577 \$43.00

BATTERY STATUS INDICATOR

A practical combination of quick connector and battery level indicator. Shows the battery charge level simply and clearly with Red, yellow and green indicator lights. Wire directly to the battery and place the indicator in an easy to see spot to always know the battery status. Weatherproof cover opens to quickly and easily connect to a CTEK charger when the indicator shows low voltage. Cable length 21". 15A Fuse. Two-year warranty.

SAE VOLTAGE INDICATOR

A simple, lightweight, highly accurate way to measure and monitor the battery on your bike. Easy to install, too. Simply plug this indicator into an SAE connector hooked directly to your battery (sold separately) and the LCD displays voltage when the button is pressed or when initially plugged in. Works with any 12V Flooded, AGM and Gel batteries. Displays voltage range from 3V to 16V within +/-0.1 volt accuracy. Colored lights also illuminate red, yellow or green to indicate battery health.

#4894 \$15.00

#2987 \$12.00

LIGHTWEIGHT RECHARGEABLE Li POWER SUPPLY

A personal power supply, small enough to fit in your pocket or tank bag, with enough power to jump start a bike (or even a car), as well as charge laptops, smartphones, tablets, GPSs and other mobile devices. A crucial piece of back-up kit, it will recharge a device several times or power a laptop for up to 2 hours. Built-in flashlight too. Durable zippered case. 20 different types of fittings. 6"×2.8"×1". 14oz.

#2971 \$197.00

8' JUMPER CABLES

Designed for use on motorcycle battery terminals, these 8 ft long cables are worth the price the first time you need them. Store neatly in a handy included pouch.

#2777 \$22.00

AEROSTITCH 6' JUMPER CABLES

Nice and hefty for jumping a motorcycle or other light vehicles. Durable clamps grab battery posts with authority. Made of 10 gauge polar/solar wire that stays flexible. May be just the thing to save that ride. 6'. Includes storage bag.

#3524 \$24.00

AUTOSWITCH

Eliminate auxiliary toggle switches and their attendant holes by installing this device, which ties into your light wiring. Connect to high-beam wire or turn signal cancel button to allow independent control of driving lights, fog lights or any accessory electrical device from a pre-existing control button.

Tap high beams or blinker cancel button to activate, LED shines green to indicate power to your auxiliary relay. This programmable pulse sensor technology is a reliable and efficient way to control auxiliary power. Includes tie wraps, wire clips, adhesive tape and instructions. Max current draw 200mA @ 12V. 1.4"×1.4"×.3".

#4764 \$24.00

DOODAD SWITCH

A mini-toggle switch encased in an injection-molded housing, which just happens to fit on 7/8" handlebars perfectly. Used by itself, it will turn smaller items on (up to 6 amps@12V), but if you are going to switch the big stuff, like really large lights, we'd recommend a 12V relay in conjunction. Comes with a 34.5" long 2 wire insulated cord.

#4218 \$17.00

SEALED TOGGLE SWITCH

Completely sealed 20 amp switch with weather resistant coating and O-ring stem seal. Includes a stamped metal on-off indicator plate that fits over the 15/32" diameter, 3/8" long mounting stem and chrome plated handle. 8" wire leads. 12V. 1.25"×.75"×1.75".

#4757 \$16.00

BMW COAXIAL 12V PLUGS & SOCKETS

Dual plug works with both BMW and standard power sockets. Plug and Socket require additional wiring.

Dual Plug #185 \$12.00

Plug #181 \$10.00

Socket #108 \$12.00

BMW COAXIAL 12V PANEL MOUNT JACK

Provides a flush mount DC coax jack panel with a spring loaded cover. The six inch coax plug cable allows direct connection to DC coax power output. This is the same coaxial connector used in all Aerostich QuiConnect electric garment power cords.

#300 \$22.00

BMW COAXIAL ADAPTER

Insert the plug into a BMW style socket to instantly add a 15" extension with a standard cigarette lighter plug. Great for GPS, cell phones, radar detectors or other electronics. 15"×1"×1". 12V.

#4201 \$10.00

PANEL MOUNT OUTLET

Put power wherever you need it. Easy installation in .75" hole in any flat panel. The spring-loaded cover keeps out the crud. 3"×1.5"×1.75". 18" lead wire, 11.5" ground wire.

#4655 \$16.00

ALL-WEATHER POWER OUTLET

Ziptie to any handlebar or frame tube for a dependable source of power with all electrical accessories that have a standard cigar lighter plug. Useful for radar detectors, cell phone chargers, etc. Weather-

proof spring-loaded flip top cover keeps out moisture, grit and grime. 3"×2"×1.75", with two 12" wire leads.

#4654 \$12.00

WEATHER RESISTANT POWER OUTLET

This rugged 12V panel mount cigarette lighter power outlet socket is fitted with a rubber dust cap to keep out moisture and road grime. Installs easily and securely into any 1.2" hole. 6" wire leads. 1.5"×2.5". 12V/15A.

#4203 \$10.00

IN LINE BLADE FUSE HOLDERS

For hard wiring your GPS, radio, or other accessories. No springs, so it's not susceptible to vibrations.

The 20A includes two fuses for Garmin GPSs, and features a rubber dust cap. The 30A includes one fuse, and features a water resistant cap and about a foot of wire on each end.

20A #2550 \$10.00

30A #4664 \$5.00

12V 40A SEALED RELAY

12V, 40A Bosch-type relay for use with high amp draw electronic accessories like big driving lights, extra loud horns, double sided arm jesters, etc. Waterproof sealed

plastic housing with metal mounting tab. Includes installation and wiring instructions. 2.125"×1"×1.25".

#4667 \$4.00

"Went to garage to ride to work for first time this year. Bike on trickle charger all winter. Boots on. Riding suit on. Backpack on. Helmet on. Gloves on. Unplug charger. Insert key. Carabiner-clip garage remote to backpack strap. Turn on power to garage door. Remote button open door. Sit on bike. Back-paddle into driveway three feet. Pull choke. Turn key. Pull clutch in. Thumb button. Clickccccckkk... clickkkk...click...."

Push in choke. Paddle bike back into garage. Remove key. Remove gloves. Remove helmet. Button close garage door. Remove backpack. Remove suit. Remove boots. Replace boots with shoes. Put on lightweight jacket. Backpack over one shoulder. Drive car to work. Sit at desk. Order new bike battery. Sigh..." —Mr. Subjective, 4-14

POCKET MULTIMETER

Designed for basic electrical tests, this digital multimeter offers reliable diagnostics for everything from measuring AC and DC voltages, checking resistance and continuity, and helping find elusive electrical gremlins. Test leads wind neatly around case for compact storage. This small, lightweight multimeter fits comfortably in your hand but is rugged enough to withstand travel use. 4.75"×2.75"×.75".

#2939 \$14.00

POCKET AUTO RANGING MULTIMETER

Trouble-shoot electrical problems with this slim-line design digital multimeter. Small yet rugged enough to carry on motorcycle trips. Only slightly larger than a credit card, it features full auto-ranging, AC/DC volts, ohms, continuity, diode test functions and automatic power-off. Comes complete with batteries (1.5V button cells x 2), instructions, test leads, and carrying case. Delivers all the functions of a full size multimeter in a compact, easy to carry size. 4.25"×3.5"×.5".

#2940 \$23.00

FLAME RETARDANT HEAT SHRINK KIT

Practical kit includes eighty-six 6" pieces, in six useful sizes, of high quality, stable and flame retardant polyolefin tubing. Shrinks to half original size when heated. Sizes from 3/16"-1" wide. Black.

#5000 \$32.00

HEAT SHRINK TUBING KIT

Handy kits that contain every size shrinkwrap you need. Has over 100, 4" long pieces from 1/16"-3/8" diameter.

#4972 \$17.00

TRAVEL-SIZE DIELECTRIC GREASE

For all electrical connections. Non-conducting corrosion prevention that protects from moisture, salt and dirt. Use on battery terminals, switches, spark plug boots and fuses. Resealable .33 oz tube. 3.5"×1".

#2980 \$7.00

MINI CONTINUITY TESTER

Broken Wire? Bad bulb? Loose connection? Find it fast with this. Insulated Alligator clip and shielded indicator bulb. Uses one AAA battery (not included). 4"×5".

#2560 \$15.00

AUTO CIRCUIT TESTER

Diagnosing electrical gremlins is much more manageable with this handy circuit tester. Perfect for finding a break in any 6V, 12V or 24V circuit. Attached to the clear handle is a stainless steel probe ready to test bare wires, terminals or connectors. Heavy duty alligator clip is attached to tough, flexible wire. Illuminating handle light indicates live circuit between two points.

#2968 \$17.00

2500° PEN-TORCH

Unlimited uses. From soldering wires, melting or fusing plastic panels, starting campfires or barbecues, sterilizing medical tools, to thawing frozen locks are just a few of the tasks this torch will perform. Its widely adjustable throttle and instant one button piezo electronic ignition system make a precise 2500 degree flame for 30 minutes between refills. The compact size will fit easily into a first aid or tool kit. 6.3"×.8".

#2508 \$37.00

MASTER WIRING CONNECTOR KIT

This quality 120 piece selection of crimp connectors and terminals contains an ideal mix of individual items for 12V accessory wiring projects. Each metal crimp barrel is surrounded by a color coded, transparent, adhesive lined, heat-shrink tubing. When properly crimped and heated, the tubing shrinks and the adhesive flows creating a high quality environmental seal that prevents corrosion and provides excellent water and contamination resistance. These connectors provide superior protection from mechanical abuse, wire pullout and current leakage.

#4954 \$47.00

AEROSTICH SAE PANEL MOUNT CONNECTOR

Designed to simplify a regularly plugged and unplugged accessory, this panel mount pass-through installs conveniently into any panel or surface. We know riders who've installed it in the side or front of a tank or tail bag. Perfect for running electronics like GPS, MP3 player, fuzz buster... Uses standard SAE connector to pass power through any surface. Assimilates storage and power needs created by today's techno-farkle-moto-addicts. Resistance is futile...

#1106 \$24.00

AEROSTICH 92 PIECE MOLEX® CONNECTOR KIT

It's easy to create clean and durable accessory wiring connections. This kit contains a useful selection of sizes for a variety of 12V electrical applications. There are three sizes of connector blocks and pins, each of which has male and female components. Wires are crimped to the pins (soldering optional) and then the pins clip into the connector blocks which are shaped to preserve polarity. The five small connectors take 20-24 ga. wire and are ideal for things like radar detectors or tiny LED voltmeters; the four medium size connectors take 18-24 ga. wire and are suitable for things like GPSs, radio receivers and those sorts of loads; and the four large ones take 14-20 ga. wire for connecting things like grip warmers, radio transmitters or extra lights. Includes instructions and thirteen connector sets plus several extra pins in each size. (92 pieces total.)

#2688 \$47.00

STRIP & CRIMP PLIERS

This pliers' particular combination of jaw width and length, and fulcrum location make it the best we've tried for working with Molex connectors. Wire cutter gauge is adjustable with a thumb slide and the return spring locks closed for carrying. 12-24 gauge AWC wire.

#2546 \$13.00

MOLEX® PIN REMOVERS

Works a lot better than jamming a screwdriver in the hole or trying to dig the connector out with needle-nose pliers. Universal has both male and female ends. ATX is male only. 3.75", 1 oz.

ATX #2526 \$7.00

Universal #2527 \$8.00

CONNECTOR PIN TOOL

This tool is the easy way to disconnect and work with Molex, H-D and similar multi-pin electrical connectors. Removes six sizes of pins from their nylon housings.

#2576 \$13.00

POSILOCK CONNECTORS

A vibration proof reusable wire connector system that delivers a superior connection to crimping. Simple to use, only wire stripping required. Wire ends are locked between opposing cone shapes when hand tightened, resulting in a positive, strong connection. Yet connectors easily unscrew for roadside service or re-use. There are no metal parts and the internal electrical resistance is less than with crimp connectors. Color-coded bodies are super tough Nylon 66 resin. These are the ultimate reusable weather tight connectors, and a great way to wire electrical accessories.

BUTT CONNECTORS

9 qty., 18-24 ga.

#2552 \$8.00

#2553 \$8.00

NEUTRINO BLUETOOTH-LINKED 12V POWER DISTRIBUTOR AND CONTROLLER

Manage your bike's electrical system with a sophisticated intelligent device controller. The advanced technology Neutrino Black Box allows automatic programming and control of your electrical accessories, with convenient monitoring via Cockpit Controller app on your iPhone or Android device.

Program your settings to automatically turn on/off heated grips or garments when the temp hits a specified level, automatically activate lighting at sunset (it even adapts to your current location), and automatically shut down circuits if they draw too much current or your battery gets too low, all with advanced fuseless circuit protection.

The waterproof, shockproof unit installs easily and eliminates

the need for a jumble of wires and aftermarket switches, controllers and relays. Handles 60 amps over 6 circuits. Fully CANbus compatible too. Once programmed, it will function to control your devices automatically, without needing to bring your phone along. Or, pair with your mobile device for on-the-fly heading information, altitude, ambient temperature, speed, and time displays. Provides a composite view of the electrical system showing the status of all 6 circuits with real-time amperage use. And of course it's easy to manually control the 6 circuits with a glove-friendly interface.

Controller app runs in the foreground or background, so you can listen to music, get turn by turn directions, and have completely automated control of your bike's electrical accessories at all times. Makes your riding experience easier, more comfortable and safer...with or without your smart phone. More details available online at ataerostich.com/neutrino-power-distributor-and-controller-base-usb-bluetooth.html. Compact 2"x3"x.9". You can also find links to the controller app available for free download at the product page.

System w/Bluetooth & Free iPhone app #4868 \$299.00

USB Power Accessory Cable #4876 \$34.00

MINI FUSE BLOCK

Supply safe, fused power to accessory electronic devices. Uses four ¼" male blade connections for easy installation insert the best mini fuse (not included) to match the power requirements of each device. A

clear cover with insulated O-ring provides protection and a water resistant seal. 15 amps per circuit. Fits almost anywhere. Simple is good. 3.2"x1.77"x1.5".

#4758 \$10.00

"This fuse block is great. Very easy to install. Before, I had a rats nest of wires under the seat and in both side covers. I purchased 2 fuse blocks and cleared up all the wiring mess. The battery area look wrelly good now with only 2 wires to the positive post. It great if you add accessories to you bike try the mini fuse block to keep the wires in order." —Review by Ken

TERMINAL STRIPS

A reliable, compact wire connector system that lets you organize electrical accessory connections cleanly. Unlike crimp style connectors, these can be safely undone and reconnected as needed, over and over. Recessed set screws. Dead front construction. Captive wire protectors. UL rated up to 10 amps and 12awg wire. 4 pole is 0.5"x0.5"x1.5".

2 poles (not shown, .55") #2557 \$1.50

4 poles (not shown, 1.2") #2558 \$2.50

6 poles (1.8") #2559 \$4.00

4-POSITION TERMINAL BLOCK

Easily organize electrical connections with this 4 position terminal block. Molded from UL rated 94 VO Thermoplastic with tin plated brass terminals and zinc plated #6-32 steel screws. Rated to 20 amps/150 volts max. 2.16"x.88"x.41".

#4762 \$4.00

PDM60 12V POWER DISTRIBUTOR

A compact solid-state fully electronic module designed to enhance the accessory power distribution system on any motorcycle, and CAN-BUS compatible for bikes like newer the BMWs. It's got 60 amps total capacity over six circuits with a maximum draw of 15 amps per circuit. A completely solid state system, with fault detection and diagnostic LEDs, that operate faster, more efficiently and offer more reliability than fused counterparts.

The PDM60 makes it easy to add accessories such as auxiliary lighting, communications equipment and electrically heated clothing, without overloading accessory plugs or creating electrical faults. If a circuit does short, it is easily reset after the fault has been corrected, eliminating the hassles of locating, pulling and replacing blown fuses.

Simple installation with a single point connection to the battery. Fully programmable via computer, it can be reconfigured at any time – adjust the current capacity for each accessory, as well as the circuit behavior mode (inactive, always live, ignition trigger, aux trigger and ignition and/or aux trigger). The user can also set time parameters for delayed startup and deactivation. LED lights keep you posted on circuit condition and operation status. Completely waterproof and sealed to IP67 standards. A light, durable, ultra-reliable space age electronic system for all of your bike's powered accessories. Only 4" wide × 2.875" deep × .875" tall.

#4845 \$187.00

"After installing another buss bar with the blade fuses I saw a review of this in a mag and it's the one I had been looking for when I purchased the blade type. I installed this in the upper trunk of my GL1800 and ran the wires under the seat. I've used about 3 of the wires for accessories and still have some left to use. I love the resetting feature and the lights indicate which accessory I might have a problem with. Should I want to hook up something in the future the wires are already stubbed out under the seat and all I need to do is hook up a ground wire to a grounding buss I installed under the seat as well. This is the cats meow!! You'll like it too." —Review by Alan

FUZEBLOCK FZ-1 12V POWER DISTRIBUTOR

Clean power distribution for auxiliary lighting, GPS, heated gear/grips, intercom systems, audio mixers and more, minimizing space and eliminating a jumble of wires. Terminals for six devices with up to 10amps on each circuit and a maximum draw of 30 amps across all circuits. Terminals provided for devices to be switched on/off automatically with the vehicle, and for those to remain powered constantly.

Compact weather resistant design features a built-in relay and thick, durable circuit board that accepts readily available mini-buss fuses. Two spare fuse holders are also housed under the cover, which sports a write-on label for keeping track of devices, amperage and if switched or constant. Versatile, high quality easy-to-install power control. CAN-BUS compatible. 3.3"×2.5"×1.25"

#4420 \$90.00

CENTECH FUSED 12V POWER DISTRIBUTOR

Supply convenient, safe fused power for up to eight individual electronic devices, such as radios, MP3 players, GPSs and other accessories. The Centech AP1 handles up to 60 amps and allows for eight connected outputs that remain on when your bike is running, off when it's not.

The Centech AP2 version allows for five "on when running/off when not" outputs and three "always on" outputs that remain active after your bike is turned off. This is especially helpful for devices that need to remain "live" such as radio memories and some GPS units. Made using plated contacts and stainless steel hardware, with a built-in grounding system, these units are rugged and water resistant multiple accessory wiring solutions. Their compact size (3"×2.4"×1") allows for easy installation inside fairings, under saddles and in other tight spots. Lugless terminals mean you simply strip wire ends, insert, and tighten set screws. Includes fuses, all mounting hardware and complete instructions. Neat, easy and safe.

AP-1 #2549 \$55.00

AP-2 #2538 \$57.00

(AP-130R) AP-2 Wiring Harness (required for split use-function) #2539 \$37.00

PICK YOUR POWER

An overview of how these batteries compare to a traditional lead-acid battery.

TRUGEL:

- Light Weight — up to 80% less
- Fast Recharge
- Long, Maintenance Free Life — 2x Standard
- Superior Cranking Amps

BIKEMASTER TRUGEL BATTERIES

Super-high density oxide plate design combined with NanoGel Electrolyte technology increases surface area, giving superior cranking amps, quicker charging, more power, less sulphation and twice the life expectancy of traditional batteries. Strong ABS case uses special top-cap design that makes this a true maintenance free battery, completely eliminating leakage and acid spills. 12V. Cranking power range (depending on model): 110-340A depending on application. Weight: 7.7-19 lbs. Size range: 5.27"-8"×2.7"-4.8"×4.13"-6.7". Air-shippable.

ODYSSEY:

- Starved Electrolyte Technology
- High Cranking Amps
- Long Life — 2x Standard
- Extreme Temperature Tolerant

ODYSSEY DRYCELL™ BATTERIES

Advanced battery technology that works much better (and longer) than even the best conventional lead acid batteries. These batteries are more powerful and dependable. Cranking amp ratings are double to triple regular types. They have an 8 year design life, an ultra long shelf storage life and a low self-discharge rate—after sitting for months (without any trickle charge) it'll start. Deep cycle reserve power provides sufficient amps for confident starts even when 70% discharged.

Odyssey batteries have superior vibration resistance, a tough ABS case, and are lighter, too. Air shippable and non-spillable "starved-electrolyte" design. Works right out of the box with no charging needed. The California Highway Patrol use these batteries because with the engine off they must run their flashing lights and radios. 12V 14Ah. Cranking power range (depending on model): 100-380A. Weight: 6-26 lbs. Size range: 5.43"-7.27"×3.11"-7.05"×3.98"×6.67".

Post Adapter for PC680 #4991 \$17.00
SAE Terminals for PC545, PC680, PC925 #2613 \$17.00

SHORAI LITHIUM-IRON:

- Ultra-Lightweight — up to 80% less
- Up to 4x the Service Life
- Faster Cranking and Recharge Rates
- Hold Charge for 1 Year — Maintenance Free

For model/fit applications, see charts at aerostich.com/batteries.

SHORAI ULTRALIGHT LITHIUM BATTERIES

Drop weight. Lithium technology with a tough carbon-fiber composite cases made these next-generation lithium-iron batteries weigh an astonishing 70-80% less than a lead acid battery. These advanced batteries recharge quicker than a conventional battery and hold a charge for an entire year without maintenance and with zero sulfation.

Environmentally friendly too with no explosive gasses during charging, no lead and no acid, just discharge and dispose when it reaches the end of a long service life (up to four times the life of a lead-acid battery). 12V 14-27Ah. Cranking power range (depending on model): 210-405A. Weight: 1.68-3.85 lbs. Size range: 5.83"-6.55"×2.6"-3.39"×3.46"-5.51".

SELF-TAPPING CARBIDE TIRE STUDS

Low-budget sheet metal screws bite fine into ice but grind away quick on paved surfaces. These sharp low-profile stud tips are made of corrosion-proof, super hard, abrasion-resistant tungsten carbide, ingeniously designed to allow most of the tire's rubber to stay in contact with clear pavement while providing increased traction over mixed snow or ice.

The best part is they're simple to install—the studs self-tap with the included bit that fits any power drill. Just mark your tire, screw in each one and you're ready to ride. Each set comes with an installation bit, instructions and 100 studs (50 per tire). More info on website.

Low Profile A (8.7×12.8mm) #4706 \$109.00

Low Profile B (8.8×15.7mm) #4707 \$109.00

Low Profile C (9×16mm) #4708 \$109.00

Off-Road D (9×17.4mm) #4714 \$109.00

Scooter A (6×8mm) #4719 \$109.00

Scooter B (7.9×9.3mm) #4720 \$109.00

Warning: Studded tires may not be legal in some jurisdictions. Check local laws.
Warning: Maximum studded tire grip on dry or wet pavement is reduced compared to non-studded tires. Ride with care while learning the capabilities of studded tires.

Photo: Amy Nystrom knows her studs. (2011)

TIRE STUDDING...

Tires provide traction/friction because at a microscopic level their surface deforms slightly to interlock with irregularities in a road's surface. Over-simplistically, in cold weather tire rubber gets harder so there's less interlocking going on, which means less traction/friction. "All-season" auto tires typically are made from slightly softer rubber to compensate.

When a stud is added to a tire for winter street riding, it needs to be short enough to allow the weight of the vehicle to press as much of the tire's rubber surface surrounding each stud against the road. If the stud is too long this will not happen and one ends up riding on the tips of the studs only — and this is very bad. There is almost no traction between the carbide tips of the studs and the road surface.

Continue reading at aerostich.com/self-tapping-carbide-tire-studs.html »

UNIVERSAL SNOW CLAWS

Seriously. All-weather riding brought to the next level with these easy to attach quick change snow claws. Add extra traction for riding in slippery conditions including snow, ice, sand, gravel or mud. Low profile design installs to any open rim tires. Rugged V2A steel constructed claws measure 8mm high, allowing clearance for use on most bikes. Easily secure to wheel with 1.5mm straps. Set of 5 claws. Not for long distance high-speed use. Hard core.

#5077 \$150.00

COMPACT WORK STAND ADVANTAGES

This lightweight work stands is an easy way to get most motorcycles up off the ground, at a far lower cost, and with several hundred pounds less weight, than the commercial-style electric/hydraulic work stands.

If you've never used a stand you won't believe how elevating a motorcycle only this much (about a foot) makes working so much easier. Doesn't matter what you need to do, everything is better. And when the work is done the stand is lightweight enough to be simply picked up and stored out of the way until needed again.

The crate-width service platform is made of strong aluminum diamond plate, with welded corners, and is easy for one person to move around.

Along with a simple scissor jack, it makes doing tire and fluid changes a lot easier than doing these jobs on the floor.

Besides storing away in almost no space, if you've got the inclination to keep your bike inside of your home somewhere to view off-season, elevating it for display like this improves the 'art of the machine' viewing tremendously.

AEROSTICH ALUMINUM WHEEL CRATE WORKSTAND

A much easier, better and more comfortable way to work on your bike. Perfect for all bikes up to 500lbs, which means most models less than 800cc, and all supersports sport-bikes, commuters, light touring bikes, etc. The ramp-and-crate system assembles easily using three heavy-duty industrial/commercial dairy crates (not lightweight department store storage boxes) to raise your bike 11". This makes any job a lot more comfortable.

Temporarily transform any space into a motorcycle workshop — elevate the work. You'll never go back to working on the ground again. Everything goes more smoothly when your work is slightly up and off the ground, from tune-ups to easier access for oil draining and tire changes.

When in use it's super-stable, and after the job is done, pick it up and lean against the wall — out of the way until it's needed again. Also great for displays, detailing and cleaning. Includes complete set-up and use instructions. Dimensions (set-up) 116.5"×48"×20". Aluminum. 25 lbs. Three Wheel Crates required (but not included). 

Three-Crate Workstand #4855 \$247.00 (Add \$20.00 for shipping)
Wheel Crate #3585 \$15.00

WATCH THE VIDEO AT AEROSTICH.COM

"I picked this up recently but have used it a lot already. I own a couple different Harbor Freight stands, the kind that use a jack to lift up the bike from beneath. I had considered getting a table lift, but this proved impossible to store or move around my tight garage. This proved an ideal compromise. It lifts the bike high, holds it secure, stores easily and is light and easy to use. I just used it to complete a big bore kit on a dirt bike I own. The weight limit means anything much bigger than an SV650 will go beyond it's approve use. So, Goldwing owners need not apply. Anyhow, it's a simple, easy to use easy to store stand that makes work a great deal simpler." — Review by Adam

WHEEL CRATE

If you don't already have some heavy-duty milk crates from your local dairy laying around, these are industrial/commercial grade and work perfectly. 13"×13"×10.9", 2.5 lbs.

#3585 \$15.00

ANCRA CLASSIC TIEDOWNS

Use these to strap down a bike, secure a load or dozens of other uses. Each durable and weather-resistant 5.5 foot nylon web strap is rated to 1200 lbs. Easy to use and adjust cam-lever buckle stays securely locked. Sold in pairs. Black, Blue.

#2781 \$27.00

MOTION PRO T-6 CHAIN BREAK AND PRESS TOOL

For breaking chains and pressing on master link side plates. Includes press and side plates. Will push link pin completely through link/side plate. Handle detaches for compact storage. Made of high-strength aluminum and chrome-molybdenum (well educated steel). A really nice tool. Fits 520–530 size chains. 5.5"×4.75"×1", 10.4 oz.

#4649 \$77.00

RK EXCEL CHAIN BREAK AND PRESS KIT

The Best. Comes with everything needed to break, rivet and flare endless chain pins. Kit includes detailed, photo-illustrated instructions. This one is popular with both shops and race teams. Very nicely made. Fits 520–532 size chains. 5.5"×4.75"×1", 6 oz.

#2589 \$123.00

MASTER LINK PRESS TOOL

This small, lightweight tool is a big help when it comes to replacing or maintaining your chain. Easily presses on and off master link plates for clip style chains. Lightweight billet aluminum construction with hardened steel pins for years of reliable use. Will not damage master links up to 24.8mm link width. Works on most 50 series chains, however it is not intended for use breaking rivet master links (but there are other tools for that). Use with a 6mm and 10mm hex wrench. 2"×3"×1.5".

#6091 \$32.00

MINI CHAIN BREAKER & PRESS

If you've ever needed to get an endless drive chain apart, you know it takes a specialized tool to drive the sometimes quite stubborn pin out after you've ground the top away.

Featuring a chrome-moly body and a folding handle for easy storage, the Mini Chain Breaker belongs in any mechanics toolbox. Handles 420, 428, 520, 530, and some 630 chains, which pretty much covers whatever you may run into. Capable of pushing a link pin completely through the connecting link, the replaceable drive pin is heat-treated and very tough. Add the Mini Chain Press for pressing on pressfit side plates. These tools are small and light enough to carry on trips yet tough enough to do the job and get you rolling again if you must do an emergency chain-ectomy somewhere that's nasty. Press fits all 520–530 size chains. Breaker is 4.5"×1.5"×1", 11.2 oz. Press is 2.25"×1.5"×1", 7.3 oz.

Breaker #4513 \$28.00

Press #4512 \$13.00

Both (Breaker & Press) **SAVE \$5.00** #4514 \$37.00

PBR CHAIN TOOL

A small tool with big performance, the versatile design will remove chain pins, press master-link plates and rivet hollow nose & soft nose (quad stake) master link pins on O-ring and non O-ring type chains. Easy to use and convenient to store in the included protective plastic case. All steel construction for strength and durability. Versatile for use in your garage or workshop and compact and light enough to stash in a tool kit for roadside repairs.

#5093 \$78.00

LEATHERMAN MULTI-TOOLS

If you bought a Leatherman when they were first introduced in 1983, we're sorry to tell you your 25 year warranty has expired. The good news is that these tools are constantly evolving, and we have sorted through the choices to present two most suited to carrying along. Both sport the following features: Needlenose and regular pliers, knife, wire cutters, wire stripper, screwdriver, bottle opener, can opener, 8 in/ 19cm ruler, lanyard ring, sheath, and yes...another 25 year warranty. Check out the additional details listed below to help choose the one right for your next ride.

SIDEKICK

Similar to the standard Leatherman®, but lighter and better. The screwdriver blades now incorporate a new design helping them to stay open better during use. Built entirely of stainless steel, the Kick has all the quality you'd expect from a tool made by this innovative company. Features a spring-action needlenose pliers, wire cutters, wire stripper, 2.6" long clip-point knife and serrated knife, slotted and Phillips screwdrivers, ruler, bottle opener, can opener, and lanyard attachment. Convenient outside-accessible blades allow one-hand opening. Folded length: 3.8", 7 oz.

#3671 \$57.00

* Call 800-222-1994 for latest/best price.

CHARGE+ TTI

This is your ultimate, be prepared, all-in-one tool to fix just about anything, anywhere and any time. All the most requested features and the best materials combined into a super-functional multi-tool with serious performance. Premium comfort-sculpted titanium handle make it lightweight and strong. A 2.9" S30V® stainless steel locking clip-point knife headlines the list of useful tools, which also includes: needlenose pliers, replaceable wire cutters, crimper, wire stripper, saw, files, screwdrivers and double-ended bit kit with a wide range of sizes, serrated blade, ruler, can opener, bottle opener, scissors and more. 19+ tools in all, ready to take on almost any task. Includes over a dozen accessory bits, Allens, Torx, etc. Closed length 4". 8.9 oz.

#4973 \$169.00

* Call 800-222-1994 for latest/best price.

SWISS TOOL SPIRIT XC PLUS RATCHET

A light, yet rugged, multi-tool and more with 38 functions, plus a ratchet and bit holder, this quality, compact Stainless Steel Swiss implement offers big performance on and off the road. Open the handles to unleash the useful needle-nose pliers, with integrated hard and soft wire cutters. Stored within the handle are 10 individual utensils, including a file, can/bottle openers, saw, chisel, serrated blade, awl and screwdrivers. Razor sharp scissors and knife blades make easy work of any cutting needs. Locking mechanism securely hold tools in place, and lock release operates easily, even with a gloved hand. Inside the leather belt pouch are additional tools, including a mini-ratchet with an extension and 6 hardened steel bits, a corkscrew and jewelry screwdriver. Closed length 4". Weight 13.1 oz.

#2584 \$140.00

* Call 800-222-1994 for latest/best price.

REACTOR MULTI-TOOL

Housing a total of 10 components including a hard-cased, black coated, stainless steel assisted blade and powerful Compound Leverage geared pliers, the Reactor proves to be a great folding knife and multi-tool. A quick push of the thumb stud propels the 2.5" blade open and ready for action. Fits firmly and securely in a hand.

Tucking the blade back in and flipping the handle reveals the patented Compound Leverage pliers. The SOG-exclusive gearing doubles the grasping force of the jaws for more powerful grip and to reduce stripped hardware. Also includes bottle opener, wire cutter, flat and phillips screwdrivers, crimper, 1/4" hex bit driver, needle nos pliers, pocket clip and lanyard hole. Closed length 3.8", overall length 6.3" 4.1 oz.

LEATHERMAN SIGNAL

Traditional functional tools pair with new survival preparedness features like a shaped diamond coated sharpener for maintaining your straight and serrated blade, fire-starting ferro rod, and an emergency whistle. With a total of 19 everyday useful individual implements like a 2.73" 420HC Stainless Steel high-carbon blade, needlenose pliers, wire cutter/stripper, saw, hammer, awl, and can/bottle opener, this multi-tool offers solutions to any number of needs. The 1/4" and 3/16" Box wrenches, 1/4" Hex bit driver and screwdriver tips handle many repair needs too. Nylon sheath included. Closed length 4.5". Weight 7.5 oz.

SCIXORS PLUS

A fully-functional scissor based multi-tool, with all the essentials including bottle opener, large and small screwdrivers, straight and serrated cutting edges. Clips neatly alongside your keys and is ready for use by simply pulling the quick release pin. Rugged 422 grade stainless steel construction. 3"x.7"x.4".

#4882 \$15.00

KEYTOOL

Wraps neatly around your key and rotates 180° to give you quick, easy access to eight essential tools. High quality 420 grade stainless steel body includes bottle opener, nail file, thread cutter, 3 screwdrivers (including one for eyeglasses), and tweezers. Quick release clip for easy access and use. 2.8"x.9"x.2".

#4883 \$11.00

NAILCLIP KIT

Compact keyring size nail clippers and much more. Sharp and strong clippers spring out from the ergonomically shaped stainless steel body, which also houses a knife, nail file, flat head screw driver and scissors. 2.2"x.6"x.35" (closed).

#4884 \$11.00

MINI DRIVER

A small package that is ready to play many versatile roles (not the actress who's name is similar). 4 screwdriver heads – both small and large Phillips and flat screwdrivers. Simply remove the quick release clip, and slide a key or coin into the slotted end to add torque so you can undo/do up the toughest of screws. Extra bits store discreetly in the driver body. Chromium plated steel with anti-slip grooves on main body for better control. 3.1"x.6"x.4".

#4887 \$11.00

CASHSTASH

Never be caught without cash with this emergency money stash capsule on your keyring. Cash-clip secures one note of any currency on your keyring, rolled up small, waterproof and secure in the inconspicuous screw-top aircraft grade aluminum tube. Fits all single note currencies. 10Mm split key ring attachment included. 1.8"x.6"x.6".

#4893 \$11.00

TELEPEN

Engineered from stainless steel and measuring only 2", this compact ball-point pen extends telescopically to 4.5" with one quick pull. Keychain cap keeps it handy everywhere you go. Includes 3 black ink refills. 2" to 4.5"x.2"x.2".

#4892 \$14.00

SWISS-TECH UTILI-KEYS

Cleverly masquerading as a key, this little device clips onto your key ring and contains a plethora of tools in a very compact format. The 6-in-1 features a straight/serrated blade, three screwdrivers and a bottle opener. Opens a full 180°. Only 2.75" long when closed. So unobtrusive you may forget you have one with you. TSA ok.

6-in-1 #3547 \$9.00

6-IN-1

FIRE STASH

A waterproof key-ring canister housing a fully working lighter that is ready to ignite at your command. Attach to your key-ring for essential outdoor use. Refill with standard lighter fuel. 1.8"x.6"x.6".

#4888 \$15.00

MICROTOOL

A fully functional set of keyring tools crammed into a tiny 1.75 inch frame. This one features 6 fully functional essentials - super sharp scissors and knife, bottle opener, screwdriver, file and nail cleaner. 1.75"x.4"x.4".

#4889 \$10.00

TITANIUM KEY CARABINER

Individually cut from a solid sheet of Grade 5 Titanium using precision EDM technology. Innovative unibody design allows keys to be

quickly and easily moved on and off through the super-secure double gates. Each piece is acid washed, then hand ground to a classic brushed finished. Strong, functional and easy to use, with quality and durability to last a lifetime. Choose teardrop or bottle opener version. 2.1"x1.2"x.15".

#4419 \$40.00

FIXR UTILITY TOOL

An easy, portable, compact and highly functional every-day-carry tool. Built-in quick-release clip easily attaches to a key ring, belt loop or tankbag D-ring, or is small enough to store inconspicuously in any pocket. Over 20 functions, including bottle opener, cutting blade, pry bar, nail file, wire stripper, box opener, flat screwdrivers, Phillips drivers, spoke wrench, ruler and 1/4", 5/16", 3/8", 1/2" and 9/16" wrenches. Rugged 420 grade black stainless steel construction with a 180° rotating gold titanium coated tool disc. Leather carrying pouch included. 3.25"x1"x.33".

#4874 \$15.00

CAMSURE TIE-DOWN STRAPS

The ease-of-use of a cam strap combined with the security of a ratchet-type strap, this unique design simply works better than any strap you've ever used before. Secure a bike for transport, to a work-stand for maintenance or ensure cargo will stay put, this heavy-duty strap employs a proprietary clamping mechanism and secure vinyl-coated latch hooks. Manufactured on the USA with high quality powder-coated steel and rugged 1.5" wide x 5'5" long double stitched nylon webbing, rated to 6000 lbs. Working load limit 500 lbs. Sold individually.

#2915 \$49.00

LOCKSTRAPS TIEDOWNS

No other tiedown strap has a full length steel cable to prevent theft, plus the added security of dual locking combo carabiners to keep your load firmly in place. Soft tie extensions remove any worry about scratching paint or plastics. 8.5' long straps with a 1200 lb. load capacity. Sold individually.

#4838 \$43.00

CLEAN FUNNEL

Take the mess out of changing oil or transferring fluids. Screw-on caps at both ends keep the inside clean. Blue, 1.0 pint polyethylene funnel is 8.5" long.

#2914 \$7.00

AMSOIL SEVERE GEAR LUBE

Synthetic extreme pressure lubricant, engineered for high-demand high-temp applications. Superior protection for gears and bearings against scoring and wear in all riding conditions and climates. Outperforms all conventional gear oils and ensures your ride runs better and lasts longer. 1 quart. 

Severe Gear 75W-90 Lube #4808

AMSOIL MOTORCYCLE ENGINE OIL

Advanced synthetic formula for both domestic and imported motorcycles, designed to provide the absolute best lubrication. Reduces friction, heat and wear and is specially formulated to excel in all areas unique to motorcycles, including high engine RPM, wet clutch lubrication, and extreme pressure regions of gears. 10W-40 is recommended for liquid or air-cooled

high-performance 4-stroke engines and is wet-clutch compatible. 20W-50 is excellent in air-cooled engines due to higher thermal range and can also be used in transmissions and primary chaincases. Note: These products are not recommended where API GL-4 or GL-5 gear oil is required. 1 quart. 

10W-40 MC Oil #4806

20W-50 MC Oil #4807

For current prices call 800-222-1994.

RARE EARTH MAGNETIC OIL DRAIN PLUGS

Strong Neodymium magnet is integrated into the end of the drainplug. Captures any metallic particles found in your engine's oil, even very fine

contaminants that pass through an oil filters mesh layers – the stronger the magnet, the cleaner the oil. Protects and extends the life of your motorcycle engine. Maintains effectiveness at up to 300° F. Manufactured in USA. Available in 8 sizes to fit most makes and models of motorcycles. Choose: M12x1.25x19, M12x1.5x12, M14x1.25x12, M14x1.25x16, M14x1.5x12, M14x1.5x16, M24x2.0x14

#5091 \$35.00

OIL RECYCLER DRAIN PAN

Changing the oil in your scooter is faster and neater with this low profile oil drain pan-container combo. Ultra low profile slides under the bike and the extra large, no-splash funnel screws into the neck during use and then snaps into the side of the rugged, recycled polyethylene body for storage.

When the job is finished this lets you tidily drop your bike's used oil at any dealer, garage or service station for recycling. Good clean fun. 7qt (6L) or 12.5qt (12L) sizes.

7 Quart Drain Pan #4878 \$24.00

12.5 Quart Drain Pan #4879 \$27.00

"This pan works great for changing the oil in my Versys 650. I like the fact that the oil flows through the funnel attachment and into the storage container. This method means that the only part of the container that gets messy is the funnel, which can be easily cleaned and snapped into the container for storage. I do not have a garage and store everything in a utility closet. If the snow gets too deep, I park my bike in my foyer. I had plenty of clearance getting this under my Versys, but if you have very limited ground clearance it may not work. It is perfect for me. It allows me to change the oil without making a mess and it allows me to store my used oil (cleanly) until I get around to taking it to my local parts store. I highly recommend." —Review by Ben

BONDIC LIQUID ADHESIVE

This incredible adhesive is a 100% water proof and heat resistant tool. A solvent free formula stays liquid until cured with the included UV LED Light. Dries clear, solid and creates a permanent bond to build, fix and fill virtually anything in seconds. Works on plastic, wood, metal, PVC, steel, rubber, wiring, ceramic, figurines, vinyl, Kevlar, polypropylene, leather and so much more. Simple 4-step process (clean, fill, cure and shape) to fix almost anything. Starter Kit includes applicator, LED UV light and tube of liquid plastic.

Starter Kit (4 grams) #5010 \$21.00

4 gram Refill Cartridge #5023 \$12.00

Replacement LED Light #5024 \$12.00

MINI DUCT TAPE

We all know of the limitless repair possibilities with the hallowed material known as duct tape, problem is, it comes on really large spools and is pretty clunky to pack and have around when you need it. These mini duct tape rolls are the real thing, on much smaller diameter, weather-resistant plastic spindles. Handy, and at times, indispensable. Classic grey. Two 2"×50" rolls, 3.2 oz.

#756 \$6.00

TENACIOUS TAPE

This clear matte-surfaced tape provides fast, long lasting repairs on fabrics, vinyl, rubber, plastic, aluminum, etc. Its adhesive is far more aggressive than Duct Tape and yet removes without leaving a sticky residue. Waterproof and UV stabilized. Perfect for all kinds of emergencies (It's even been used as an emergency inner tube patch...though not recommended). 3"×20", 1oz.

#770 \$5.00

SILICONE TAPE

Same stuff as X-Treme Tape, but more of it in a bunch of colors, which can be handy and pretty. Stays flexible. Self bonding. Non-conductive. Six 1"×10' rolls. Red, yellow, green, gray, white and clear. 8.4 oz.

#4940 \$24.00

X-TREME SILICONE TAPE

Originally developed for the military, this high quality self-bonding silicone wrap forms a permanent non-conductive, air and watertight insulating seal which stays flexible and won't crack or melt in temperatures from -60° to +500°F. It can be removed and won't leave a sticky residue like electrical tape. A great coolant hose patch, electric insulator or tool handle wrap. One 1"×10.5" roll, 2.0 oz.

#4558 \$7.00

TEAR AID HIGH-STRENGTH VINYL PATCHES

This stuff repairs holes and rips on pretty much anything, including rubber, neoprene, plastic, steel, fiberglass, etc. No messy adhesives—simply peel & stick. Resists UV rays and won't turn gummy in high heat, or brittle in the cold. Stretchy. Includes a couple of alcohol prep pads. 3"×5' roll. Specify type: "B" for vinyl, or "A" for all other materials.

#4653 \$24.00

INDUSTRIAL DOUBLE STICK TAPE

Amazingly aggressive sticky tape! Extremely sticky adhesive that replaces all other double sided mounting tapes and fixatives. Non-hardening and permanently flexible. Holds incredibly strong. Yet easily removed when no longer needed and leaves no residue behind. Industrial strength technology developed for the automotive and movie industries, but re-engineered for consumer use. Comes in a very cool metal tin, about the size of a hockey puck, that is kind of old timey and will be of use long after the tape is gone. .5" wide × 20' long.

#4741 \$23.00

BARGE CEMENT

Odd of name and unusual in its effectiveness, Barge cement is a powerful contact-type cement that is a traditional cobbler's staple. So it's great for sticking soles back on boots, and just about anywhere else two flat surfaces need to be re-connected in a durable, weatherproof manner. Great stuff. 2 oz. Tube.

#758 \$7.00

QUIKSTEEL EPOXY

Wonderful stuff. Especially if your gas tank or crankcase has had its integrity compromised miles from anywhere. A high strength epoxy that activates when kneaded, it goes from putty to steel-hard in 15 minutes. Contained in a plastic tube. An inexpensive, high-tech material that takes up no room and could be a real ride-saver. 4.1"×1.1" 2.2 oz.

#759 \$6.00

QUIKALUMINUM EPOXY

When you're miles from nowhere, this stuff is a blessing for emergency repairs on all aluminum parts, such as broken clutch levers, mounts, etc. Whatever your misfortune, this kneadable, quick-curing-to-rock-hard putty will get you back on the road home or to the nearest repair shop. 7"×1.1" 4 oz.

#4559 \$7.00

J-B STIK WELD

A hand kneadable, steel-reinforced epoxy putty adhesive/sealant that will plug holes and make permanent repairs on wet and dry surfaces. It can be drilled, sanded, filed, tapped, machined, and painted. This Herculean-strong putty cures in 20–30 minutes, even while completely submerged under water or gasoline(!). Just pinch off as much as you need. 2 oz.

#4961 \$6.00

NOVUS POLISHES

Handy for removing that annoying scratch that is right in the exact spot your eye wants to

look though. No. 1 cleans, shines, and protects all plastics. No. 2 removes fine scratches from most plastics. No. 3 removes heavy scratches from most acrylics.

No. 1 (2 oz. Bottle) #3553 \$5.00

No. 2 (2 oz. Bottle) #3554 \$5.00

No. 3 (2 oz. Bottle) #3555 \$6.00

All 3 Polishes SAVE \$3.00 (Three 2oz. Bottles) #3556 \$13.00

SIMICHROME POLISH

Simply the finest all-metal polishing paste anywhere! Excellent for aluminum, chrome, steel and other metal surfaces. Produces a rich, brilliant shine on any uncoated metal surface. Leaves an invisible, protective coating to prevent tarnish and help keep the shine longer. 1.76 oz.

#2700 \$13.00

SCRUBS

Deep cleaning, antibacterial Scrubs remove grease and grime from the dirtiest hands with powerful cleaning agents in a non-scratching, non-abrasive, disposable hand towel. Keep one or two on your bike and a few with your tools, so that

the next time you are stuck fixing something dirty you can clean up afterward...which can be almost as satisfying as being able to fix the problem in the first place.

Pack of 5 (Individual Single Use Packets)

#4565 \$3.00

PROTECT ALL SURFACE CARE

Simply the best of the "all-in-one" cleaner, wax and polish products. Great on paint, chrome, fiberglass, Plexiglas windscreens, helmets and visors, leather and more. Advanced non-abrasive formula is easy to apply, dries clear and finishes with a fresh lemony scent. Polishes to a lustrous showroom shine and protects with Carnauba Wax and UV blocker. Beautifies all surfaces quicker and easier than ever thought possible. Incredible on helmet face shields and windshields. A long-time favorite. 16 fl. oz. spray bottle.

16 fl. oz. Spray Bottle #4796 \$17.00

PLASTEX REPAIR KIT

Powerful and stinky stuff that will repair plastics in tough situations. You get two components; a powdered gap-filling material and an aggressive solvent that fuses the whole works together for an effective bond. Plastex is particularly handy for dealing with the enchantingly brittle "plastic" often found on faired motorcycles. Not to mention those little tabs that like to break off...Sticks to just about anything short of polypropylene or polyethylene. An effective and permanent repair product. Clear. 10 mL.

#4576 \$30.00

MOTO SURFACE WASH & DEGREASER

These cleaners are designed to work better for cleaning your motorcycle than the all-purpose spray cleaners found in grocery stores (Simple Green, etc...). Non-corrosive and biodegradable formulas are safe to use on aluminum, painted and all other surfaces and won't leave residue stains like some motorcycle cleaners. The Cycle Wash is strong enough to be truly effective, but mild and safe on your bike's finish. Not a degreaser, but powerful enough to remove bugs, dirt and road grime with a secret spray-on, rinse-off, no-scrub formula. It's also more cost-effective...about a third less than imported cleaners.

The industrial strength Bike Degreaser/Wash formula is specifically made for cleaning and degreasing. This stuff can safely be used on plastic, paint, aluminum, vinyl, rubber, fiberglass, battery terminals, and surfaces of all types. Removes grease, bugs, dirt and grime better than any of the competitors. Applies easily with adjustable trigger sprayer. Made with an earth friendly blend of water soluble surfactants, both non-abrasive and biodegradable. Less harmful than a pressure washer. Less work than a soapy bucket. Faster too.

Bike Degreaser #5096 9.00

Cycle Wash #5097 \$7.00

TWINMAX CARB AND INJECTOR SYNCHRONIZER

A step beyond commonplace mercury 'carb sticks', this device sports digital accuracy and no moving springs or diaphragms. Powered by an included 9 volt battery, the TwinMax is suitable for both carbureted and fuel-injected engines of 2, 3, or 4 cylinders. A very easy to use and useful shop tool that you'll have fun with the first time you use it. 4.25"×3"×1.5". For bikes without vacuum synch ports one 5mm threaded adapter per cylinder is required.

#4543 \$107.00

Adapter (each) #4572 \$7.00

ADAPTER

EZ BRAKE BLEEDER

Ensures that you'll get ALL the air out of a clutch or brake system by allowing you to inject clean fluid into the bleeder valve, thus forcing air upstream where it bubbles out the master cylinder. Includes bleeder valve adapters, a fitting for bench bleeding master cylinders, storage container and easy to follow instructions. 

#4979 \$24.00

CLAMPTITE TOOL

A nifty tool with a veritable googolplex of uses that no gear kit should be without. Use it for a fix on almost anything that's loose or broken: a blown hose, a loose/cracked fender, etc. Wraps stainless steel wire into a tight hose-type clamp. When you're miles from nowhere, and the unexpected happens, you'll be glad you've got one of these. Small, strong, easy to use and takes up hardly any space. Includes great instructions. 4.75"×7", 3.6 oz. 

Clamptite Tool #4913 \$77.00

Wire (.041 Stainless Steel, 50 ft.)

#4921 \$17.00

SPEED BLEEDER

Bleed your own brakes reliably and inexpensively. This ingenious bleeder screw uses a patented valve enabling you to get the job done correctly without the aid of a helper. Call or see website to match the right bleeder for your bike. Generally, Yamahas and Hondas use #4967, Suzukis use #4969, Kawasakis #4968,

BMW's before 1996 #4964, 1996 BMW's and after #4964 (front) & #4970 (rear), Ducatis #4964, and Moto Guzzis #4964 or #4967.

M6×1.0/1.13"* #4970 \$13.00

M7×1.0/1.19"* #4968 \$13.00

M7×1.0/1.38"* #4969 \$13.00

M8×1.25/1.28"* #4967 \$13.00

M10×1.0/1.28"* #4964 \$13.00

*(Thread Pitch / Overall Length). Thread pitch is designated by the major thread diameter followed by the number of threads per millimeter. Ex: the thread pitch 'M6×1.0' is 6mm in diameter and has 1 thread per millimeter.

GAS LINE QUICK-CONNECT

This is a neat way to get the gas tank off quickly without yanking fuel lines off of carbs or petcocks or wrestling with hose clamps. The o-ring gas line connectors are also rated ok for use on fuel injected motorcycles. Can also make refueling your multi-fuel camping stove less messy. Has a Viton ring for dependable sealing and will withstand all types of fuel, due to its construction of high-tech nylon.

1/4" (ID Fuel Line) #3572 \$16.00

5/16" (ID Fuel Line) #3573 \$16.00

VALVE CLEARANCE ADJUSTABLE WRENCHES

Set of 3 hex wrench sizes, 8, 9 & 10mm plus 3 interchangeable adjustment heads (3 & 4mm square, plus straight blade), to give you nine different combinations to cover adjustments for most bikes. Made from heat treated hardened steel with color coded non-slip handles for easy use and recognition.

#2886 \$37.00

TAPPET CLEARANCE FEELER GAUGES

These allow you to set tappet clearance adjustments quickly and easily. Angled blade for easy access to tappets. Set contains .002-.003, .004-.005 and .006-.008 feeler gauges.

#4922 \$27.00

CORROSION PROTECTANT AND WATERPROOF LUBRICANT

Going beyond the stuff available at the hardware store, Boeshield was developed by aviation industry giant Boeing as a protective coating that penetrates deeply into fasteners and fixtures, displaces moisture and attacks corrosion, and then dries to a clean waxy film. Not only that, but it will help loosen rusted parts and will not harm paints, plastics, or vinyl. Useful for all the places you'd use more pedestrian formulations like clutch cables, pivots and linkages, and even battery terminals and other wiring that may be exposed to the elements. Good stuff. 4 oz. 

 Liquid #4574 \$10.00

 Aerosol #4575 \$10.00

9-PIECE TORX WRENCH SETS

Made with precision machined chrome vanadium tool steel for a perfect fit. The L-Torx has an extra long reach to access obscured bolts easily and provide more torque. The S-Torx is a shorter version for accessing tight spaces. Both feature a bead blasted surface for better grip and corrosion-resistant coating backed by a manufacturers lifetime warranty. Sizes T10, T15, T20, T25, T27, T40, T45 and T50.

L-Torx #2790 \$27.00

S-Torx #2791 \$27.00

METRIC HEX KEY WRENCH SET

Compact metal handle holds set of six hardened alloy steel hex key wrenches. Fold closed for compact storage with knife style opening and easy access to the right sized tool. Metric wrench sizes 2.5, 3.0, 4.0, 5.0, 6.0, 8.0mm. 8.8 oz.

#2969 \$19.00

METRIC BALL END HEX KEY SET

A nice, black chrome-vanadium set of Allen wrenches that won't turn into rusty, corroded relics in your gear bag or garage. Ball end allows for better access in tight places. Set of nine (1.5, 2, 2.5, 3, 4, 5, 6, 8 & 10 mm). Holder included. 12.7 oz.

#4911 \$17.00

CABLE LUBER KIT

Designed for use with aerosol lubricants, this device has the capacity to lubricate cables from 3/16" to 3/8" diameter which should cover just about anything. The Cable Luber Kit includes lube that is specially formulated to minimize friction in control cables. Not only will this device keep your cables lasting longer, it makes riding less effort. Belongs in everybody's toolbox.

Cable Luber (without Lube) #4528 \$20.00

 Cable Luber Kit (with Lube) #4527 \$25.00

FIX IT STICKS

Small, portable multi-tools with the versatility of their full-sized counterparts. Modular design allows for a flat, compact carry with snap together T-wrench functionality when needed.

The more compact **Replaceables** tool uses two interlocking steel body pieces that provide excellent leverage and accept any 1/4" bit. Includes 8 interchangeable bits (2mm, 2.5mm, 3mm, 4mm, 5mm, 6mm Hex, Torz 25 & Phillips #2), which are held securely in place with strong neodymium magnets. A great on-the-road repair tool.

The **T-way** Wrench features a durable, dedicated T-handle design that is perfect for heavy-duty shop-use, but light and portable enough to bring on the road. With replaceable bits on three ends, amazing leverage, and exceptional reach, this is one tool will meet many repair needs. Includes 7 interchangeable 1/4" bits (2mm, 2.5mm, 3mm, 4mm, 5mm, 6mm Hex, Torx 25), all securely held in place by magnets.

Replaceables #2201 \$37.00
T-Way Wrench #2202 \$30.00

MP TOOL

This compact, durable wonder will solve any number of fastener issues when you are a long ways from your roll-around toolbox. Fits 8, 10, 12, and 14mm bolts, #2 and #3 Phillips screws, small and medium flat head screws, and a reversible 1/4" and 3/8" adapter for the included 10 and 12mm sockets. Sturdy and very compact. 5."×2.75"×1.5", 12.6 oz.

#3527 \$57.00

VERSATOOL

A compact, sturdy, stainless steel foldable wrench for low or high torque applications. Equipped with a 1/4" drive, so you can use your favorite sockets and extensions. Includes a hex-tool adapter and extension, and an eleven bit holder containing flat, Phillips, and Allen drivers. Everything travels in a zippered nylon storage case. 4.25"×3.25"×0.5", 6.9 oz.

#4618 \$14.00

METRIC MINI T-HANDLE SET

Compact for use in tight spaces, this is a versatile and easy to carry tool set. Use the T-handle drive for maximum leverage and the shaft drive end for quicker bolt installation/removal. The 1/4" drive has a compact 6" shaft length and works with sockets, hex drives, crow's foot and swivels. Durable chrome-vanadium steel and nickel-pewter finish. Includes 8, 10, 13 & 13mm sockets.

#2880 \$23.00

METRIC LONG T-HANDLE SOCKET SET

A T-handle wrench like pros use, but with the added versatility of removable sockets, enabling one to always fit the bolts on a given bike. Comes with 8, 10, 12, and 13mm sockets, but any 1/4" socket will fit. 7.75"×4.6"×0.6", 8 oz.

#4620 \$23.00

ALL SCREWS ARE NOT THE SAME

The screws on Japanese motorcycles are made to the Japanese Industrial Standard (JIS), which is a more precise, squared angle tip when compared to the more rounded profile of a traditional Phillips® driver tip. Avoid cam-outs and stripped or damaged screws when wrenching on your Japanese bike by investing in a set of drivers with JIS cross-points. Makes a world of difference for precision screwing and less frustration from slipping and stripping.

JIS & SLOTTED HIGH-SOFT MAGNETIC DRIVER SET

Assortment of six really nice JIS drivers, perfect for any repair or restoration project. Includes #1, 2 & 3 JIS Cross-points and 5.5, 6.0 & 8.0 mm slotted drivers. Magnetized tips. Set of 6.

JIS #2952 \$75.00

JIS CUSHION GRIP DRIVERS

Wide 1.25" cushioned bulb handle is easy to grip and twist. The tang-thru design makes it incredibly durable and the magnetized blade is handy for retrieving a dropped screw from the dark crevice of inevitability. JIS cross-points, available in two tip sizes (#1 & #2) and four lengths.

JIS #1×75mm #2953 \$12.00 | JIS #2×100mm #2954 \$13.00
JIS #2×150mm #2955 \$14.00 | JIS #2×200mm #2956 \$15.00

JIS & SLOTTED TANG-THRU DRIVERS

These drivers are ready for hard duty with a special hardened steel shank and tang-thru design. Hard resin base with a soft-er covering for a comfortable grip in your hand. Available in JIS Cross-points and slotted drivers, in three shank lengths.

JIS #1×75mm #2957 \$12.00 | JIS #2×100mm #2958 \$13.00
JIS #2×150mm #2959 \$14.00 | Slotted 5.5×75mm #2960 \$12.00
Slotted 6.0×100mm #2961 \$13.00 | Slotted 6.0×150mm #2962 \$14.00

JIS PRECISION DRIVER SET

Nice compact driver set, ideal for very small screws of cameras, glasses, small electronics and much more. Special hardened steel blades fitted into swiveling polypropylene resin body for easy fingertip use. Includes 1.27, 1.5, 2.0, 2.5mm Hex, #0 JIS & 2.5mm slotted drivers. 4.4"×.47" each. Set of 6.

#2967 \$45.00

JIS 4 WAY OFFSET DRIVER SET

You'll notice the difference the first time you use this tool. Remove stuck and frozen screws easily, and torque down JIS phillips screws fully and neatly. It will become your go-to screwdriver the first time you use it. Bits included are 2.5, 3, 4, and 5mm hex drivers, as well as Phillips #1, 2, and 3, 4.5, 5 and 7MM flat Drivers. 4..5"×1.75"×.75", 4.5oz

#4531 \$24.00

JIS 4 WAY OFFSET DRIVER SET

You'll notice the difference the first time you use this tool. Remove stuck and frozen screws easily, and torque down JIS phillips screws fully and neatly. It will become your go-to screwdriver the first time you use it. Bits included are 2.5, 3, 4, and 5mm hex drivers, as well as Phillips #1, 2, and 3, 4.5, 5 and 7MM flat Drivers. 4..5"×1.75"×.75", 4.5oz

#4531 \$24.00

DESIGNATED DRIVER

This is a functional and clever tool that is built to last a lifetime. Using standard hex bits, the Driver has a machined aluminum body with holes to hold extras, which are held in with a friction material. The drilled handle also allows use of the included extension as a "cheater" to increase leverage. Includes five bits: Phillips (#2 (two) and #3) and slotted (3/16" and 1/4"). 3.9"×.9", 5 oz.

#4532 \$20.00

TITANIUM COMBINATION WRENCHES

At less than one quarter the weight of standard steel wrenches, these strong and extremely lightweight tools are perfect to shave weight from the average bike toolkit.

The titanium alloy will never rust or corrode and the ergonomic handle design

makes 'em easy to hold and use on the roadside or trail. Available in 8mm, 10mm, 12mm, 13mm, 14mm, or a four wrench set that includes a sturdy nylon tool wrap.

8mm #3694 \$20.00

10mm #3695 \$25.00

METRIC AXLE WRENCHES

A compact, lightweight and easy to carry wrench featuring a 6-point design for a secure grip on axle nuts, with dual sized ends to fit both front and rear axles.

17mmx24mm #2896 \$20.00

17mmx27mm #2897 \$20.00

22mmx27mm #2898 \$20.00

32mmx22mm #2899 \$20.00

KNIPEX ADJUSTABLE WRENCHES

The best of their kind. By far. Perfectly sized for keeping in a rolled MC tool kit. These go beyond the rest with better design features and faultless metallurgy. A push button quick-adjust slide mechanism gets the jaws sized fast with one hand, and cushioned grips let you apply more force. The Python's flat jaws are designed specifically for use on nuts. The unique locking slide adjustment jaw minimizes damage to bolts and fasteners. Spreads far enough even for oversized steering stem nuts. The Cobra (7.25"×1.5"×0.5", 6.1 oz.) is oil-hardened 60 HRC steel. The Python (7.75"×1.75"×0.6", 8.7 oz.) is nickel-plated chrom vanadium steel.

Cobra (Box-Jointed) #3505 \$37.00
Python (Flat) #3509 \$63.00

LEATHERMAN CRUNCH

Super useful and handy locking pliers that fold away make the Leatherman Crunch unlike any multi-tool available today. The Crunch clamps up to a 1-inch diameter pipe, and if you remove the adjusting screw, you'll find a hex-bit adapter built right in. With locking blades that release with the push of a button, the Crunch will take a bite out of any job. 15 tools in 1 compact package, additional features include wire cutters/strippers, ruler, file, bottle opener, and assorted screwdriver bits. Stainless Steel construction. Closed length 4". Weighs 6.9 oz.

#6092 \$109.00

WATERPROOF TOOL STASH TUBE

Add durable, easy access, water-tight storage to any convenient spot on your bike. Rugged, molded high density polypropylene canisters feature a screw-on cap with a neoprene seal. Two sizes to choose from to fit your needs, Regular measures 3.25"×12" and attaches to the bike via three front and one rear 7/16" holes integrated into the mounting base. The Small version measures 2.25"×12.5" with dual mounting holes allowing it to be attached almost anywhere via bolts or zip-ties. A great weatherproof, easy-access storage solution for carrying a tool roll, assorted parts, paperwork, or any other items you want securely stored and accessible. Choose Regular or Small.

Small #5034 \$9.00
Regular #4462 \$14.00

AEROSTICH TOOL ROLL

A classic biker's tool roll, made-over modern with smarter pockets and pouches. You'll clean out your tool kit and still end up with space to spare in this bag. Three large hook & loop pouches + 20 smaller pockets for wrenches & screwdrivers. Heavy-duty elastic retainers keep everything in place. Folds and rolls into a nice, compact unit. Extraordinary stitching quality. Perfect inside a tool pouch or saddlebag. Cordura. 25.5"×21.5" (unrolled), 11"×3.5" (rolled), 9 oz. 

#4670 \$67.00

(TOOLS NOT INCLUDED)

17-PIECE METRIC TOOL KIT

Designed specifically for metric vehicles, includes: Open ended wrenches: 11, 12, 13, 14, 16 and 17mm sizes, 10mm combination wrench, 6" adjustable wrench, 3/8" drive ratchet wrench, Locking pliers, Pen type tire gauge, 5 cable ties, Electrical wire and electrical tape, Mechanic's safety wire, 10-piece metric hex key set (1.5, 2, 2.5, 3, 4, 5, 5.5, 6, 8 and 10mm sizes), Flashlight, 6-in-1 screwdriver, 21 and 18mm spark plug sockets and Spark plug gap gauge all neatly backed in a sturdy nylon tool bag.

#2948 \$65.00

(TOOLS INCLUDED)

25-PIECE PROFESSIONAL METRIC KIT

Contained in a compact Cordura roll-up pouch, this kit contains the following high-quality tools: 8mm-14mm combination wrenches, 8" adjustable wrench, drive ratchet with extension and sockets, four-bit screwdriver, four hex keys, double hex 5/8 & 13/16 spark plug socket and breaker bar, flashlight, tire gauge, electrical tape, zip ties, mechanics wire, Loctite and WD-40. A professional-quality, complete tool kit. 9.5"×3.34" (rolled), 3 lbs.

#4988 \$85.00

(TOOLS INCLUDED)

25-PIECE BMW METRIC TOOL KIT

Modern BMWs don't come with many tools, but things still go wrong sometimes, and when they do, having a few tools may help keep you going. This kit includes top grade wrenches, hex keys and other specialized tools that are sized to fit the stuff on every Bavarian made bike. Sturdy roll-up pouch keeps tools neat and organized.

#4738 \$87.00

(TOOLS INCLUDED)

I, MY OWN MECHANIC

by Dave Allaband

This is the story of my first BMW. Actually, no, it's not. This is the story of me trying to find a mechanic for my first BMW, which I didn't expect to be such a big part of owning one.

I loved that bike, wanted to ride it across a thousand continents to the symphony of wind coursing through my clothes, but repairing it scared me. That bike, that 1981 BMW, bought for a thousand dollars and hardly worth so much, needed some serious attention.

Not since high school had I risked my body on the street with ill-kept motorcycles mixed with bicycle parts and the cement of my imagination. I don't remember becoming an adult, but with the BMW I decided to be one, and hire a professional for repairs.

Decisions like that only determine course, not action or even destination. In action I found New York City somewhat devoid of BMW mechanics. BMW has a dealership in Manhattan, of course. A huge glass building with a twenty-foot roundel on the side, varnished concrete floors and powder black steel railings leading to the basement service department.

Apparently BMW didn't make motorcycles way back in 1981, that's what the twenty-something guy behind the service counter told me.

"Well there's one upstairs," I told him. "It looks like hell, but I got it here."

Flipping his surf safari hair to the side he grudgingly leafed through a book. I was uncomfortable standing near the counter, twenty-something obviously didn't like me, but I felt stranded in a service department like the opening scene of the Six Million Dollar Man. Twenty-something kept shaking his head in frustration, I tried not to look uncomfortable as I wondered if six million dollars was enough to pay for the track lighting in the room.

Eventually he verified the existence of my bike, but said they didn't have anybody who could work on it, nor could they get any parts for it. I later found he was mistaken, but the experience was enough to frighten me. I did go back a few times, out of desperation, but as I lacked the necessary funds to build a cyborg, I could also not afford their services.

Remember phone books? Back before Skynet controlled the earth. Back before the Internet made the search for just about anything instantaneously satisfied. Back in 1954. In some ways New York City is just like 1954. Nobody around here puts anything on the Internet, except artists and scholars. I didn't need an artist or a scholar; in fact, I'm both those things. I didn't want any artists or scholars working on my bike, I wanted a mechanic, but mechanics in New York don't like the Internet,

so I dusted off the phone book.

I found one place, one guy, the name of whom will go unmentioned, for I have bad things to say about him. Our relationship started off okay, I called to price some exhaust pipes, he told me

*Not since high school had I
risked my body on the street
with ill-kept motorcycles mixed
with bicycle parts and the
cement of my imagination.*

the cost, we said goodbye. I called twenty minutes later with another question, then I realized I made a mistake, so I called back a third time. This time I talked to a person I assumed to be an assistant mechanic. The next call went like this:

Mechanic: "Hello, Generic Name BMW?"

Me: "Hi, this is Dave, I called a few minutes ago about exhaust pipes."

Owner: (In the background, screaming so loud I could hear him through the phone.) "Is that the guy about the exhaust pipes? Hang up the phone! Hang it up now!"

Mechanic: "Umm."

Owner: "Don't talk to him! Hang up the phone now! Put the phone down!"

Mechanic: "Umm."

Me: "You know I can hear him right?"

Mechanic: "Yea."

Owner: "Why are you talking to him? Put the EXPLATIVE phone down! PUT – THE – PHONE – DOWN!"

Mechanic: "I'm sorry, but..."

Owner: "Hang up on him! Hang up! You hang up that phone right now! Hang it up!" (The changing sound of his voice gave away some kind of movement. Either he was acting something out or... dancing?)

Mechanic: "I'm sorry, but..."

Me: "It's okay. Is he always like that?"

The mechanic laughed.

Me: "I'm sorry you have to deal with that. Do me a favor? After you hang up, tell him something for me."

Then I said bad things about his momma. Actually I didn't, but it was something along those lines. You get the drift. Scratch that guy off the list, I'd rather build a motorcycle from pig iron than patronize the evil of humanity.

New York City wasn't looking good. I

Photo: David Allaband, out for a ride in 2007
(many miles from home, but only a mirror glance away from his mechanic.)

broadened my search to surrounding lands, the wily wilderness beyond Burroughs. No phone books for the wilderness in my house, so I was back on the Internet. Found a number, turned out to be a shop in Canada, but the Canadian guy knew someone in New Jersey.

New Jersey is closer to New York City than Canada. Actually, I'm from Jersey, good things come from Jersey, like the Jersey Devil and people sitting around drinking beer and long, winding roads that used to be Indian trails that were probably originally deer trails.

The guy's name is Mike, he's a retired electrician with a couple acres of land backed by forest and a garage filled with European motorcycle curiosities. Mike's shop is called MG Cycles and I'm giving his contact information because everyone

*I was amazed to find that
the headlight was not meant
to be attached with a coat
hanger...*

within two hundred miles of north Jersey should have it. Phone number: 732-886-6445. Email: m20cycles@juno.com.

Mike shook his head when he saw my bike.

"You rode that down here from New York City?" he asked.

"Yea."

"The police didn't stop you?"

"Why would the police stop me?"

Mike just shook his head again and rolled my bike into the shop.

For the next half year I brought my old R100 to Mike every two months, an interval dictated by me saving up time and money. I was always the mechanic's assistant, I thought it was just because Mike liked my company, but he had a plan. Mike didn't like me riding a bike built of hopes and dreams on the interstate, he was covertly training me to work on the motorcycle myself.

Without my knowing, Mike's plan slowly came to fruition. I started doing little things myself, searching out parts on IBMWR and Ebay. I was amazed to find that the headlight was not meant to be attached with a coat hanger, but had purpose-built ears, and the ignition switch was not supposed to be bundled with stray wires and zip-tied to the handlebars, but was actually one of the connecting points for the headlight to the ears!

I was my own mechanic for several months before I realized Mike's trick. Instead of riding an hour through one of the most congested urban areas on earth with major repair issues just to reach my mechanic, I found my mechanic lived in my own apartment. He works for free too, which is nice.

As I said before, determination does not dictate outcome. I tried hard not to become my own mechanic, but that's what happened anyway. I also tried to keep artists and scholars from being my mechanic, and failed there as well.

Thanks to Mike's plan I've been able to maintain my old bike for years, modifying and upgrading it. I rode the thing all up and down the east coast on several months of camping trips. I've even been able to teach other people how to repair their own bikes, passing Mike's knowledge on.

People often stop me to ask if I know a good mechanic in Brooklyn who works on old airheads.

"You have to learn to fix it yourself," I always reply. "You're all you got baby, you're all you got."

STANDARD

UNIVERSAL ADAPTER

AEROSTICH CANTILEVER WHEEL BALANCER

Avoid the expense, downtime and trouble of scheduling tire changes at a shop and gain the satisfaction of knowing the job was done perfectly (and is ready just when you need it). With this balancer and a couple of tire irons (plus a bead breaker for tubeless tires) anyone can get a precision balanced tire in a few minutes.

Method: First, lock the axle to your wheel and set the wheel/axle/bearing assembly into the bearing saddles on the stand. Then, slowly spin, mark the low spot, repeat, add (tape it on) a temporary weight, spin, mark, repeat, re-weight, spin, repeat, etc... When wheel always stops at random points, securely attach the required weights and the job is finished. Ultra-low friction bearings make the process very sensitive to the smallest change in weight for super accurate results.

This stand's removable axle design also allows for more compact storage. Optional cup and cone type adapter fits most wheels used on single sided swing arms. 14mm axle also allows use of standard BMW Paralever wheel adapters (available from BMW).

Strong frame and a durable gray powder coated finish make this a valued shop tool that will be a pleasure to use for years. Measures 18"x20.5"x10". 10 lbs. Save time and money while getting the satisfaction of doing it yourself. Definitely a nice balance. 🇺🇸

Cantilever Wheel Balancer #4744 \$147.00
Universal Single-Sided Swingarm Adapter #4748 \$57.00

FEATURES

- Strong, lightweight frame, powder coated finish.
- Two shielded precision ball bearings with lightweight lubricant for ultra low arbor starting torque
- Larger bearings for maximum sensitivity and a stronger stiffer frame than others. Doesn't flex or vibrate.
- Unique removable axle design makes the job easier: Insert the axle, tighten the cones and set the combined assembly onto the stand.
- Removable axle design also allows for more compact storage.
- Aluminum bearing adapters fit most motorcycle wheels with bearings in the hub, 17 to 30mm ID
- Optional universal adapter fits most wheels used on single sided swing arms
- Save money and ensure your wheel balancing is done correctly

WHY A CANTILEVER?

A few years ago legendary race bike tuner Bill Werner (130 AMA Grand National Wins, 13 Grand National Championships and AMA Hall of Fame Member), bought one and reported: "Someone's finally come up with a better, smarter tool for balancing wheels. It's great!"

WATCH THE VIDEO AT AEROSTICH.COM!

AEROSTICH EASY BEAD BREAKER

For motorcycle wheels that are open in the middle (regular or cast spokes). It's also packable, but it is really a little larger than most riders will want to carry. Ideal for garage workshop use. Adjustable for all sizes of wheels/tires. 17.5"x2"x2", 4.5 lbs.

#3686 \$97.00

BEAD POPPER

This lightweight resin wedge combined with a big heavy rock (or other improvised bludgeon) will do the same job as a bead breaker. Simple but effective, and somehow satisfying. 7"x3"x1". 4 oz.

#2583 \$20.00

BEAD BREAKER LEVERS

Lightweight enough to pack on the road, this patented tool breaks tubeless tire bead, easily. Small, portable set made from forged Aluminum. 11"x4"x0.7". 9oz. The longer, heavy-duty shop version is made from forged steel. 16"x1.8"x0.9". 32 oz.

BeadPro #2765 \$75.00

BeadPro FS #2970 \$55.00

COMPACT WHEEL BALANCER

Perfect for conserving storage space in racetrack vans and small garages, this tool balances wheels precisely but doesn't take up much room when not in use. Beautifully machined aluminum pillow blocks hold low friction bearings and rest perfectly on any two chairs, stools or garage jack stands: voila! A fast, accurate wheel balancer. 1.5 lbs.

7" or Less Rear Wheel (Universal, Goldwing and double-sided swingarm bikes) #4605 \$105.00

Single Sided (BMW '85 and Newer) #4606 \$105.00

7" or Wider Rear Wheel (Buell, FZ-1, Hayabusa, and Harley) #4645 \$115.00

BMW Front Axle Removal Tool #4737 \$25.00

BEAD BUDDY

This handy little tool helps push the bead down into the rim and keep it in place while changing a tire. Won't mar or damage rim. Lightweight aluminum and nylon. 2.25"x1"x.625", 1 oz.

#4938 \$12.00

RIMSHIELDS

Big, beefy rim protection is what you get from these durable, oversized nylon rim savers. Real protection from potential damage caused by tire levers during changes, the raised beads facilitate inserting the lever under the bead and prevent

slipping. The long apron protects hands and spokes, while the sizable finger holds make repositioning a breeze. Made with rugged DuPont Zytel® material for unmatched toughness and durability. (5.75"x4.5"x.5"). Set of 2.

#2425 \$15.00

BMW R & K ADAPTER

Fits all R and K model bikes from 2004 on (with the exception of K1200LT).

#4801 \$35.00

BMW STYLE PARALEVER CONE

Fits all single sided BMW wheels up to 2004 models.

#4800 \$25.00

FLAIG TIRE GAUGE

German-built and calibrated to 1% of scale value per DIN spec 74720, this gauge is ruggedly constructed with an aluminum shell, rotatable/resettable 60 psi dial bezel, and a release button to record pressures. If you are critical about your tools (and your tires), this is your gauge. Superlative. 4.5"×2.9"×0.9", 4.7 oz.

#4603 \$52.00

DIAL TIRE GAUGE

The 2.5" dial reads to 60 psi with a swivel angle chuck and an air release valve. Accurate, easy to read and inexpensive. Toss it into your kit or leave it by your daily gear out in the garage so it will be handy. 4.5"×2.4"×1.25", 5.9 oz.

#4652 \$13.00

DIGITAL SMART GAUGE

This digital tire gauge is great for storage and carrying. The ergonomic shape provides an easy view of the LCD display. It's accurate to half a pound, simple to use, and it beeps. Fits Presta and Schrader valves (which is great if you also ride a bicycle). Battery included. 3.4"×2"×1.1", 4.1 oz.

#2530 \$33.00

ACCU-GAGE

This easy-to-read and accurate 2" dial gauge features a full geared precision movement with bronze Bourdon tube and rubber shock absorber. Swivel end for easy positioning around brake rotors. Measures 0–60 psi. 17.25"×2.5"×1.25", 9 oz.

#2513 \$23.00

PENCIL GAUGE

This solid metal stick/pencil gauge reads 10–50 psi on a 4-sided indicator bar, and features a pocket clip—just like the good old days. Small, light, and surprisingly accurate. “Check the air, ma’am?” 5.75"×.6"×.5", 1 oz.

#3550 \$7.00

DUAL CHUCK DIGITAL AIR GAUGE

Fast, easy tire pressure readings with digital accuracy. Rotary head allows easy use and quick release valve can bleed off excess air if necessary. Large backlit display shows pressure in both bar and PSI formats. Dual Presta and Schrader heads to also measure bicycle tires. CR-2032 battery included. 8"×5"×2". 2.9 oz.

#2224 \$25.00

3/8" SOCKET ADAPTERS

Convert the Aluminum Tire Lever/Wrench Combo (or any other 24mm, 27mm or 32mm wrench) into a non-ratcheting 3/8" drive socket wrench. 0.9"×1.25". 1.8 oz.

24mm #2594 \$22.00

27mm #2595 \$22.00

MOTION PRO ALUMINUM TIRE LEVER / WRENCH COMBO

These hard anodized, aluminum tools are box wrenches on one end and an efficient tire iron on the other. Remove both the axle and the tire with one tool. Wrenches are just under 10" long, less than 5 oz. and fit nicely in a tool roll.

12/13mm #2566 \$25.00 | 22mm #2567 \$25.00

24mm #2568 \$25.00 | 27mm #2569 \$25.00

32mm #2570 \$25.00

COMPACT VALVE CORE TOOL

Ultra compact and effective as a tire deflator and core removal/installation tool, this fits anywhere and does the job when needed. Knurled for ease of use. Simple, tiny, and effective. 1.1"×0.5", 0.7 oz.

#4616 \$5.00

WORKSHOP VALVE CORE TOOL

A compact tool manufactured from steel hex stock for the removal and installation of valve cores on either tubed or tubeless tires. Inexpensive and durable. 2.75"×0.4", 1 oz.

#4615 \$5.00

INNERTUBE VALVE STEM SNAKE

This useful valve stem guidance tool makes changing tires a breeze. Attach the threaded end onto the stem of a flattened tube, then pull the chain through the rim's valve stem hole and easily pull stem into place. A little tool that saves loads of frustration. 14.5" long.

#4990 \$27.00

DIGITAL TORQUE WRENCH ADAPTER

Now any 1/4" or 3/8" drive ratchet can be used as a precision torque wrench. Easy to read LCD screen, signal LED light and torque alarm. Five selectable torque units: kg-cm, kg-m, in-lb., ft-lb and N-m. Built-in memory stores the last 50 torque value readings and logs highest torque achieved. Automatic shut off extends battery life. Compact design takes up less room than conventional torque wrenches. Includes durable protective carrying case. Available in 1/4" drive (with 2.2–22.1 ft lb range) and 3/8" drive (with 19.9–99.6 ft lb range).

1/4" #2944 \$43.00
3/8" #2945 \$37.00

REUSABLE BALANCE WEIGHTS

A simple, re-usable wheel balancing solution. Slide the CNC machined solid brass or nickel weights over the spoke and tighten a single allen set screw to the spoke nipple. Adjust the amount of weight and placement as necessary to achieve the perfect balance. Fits all sizes of spokes on today's bikes. A versatile balancing tool that contains no lead and is re-usable, making it an environmentally friendly option. Eight weights: two 1 oz., two 3/4 oz., two 1/2 oz., two 1/4 oz. Specify Brass or Nickel.

Universal Brass #3677 \$27.00

Universal Nickel #3678 \$33.00

BMW Only Nickel #3679 \$35.00

ADHESIVE WHEEL WEIGHTS

Recommended inventory. Six 3 oz. strips in "snap-off" .25 oz. increments.

#3576 \$11.00

WHEEL CRATE

Industrial/commercial grade heavy-duty, and perfect for holding a wheel off the ground when levering its tire on or off the rim. 13"×13"×10.9", 2.5 lbs. 

#3585 \$15.00

NOLOSS VALVE CAP

These practical and well-made valve caps seat an O-ring to provide that final seal, and have flexible retainers that ensure you won't misplace them. Neat. Nylon version are fully compatible with the latest Tire Pressure Monitoring (TPM) valves made from aluminum. Brass (set of 4). Nylon (set of 5).

Brass (4) #4602 \$14.00

Nylon (5) #4770 \$15.00

AEROSTICH TUBE/TUBELESS TIRE REPAIR KIT (W/ENGINEAIR POWER PUMP AND TIRE IRONS)

This over-the-top deluxe kit contains everything needed for workshop and roadside repairs. For tubeless tires, it comes with plug strips and patch/plugs, a rasp tool, and a needle tool. For tube tires, it has patches and a stitcher tool with a buffer and a wheel for securing the patch.

Two heavy duty steel or (ultralight titanium) tire irons, and a valve core tool are also included for removing the tire. And for refilling your tires, an Engineair Power Pump is included. The Engineair works with all multi-cylinder engines, and is designed to inflate tires using the engine's cylinder as an air compressor by threading into one of the engines spark plug holes (18, 14, 12, and 10 mm adapters are included).

When your repair job is finished, a single use hand cleaner towelette is included. This kit has it all. Securely housed in a heavy duty zipper envelope. 10"×3.75"×2". Specify: Titanium (24 oz.) or Steel (34 oz.) Tire Irons.

Steel ⚙️ #4508 \$60.00
Titanium ⚙️ #4509 \$130.00

AEROSTICH TUBE/TUBELESS CO² TIRE REPAIR KIT

This is the ultimate compact emergency tire service kit. Packs small, and includes everything you need to make quality repairs on the road and refill your tires when you are finished. Includes cement, patches and plugs for repairing both tube and tubeless tires, a rasp and needle tool for installing the strip-type plugs into tubeless tires, and five 16g CO² cartridges with an adjustable air chuck that accepts a flexible valve adapter hose to refill your tires. For tube tire repairs, tire irons are needed to remove the tire from the rim (Aerostich Tar Arns (#3564), available separately). Zippered nylon pouch. 7"×4"×2", 18 oz.

⚙️ #4674 \$50.00

ON-BOARD TIRE TEMP SENSOR

Increase safety and ease of mind whether riding across country, across town or racing down a track, by knowing real-time tire temperatures, accurate to 0.02°C. Dual proprietary 35° wide-angle sensors accurately observe and report infrared radiation emitted from tire surfaces, displaying front and rear tire surface data on a bright 2.2" LCD. Durable injection-molded polycarbonate housing for sensors mount easily to your bike. Programmable alerts can be easily set for desired high or low temperatures to immediately alert you to potential tire related issues, especially related to traction, performance and safe operation. 7.5"×3.5"×3". 1.5 lb.

#4479 \$329.00

PROALIGNER

Align wheels with laser beam precision, without the dead batteries or cost of a laser, or the bulk of a really long straight edge. Even slightly misaligned wheels cause weird steering and handling. This simple, easy-to-use tool is the solution for accurate wheel alignment. The easy to read dual scale can be used with a bike on a rear stand, front stand, centerstand, side stand or no stand. A fast, accurate tool that will make your bike steer and ride better. Great instructions, too. 12"×1"×.4"

#4765 \$29.00

"Riding a motorcycle is an agreement. I can't run very fast, so I can use the motorcycle to help me. The motorcycle can't balance on it's own, so it can use me. He gives me speed, I give him balance." —Kino (paraphrase translation...) 2005

AEROSTICH MINI COMPRESSOR

This is the smallest, lightest compressor we carry and one of the most efficient you'll find for its size. This stripped-down mini fits in the palm of your hand and will inflate any motorcycle tire in a couple minutes. When a larger compressor is too much bulk to carry along, and CO₂ cartridges aren't nearly enough for your trip, this dedicated pump will deliver continuous pressure without fail. What it lacks in beauty, it makes up for in performance – which is what you really need when you're flat stranded in the middle of nowhere.

Has a nice long 26" inflator hose, 6' power cord, and packs small in included storage sack. Comes with three adapters: SAE, cigarette lighter and alligator clips. Lock-down delivery valve fits all bikes. Also comes with carabiner clip, so you can attach the compressor to whatever you want out of the way and off the ground, instead of having it lay in the mud or dirt. Simple, compact, and dependable peace of mind. Pump is 3.5"×3.5"×.9". Packs to 7"×5"×3", 1.3 lb.

#3500 \$50.00

BMW Power Plug #116 \$20.00

STORAGE SACK

ADAPTERS

"Last night I changed and balanced both tires on my bike. The last few years I've needed to do about one back tire per year, and one front tire every other year. Now that I'm old, thing fall into predictable routines like this. Crazy...

"Anyway, I started about ten pm and finished about one am. This is a pretty physical job the way I do it. Removing the wheels, levering the tires off with the tire irons, and putting on the new tires and then balancing and re-installing the reassembled wheels.

"The other aspect of this job is mental – how Amish it is. Nobody does this kind of procedure anymore, the way I do it. By hand with the little irons. Most people who maintain their own motorcycles and change their own tires have a 'tire changer' which is a stand that you put the wheel on and then a long lever comes from the center of the stand and you walk around the perimeter and it pulls the tire from the rim, slick as opening a can of tuna.

"I still do it the way people did it in 1920, and it's tiring. But a good workout. And you don't need a 'tire changer.' Just the skill. Which would be handy on the side of a little-traveled road if you just had a flat. In the morning when I wake up, I'll be stiff, I bet. But happy."—Mr Subjective 6/09

AEROSTICH COMPLETE TIRE REPAIR KIT WITH MINI COMPRESSOR

The ultimate compact tire repairification kit. Combines our smallest, most efficient compressor with all the essential tools, patches and goo needed to fix nearly any roadside flat. The whole kit zips up neatly into a handy nylon storage pouch and fits easily in a tank bag or pannier. Mini Compressor has a nice, long 26" inflator hose and comes with three power adapters: SAE, cigarette lighter and alligator clips.

The underside of the pouch also features four slim pockets allowing storage for a tire gauge, pen, flashlight or other small, handy items that can be added to enhance this kits versatility. Adding tire irons for removing the tire from the rim (Aerostich Tar Arns #3564, available separately), truly makes this a ride-anywhere tire repair kit. This is the smallest and most packable tire kit available. Black. 7"×3"×5.25". 1.61 lbs.

#4750 \$87.00

AEROSTICH CO₂ POWER KIT

No matter where you are, this kit provides inflation. Five threaded 16 gram CO₂ cartridges, a control valve and a 3.5" flexible valve adapter hose, all store neatly inside a 5"×5" envelope bag.

#4760 \$24.00

CO₂ AIR CHUCK

Inflate tires with threaded CO₂ cartridges. Works on Schrader and Presta valves. Includes 16g. CO₂ cartridge. 4.1"×1.6"×0.9", 3.5 oz.

#4506 \$18.00

THREADED CO₂ CARTRIDGES

One 25g #4585 \$12.00

Five 16g #4904 \$12.00

PATCHES

For tube tires. 6 patches and rubber cement.

#4511 \$9.00

POCKET PLUGGER PLUGS

For tubeless tires. 25 pre-lubricated plugs.

#4600 \$15.00

PLUG STRIPS

For tubeless and tube tires. 6 plug strips, 6 patches and rubber cement.

#4510 \$5.00

AEROSTICH CO₂ EXPEDITION TUBELESS TIRE REPAIR KIT

Why get stranded? This kit allows you to do complete on-the-rim tubeless tire repairs in a jiffy with the included Pocket Plugger, and the also includes a valve adapter with CO₂ cartridges to refill your tire, so you can get back on the road quickly. The Pocket Plugger utilizes an included Allen wrench to turn an integral ram, which minimizes effort and securely seats the pre-lubricated plugs — no rubber cement is needed. Includes four 16g CO₂ cartridges, flexible valve adapter hose, Pocket Plugger, Wrasp, Reamer, and a collapsible blade. 7.5"×5.5"×2", 20 oz.

#4936 \$50.00

STOP & GO POCKET PLUGGER TUBELESS TIRE REPAIR KIT

Repair tubeless tires without removing them from the rim with this compact and effective kit. The Pocket Plugger insertion tool utilizes an included Allen wrench to turn an integral ram, which minimizes effort and securely seats the pre-lubricated mushroom-shaped plugs — no rubber cement is needed. Includes fifteen plugs, Pocket Plugger, Allen Wrench, Wrasp, Reamer, and a plug nozzle to set the plug. A collapsible blade is also included to trim installed plugs. 7.5"×3.5"×2", 12 oz.

#4604 \$47.00

ENGINEAIR POWER PUMP

An engine-powered air pump designed to inflate tires using one of the engine's cylinder as an air compressor. This premise is vaguely alarming but actually quite well thought out. A pump unit threads into one of a multi-cylinder engine's spark plug holes, and as the engine runs/spins, fresh, clean air is pumped into the tires.

This is completely safe for your engine and its ignition system. Pulls air from the atmosphere, ensuring no gas or oil fumes turn your Metzeler's into a Hindenburg wannabe. Kit includes a 60" quick-release air hose and 18, 14, 12, and 10 mm adapters for all spark plug openings. 12.5 oz.

#3570 \$33.00

CYCLE PUMP COMPRESSOR

Contained in a sturdy aircraft-grade aluminum case, this 12V pump inflates a motorcycle tire from flat in about 2 minutes. Pumps to over 100 PSI if needed. Fold-out legs increase stability and keep the unit out of the dirt. A 24" air hose and 8' power cord give plenty of reach. Add an optional 8' Autocord Extension for even more. Plugs in to any 12V SAE connection, via the included universal BMW/cigarette-socket power plug, or battery alligator clips. Everything fits compactly in a rugged storage pouch. 2"x4"x6" and 36 oz. 10A. 

#4906 Straight Chuck \$110.00

90° Chuck \$125.00

8' SAE Autocord Extension #4803 \$20.00

ALLOY DRIVE M PUMP

A compact High Volume hand pump made entirely of custom CNC-machined aluminum for precise and lightweight construction. Overlapping handle and barrel with oversized piston and shaft are integrated into a compact design. Handle houses a removable 6.5" ABS flex hose that attaches easily and securely to the stem valve. Inflates tires to riding pressure with 30% fewer strokes, for faster inflation with less effort. Max pressure 90psi. 9"x1.25"x1.25", 4.5 oz.

#4773 \$43.00

DYNAPLUG TUBELESS TIRE REPAIR TOOLS

The most convenient emergency repair system, fixes 98% of all tubeless tire punctures. Load one of the brass tipped repair plugs into the stainless steel insertion tube, then pull the tool away and clip the plug end flush with tire. No need for tire removal or messy glues and patches, and it will not unbalance the tire.

The repair plugs and insertion-tube re-use cleaner and store neatly inside the durable, lightweight billet aluminum body of this powerful tool. What if you have a larger hole from—for example—a quarter inch bolt? Two or three of these special plugs, inserted side-by-side, work fine.

The 2 oz. Ultralite uses a silicone end-cap and includes 1-insertion tube and 4-repair plugs. PRO model features an all-aluminum waterproof body with 3-insertion tubes, clearing and air-stopper tools, 8-repair plugs and a polyethylene case. 3 oz. 3.8"x0.87". 

Ultralite #4840 \$30.00

PRO #4841 \$55.00

Refill Plugs (5 per pack) #3641 \$14.00

HIGH VOLUME MICRO FLOOR DRIVE PUMP

The Micro Floor Drive XL is a portable hand pump with floor pump capabilities developed to efficiently inflate tires. It features a CNC-machined aluminum construction, which keeps its weight to a minimum without sacrificing durability. An extra large, high volume barrel produces large amounts of air with each pump and can inflate tires up to 35 psi with ease. A long, integrated hose and a stainless steel foot peg improves pumping efficiency and reduces downtime. The ABS Flip Chuck is compatible with both Presta and shradar valves (for use on your bicycles too) and threads into the pump's base for optimal storage. 2"x2"x15". 5.29 oz. Black.

#4740 \$59.00

"I get very attached to my bikes...I do most of the light maintenance on them myself. Tire changes. Tune-ups. Replacement chains, sprockets, cables. Replacement wheel, swing arm and steering head bearings. Carb 'rebuidls'. etc.. I just get sucked in, in the worst 'old school' ways. They get very hard to stop riding after all of this." —Mr Subjective, 4/08

AEROSTICH POP-UP EVENTS

We travel around the country several times a year to bring all of the latest riding gear and equipment to you at a special four-day Pop-Up event. Join our fitting experts and see, feel and touch all of the latest Aerostich gear. Get measured for optional custom fit alterations (if needed) and experience the better feel and fit of over sixty graded sizes. Meet like-minded riders, ask questions and make some new friends. See hundreds of items including some available for cash-and-carry sale (at most locations), plus free prizes and fun!

Where would you like to see up pop-up next? Have a great idea for a location? Email us at service@aerostich.com.

RIDE YOUR MOTORCYCLE ON RIDE TO WORK DAY JUNE 15TH 2020 AND DEMONSTRATE:

- THE NUMBER OF MOTORCYCLISTS TO THE GENERAL PUBLIC AND TO POLITICIANS
- MOTORCYCLISTS ARE FROM ALL OCCUPATIONS AND ALL WALKS OF LIFE
- MOTORCYCLISTS CAN REDUCE TRAFFIC CONGESTION IN LARGE CITIES
- MOTORCYCLES ARE FOR TRANSPORTATION AS WELL AS RECREATION

Ride to Work is a non-profit organization that advocates the use of motorcycles for transportation, and provides information about transportation riding to motorcyclists and to the public. Support the cause by purchasing merchandise or becoming a member.

DEALERS & GROUPS:

Wholesale pricing is available on all Ride to Work merchandise for dealers, merchants, groups, clubs, or events. Call (218) 722-9806 or email propaganda@ridetowork.org for more information.

Ride to Work Day Poster
Current year available only.

GUARANTEED BETTER FIT

Mail Order Fitting?

We are experts at providing a great fit. We've talked with thousands of riders about their size, bike, local climate and riding habits. We also offer free size-exchange return shipping within the USA. Every order is double checked for accuracy.

Ordering Factory Direct?

Ordering direct from the factory gives you access to more precise sizes than are available elsewhere. The one piece Roadcrafter comes in thirty-one off-the-rack standard men's sizes and ten women's sizes. We'll help you find the one that provides a perfect fit.

Women's Sizing?

R-3's and Roadcrafters are also available in 30 women's graded sizes (2-20 in short, regular and long). Compared to men of the same height, women usually have slightly narrower shoulders, longer legs and arms, and slightly shorter torsos. Roadcrafters and Dairiens are both slightly looser fitting designs so many women (about 60%) will find standard 'mens' graded Aerostich suits fit perfectly, without alterations.

If you ride only occasionally... Size 'M', 'L' or 'XL' gear may be acceptable, but for years of regular riding, and on long trips, you'll appreciate the greater comfort a true fit provides.

We make Aerostich suits in 61 sizes.... So your gear feels and wears much nicer. The difference between each size is less, and every size is also available in 'Short', 'Regular' and 'Tall' versions. **A better fit makes every ride wonderful.**

service@aerostich.com

aerostich.com/sizing-comparison-charts

FREE SHIPPING ON DOMESTIC SIZE EXCHANGES:

If your Roadcrafter, Transit, Dairien, Dairien Light or Falstaff does not fit correctly, exchange shipping is free.

SIZE TO SIZE DIFFERENCES:

- Between sizes (ex: 42R to 44R) Overall collar-to-cuff length is +1.25"
- Short to Regular (ex: 42S to 42R) Overall collar-to-cuff length is +3"
- Regular to Tall (ex: 42R to 42L) Overall collar-to-cuff length is +2"

Custom Alterations?

Most custom alterations and optional features may be added at any time, but alterations at time of manufacture are preferred. See aerostich.com/alterations for complete descriptions of over thirty custom options. Altered suits are not returnable for refund or exchange and some alterations are not available in combination.

Sleeve lengths, leg lengths, elbow armor positions, and knee armor positions are all adjustable up to about 5". Some torso, hip, and knee circumference changes are also available, but torso length adjustments are not available.

Essential Fitting Info?

Most of the time all that's needed are your street clothing sizes and your height and weight. Here's the basics:

- Height
- Weight
- Suit coat or blazer (chest size)
- Pants size (waist and inseam)

Additionally, dress shirt size (collar and sleeve length) and body type (thin, medium, large) may sometimes also be helpful.

Bike Types?

For Standard and Touring bikes, use standard sizes. For Sport bikes with low handlebars, more torso length sometimes may be desired. Adding the extra rotated sleeve custom alteration will help provide more comfort.

SIZING CHART: This chart lists equivalent clothing sizes. The numbers are approximate guidelines and not actual body or Aerostich measurements. (If you wear a size 40 men's suit, the same size Aerostich Roadcrafter Suit or Darien Jacket will fit over your street clothes.)

Roadcrafter One and Two Piece Suits are available in 34 Regular and 36-52 Short, Regular or Long sizes. The Darien and Darien Light Jackets are available in 36-54 Regular sizes only. The Falstaff Jacket and Aerostich Fleece are available in S, M, L, XL, and XXL sizes. The Transit Jackets are available in 38-52 Short, Regular or Long sizes. Transit Pants are available in sizes 30-44 waist in Short, Regular or Long.

NEED HELP FINDING YOUR SUIT SIZE? If you are not sure of your size, visit aerostich.com and click on "Sizing tool" to easily calculate your Aerostich suit size based on your measurements and riding style. Results are reviewed by one of our fitting professionals, and returned by email within a day or so.

SUIT DELIVERY: Most Roadcrafter, Darien, AD-1 and Transit orders are shipped from sizes and colors in stock, or in a few weeks for garments which are manufactured as a special order. Altered suits are normally shipped two to five weeks after an order is received, depending on seasonal order volume. Please call or email us if you'd like a delivery ETA or have other questions.

The Aerostich Price Match Guarantee

If we can't win you over with our charm, experience, service and pleasant demeanor, we'd still like to help you get riding gear by keeping more money in your wallet.

Here's how it works: **Find an identical item at a lower price on another web site and if we can match that price, we will*.**

*For price match policy rules visit

aerostich.com/price-match

WARNING!

☎ = SURFACE SHIPPING ONLY

🇺🇸 = MADE IN USA

Aerostich products are sewn together with care and craftsmanship by a team of experts who are proud of the quality they build into each product. We know that you will enjoy our fine products even more because of the extra time and effort we spend in designing and building them. Most of the items in this catalog (about 70%) are made in the United States. If you have questions about the origin of any catalog product, please contact us.

LIMITED GUARANTEE

To the original purchaser, Aero Design & Mfg. Co., Inc., the manufacturer and seller of Aerostich products, guarantees all Aerostich products against defects in materials and workmanship for two full years. Since no Aerostich product is indestructible, this guarantee does not cover: ordinary wear, soiling and aging, or damage due to contact with superheated components, misuse, or accidents. Repairs due to normal wear and tear, or the result of accidents, will be done at a reasonable charge. Items sent for repair must be clean.

LEGAL NOTICE

Aerostich garments are not considered to be personal protective equipment as defined in or within the scope of the personal protective equipment (EC Directive) regulations 1992 (S.I.1992/3139). No liability will be accepted arising out of these garments' non-compliance with such regulations.

CORPORATE/PRIVATE LABEL/GROUPS

Some catalog items and products are available with special labeling, packaging or incentive programs. For details please contact our specialists at 800-222-1994 from 8am to 6pm (North American CST, -6 hours GMT) or by e-mail at info@aerostich.com.

SPONSORSHIPS

Support availability is always limited to Aerostich internal resources and requirements. We provide a limited number of professional riders with discounts and test items. Aerostich provides door prizes to many touring rallies and events. We cannot, however, provide prizes for all event requests. Aerostich/RiderWearHouse supports charities including the Pony Express (fundraiser for breast cancer research), The Ride(s) for Kids, and others, with prizes, contributions or participation. We also support the AMA (American Motorcyclist Association) and RTW (Ride to Work) as a corporate member, the MRF (Motorcycle Riders

Foundation) and MIC (Motorcycle Industry Council) as a member. We are also a member of many national riding clubs including HOG (Harley Owners Group), BMWMOA (BMW Owners of America), HSTA (Honda Sport Touring Association), and others.

Once again, just a stellar job in terms of Form + Function. Build quality and attention to detail is consistently first-rate.

You guys are the Porsche 911 of riding gear - keep evolving & improving on the original brilliant concept. Needs a bit more customer service this time (to achieve proper fit), and you really stepped up. Thanks so much for all you do!

After reading directions on how to put it on I can see the benefits of the suit. Its faster to slip on than chaps, vest & Jacket. The workmanship shows why to buy products made in USA. I can't wait to get it broke in as it feels bulky now. Your customer service is very helpful. I'm so glad I called after ordering to verify size. I ordered 44s but after calling I was lead to order a 44R... perfect Fit!! I have an iron butt ride coming up and will definitely wear your gear.

where to start? You all are proud of Aerostich, it shows! 1. Customer Service was the best experience I have had with any company in recent memory (remember I'm 72, so that may not be too much of a compliment). They were friendly, helpful, have a great grasp of your product line and did what they promised. 2. The quality of the product is first class & I love the hand signed label. Thank you Zach, Stephanie J, Heather, Jake, Drew & Karen G. I tried on 3 of your suits before ordering this one so had some experience. This one fits and performs as advertised & I will ride more confidently because of your efforts.

Thank-you Everyone, Jules Chourre
