*“What is it about maps? I could look at them all day, earnestly studying the names of towns and villages I have never heard of and will never visit, tracing the course of obscure rivers, checking elevations, consulting the marginal notes to see what a little circle with a flag on it signifies ...”*

—Bill Bryson, “Neither Here Nor There”

## BUTLER MOTORCYCLE MAPS MASTER G1 SET

Twenty maps that provide the overviews you can't see on any GPS, and let you easily find and navigate to the best rides you'll ever experience. Every map uses a three-colored highlight system showcasing ONLY the good/better/best sections of each road. The overall quality and detail of the cartography is stunning.

See and link together the very best parts of the most spectacular and sometimes remote roads—stuff you'd never find otherwise, including many hidden 'Lost Highway' gems—for truly memorable and incredible rides.

Elevation profiles, climate guides, fuel stops and even QR codes also provide solid information about where to sleep and eat or what to see when you're not riding. Backcountry versions are also available, designed for off-highway routes for memorable adventure and dual-sport rides. All are rugged, waterproof and tear resistant to provide years of planning reference and resist on-the-road abuse. Each is 38"×26" and they fold easily to fit inside tank bag map cases. 🇺🇸

**Master Collection (AK, AZ, N. CA, S. CA, TX Hill Country, CO, WY, MT, ID, UT, NM, OR, S. Appalachia, WA, N. NE, NV, S. Mid-Atlantic, ME & Maritimes, Ozarks & Rocky Mtn Planner) #4279 \$253.00**

*See website for individual and Backcountry maps.*

*"Let's go over that way, taking this river road shortcut thru there until we get to that cutoff, then we can go left to the bend here and then down onto this one where it goes west. We could maybe stop for lunch in this little town here, right by this crossing. And then..."*

*Only with printed maps do you see and understand the lay of the land fully. Everything in one sweeping overview with all the informational layering's. The roads and features fully visualized with some useful shortcuts and all the longer (usually more interesting) ways around. Roadside café stops can be incomplete without a map to study and then carefully refold when your order arrives, no matter how tasty the local food is.*

*Any dedicated GPS or a smartphone navigation program will be fast and helpful for finding your way toward some destination in real-time, with the ETA included, but good maps and atlas's remain the motorcycle riders most essential diagnostic wiring diagram for creating better riding and more interesting days, ranging from all-day back road weekend wanderings to multi-day multi-state overland explorations. Any GPS will algorithmically provide a fastest or a most direct route, but only you, using a well marked-up printed map, can create the BEST routes."*

## BIKE LOG

Not something you'd hit with your dualsport, it's a decidedly low-tech but effective way of keeping track of what it is you put into and on your motorcycle in the way of upkeep and maintenance. This simple but effective 5th edition 88 page spiral bound notebook has features that will enable those of us who can remember to write things down, an admirable place to do so and to refer to later. Updated with larger print, better spacing and other refinements to make it even more user friendly. Included are pages for service logs, trip data, oil changes, replacement tire entries and many other things like a winter storage checklist, specs for your bike, and an English/Metric conversion table to name a few. Small enough to fit in a jacket pocket, tank bag or other handy location (3.9"×5.75"). Bike Log has a laminated cover and even sports a drilled hole so you can hang it on a nail in your garage. Nice. 🇺🇸

## THE BEST ATLASES

Michelin Atlases are famous because they are filled with details for route planning not found elsewhere. Both these and the Rand McNally Road Atlases provide an overview you can't get on a GPS or mobile navigation app. Whether folding pages into a map pocket for on-the-fly navigation, or sitting down after that days ride to flip through pages and plan the next route, no digital replicant can quite compare to what you can do with a printed map.

## USA WALL MAP

This map is rich in details and subtle nuances portraying the US as a tapestry of basic geographic elements inlaid with a broad, multi-cultural spectrum of landmarks. Award winning cartographer David Imus, dedicated 6000 hours to meticulously craft this, maximizing information and readability with an emphasis on detailed topography. An intrinsically useful piece of art that will draw you in with beautiful cartographic detail and inspire a greater appreciation of, the real places it was inspired by. Completely indexed on back with all cities, landmarks

and places of interest, this is a uniquely fascinating map is superb for ride-planning. Printed on high-quality heavy paper. 50"×35.3".

#5633 \$29.00

## HISTORICAL ROUTE MAPS

Historic roads and routes are different. Finding them today isn't easy. This dual sided map will help. It's an enticing full-color high quality reprint of two historic maps. One side features a reproduction of an original pen and ink road and trail map circa 1915. Turn over to reveal a US highway map from 1931, showing designated highway numbers and a much expanded system of roadways from just fifteen years prior. The detail and historical intricacies of these stunning reproductions will inspire you to locate and ride the remaining sections of these old roads that still exist. Looks great on any wall, too. 38"×26".

#5606 \$19.00

## MECHANICAL GREASE PENCIL

Great for tracing routes and marking mid-ride notes on the tank bag map window. The wax "leads" exit the end of the pencil with a twist of the cap and come in a variety of colors. Mark any map background or bathroom wall you may encounter in an inscription that is rain-resistant, yet wipes away with just some thumb rubbing. Ideal for writing down directions at a pay phone when you blow into town. Better than a highlighter for route-lining maps, too. Includes one pencil and four different color leads. 🇺🇸

#2340 \$15.00

*"Good maps are where great rides always begin. I'll get them out for any trip of more than a few hours, and will write directly on their paper-printed cartography using one of these grease pencils, running my line an eighth of an inch to the side of desired roads. Such marked-up whole-state pages from oversize atlas's are customized wish lists of places to reach and roads to experience. They are torn out and folded to fit beneath a tank bag's window, with more similarly marked-up folded map pages waiting just beneath. And on longer trips an envelope bag, map bag, loksak, or Tank Bag Briefcase holds even a few more. Many riders take along an entire atlas.*

*Embarrassingly, I also still carry an old small liquid filled orienteering compass inside my bathroom shave kit, and another even smaller compass inside a zippered odds-n-ends tank-bag pouch. I don't remember the last time I wanted or needed either one. We stopped selling such compasses many years ago. They're vaguely sentimental artifacts now, but they don't take much space and perhaps add a slight psychologically reassuring emergency-backup-readiness-feeling for some kind of unlikely apocalyptic survival scenario. The one in the bathroom kit was originally placed there in the pre-GPS/pre-smartphone era, mainly for exploratory walkabouts through the mazes of sidewalks in unfamiliar larger cities arrived at by car or air.*

*These days we sell only one quasi-functional compass, a tiny cheap thing that clips onto a handlebar and is merely decorative unless it's moved well clear of the motorcycle. But we still stock dozens of detailed road maps, and six useful road atlases...because maps are never included. And they are essential."*

—Mr. Subjective

## ZIPPERED BOOK COVER

Specifically for use with all Rite In The Rain notebooks, but is also the perfect size for a paperback book or personal journal. Four pockets for writing utensils and plenty of space behind the cover flaps for important documents or extra stuff. Tough Cordura with rugged zipper closure. 8.75"×6.75". Tan.

**#5916 \$20.00**

*"This Cover has been a great way to keep my moto log, pens, tire gauge and receipts all together. Really like it." —Review by Larry*

## RITE IN THE RAIN NOTEBOOKS

Sometimes you want to leave a note. One that won't get destroyed by rain. Write it down on a sheet from one of these notebooks confident it will remain legible even in a rain-storm. This paper is the result of 75 years of R&D by company that focuses on serving scientists, surveyors and law enforcement personnel. Perfect for notes left on bikes and at other outdoor locations, or for all-weather journaling.

**BULLET**

## SPACE PENS

These pressurized (nitrogen-filled) ball points were actually developed so astronauts could write in outer space, but they are equally wonderful for marking damp maps, writing on soggy paper placemats, or philosophizing on greasy bathroom walls. The Bullet model has a removable clip, and a short, smoothly-rounded shape that lets you carry it in the front pocket of your jeans without getting stabbed in the thigh (3.6" closed, 5.3" open) Specify: Chrome, Black finish or Solid Brass. The AG-7 (anti-gravity) is the same model that went to the moon and features a side-button action. And back in the day the ol' Russians had to use pencils. 

**Bullet #2315 \$20.00**

**AG-7 #2367 \$37.00**

**Refill #2355 \$6.00**

**AG-7**

*"An exceptional pen for all conditions! I've owned a few of these (Bullet Space Pens) over the years. With the cap on the back of the pen, the pen is extended to a nice writing length. With the cap covering the pen, it's very compact. The ink writes well on wet or dry surfaces. It's a great companion to a "Rite in the Rain" brand notebook. The ink flows the same at 130 degrees as it does at 70 degrees, the same at 20 degrees below zero. I've used mine in the summertime in Kuwait, and while snow skiing in the Rockies. It always writes great for a ballpoint pen." —Review by Slonishku*

## STOWAWAY PEN

This Pen is compact enough to stow in the fold of a wallet or check-book, and it's pressurized genuine Space Pen refill writes crisp and clear at any angle and in any-conditions, including outer space if you could ride there.

Sturdy all-metal construction, it measures only 4" when closed and 5.1" open. Ball point tip rolls smoothly at any extreme temperatures, and on any surface, and fits almost anywhere. Black body. Black ink, medium point.

These are exact replicas of the signs above the HOV lanes across the freeways of California. They are a reminder that motorcycles are given extra privileges because riding them is social good. We all know that. Unfortunately most of your neighbors don't. They're positive motorcycles are self-indulgent toys -- Including yours. Let them know all fifty states have a totally different view, and have installed signs like these above our busiest and most congested roads to announce and declare:

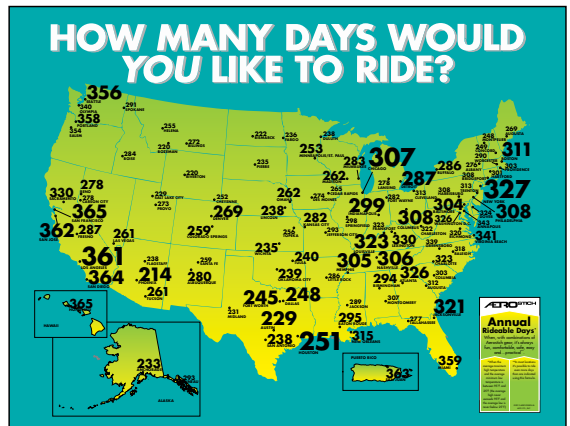

MOTORCYCLES OK. Officially. No equivocation. The government knows that choosing riding helps all of us, every time a rider gets on their motorcycle instead of getting into a car. 6" x 27".

### AEROSTICH RIDEABLE DAYS POSTER

How many days would you like to ride? Based on a formula that includes selected ambient temperature ranges when riding with Aerostich gear, this colorful map portrays a fascinating representation of the annual number of rideable days easily achievable annually throughout the United States. 38"x26".

#4162 \$10.00

### ABOUT THIS MAP

Statistics for the average daily and seasonal temperatures in thousands of locations are available from the US Department of Agriculture to help farmers know what kinds of crops to plant and when to harvest.

The different sizes of the numbers on the map correspond to the populations of the cities listed. In other words, a large number like Los Angeles have a lot of people, and the average low and high temps used by this formula are seldom exceeded there, so this city has lots of rideable days. In contrast, cities like Phoenix AZ and

Duluth MN each have different size numbers based on their differing populations, but similarly few rideable days because in those places so many days are by this formula on average either too hot or too cold.

The high and low temperatures used (95°F and 25°F / 35°C and -3.8°C) are based on the temperatures which are easy to dress for with Aerostich gear. It's always been comparatively simple to ride through temperatures between 95°F and 25°F over urban distances.

— Mr. Subjective, 1-14

### Annual Rideable Days\*

When, with combinations of Aerostich gear, it's always fun, comfortable, safe, easy and...practical.

\*When the average maximum high temperature and the average minimum low temperature is between 95°F and 25°F (the average high never exceeds 95°F and the average low is never below 25°F.)

\*\*In most locations it's possible to ride even more days than are indicated using this formula.

## AEROSTICH MR. AND MS. HAPPY PUPPET

So your buddy pulls over in a cloud of smoke with a broken chain piled up in front of his engine sprocket and a busted crankcase. Or he throws his new scooter up the street in a cacophony of sparks and shredded parts. Whattya do? Look uncomfortably at your feet? Cringe with empathy? Hell no. You whip out Mr. or Ms. Happy and lighten the mood with chirpy platitudes such as "Gee Bill, I'm sure we can find a guy to replicate that casting for big bucks." Or "That's OK Suzi, that bike was kind of ugly anyway, don't you think?" Chances are that after the rider in question chases you half a mile down the road and pummels you about the head and shoulders they'll feel MUCH better.

Be ready with a kind word and light pantomime for any downer occasion. Mr. & Ms. Happy want to help. Fit readily in most tankbags. Also good for cheering up rain-sodden rally campsites or bolstering spirits during multi-day bad weather scenarios that have eaten up most of a given vacation or ride. Bring one or both along on every ride and be ready whatever hullabaloo you find down the road.

The original photo was taken in 1948 from a speeding car as Free broke the land speed record by going 150 mph across the Bonneville Salt Flats in Utah.

Free had developed his famous 'whatever it takes' riding style in an effort to minimize wind resistance. When his leathers tore in earlier runs, he discarded them and made this final winning attempt wearing only a bathing suit, shower cap and a pair of sneakers. The result was history...

The Rollie Free Framed Print is a high quality, digitally restored reproduction with a sepia tone for that extra-vintage look (frame size: 11"×14", image size: 7.5"×9.5").

### OHNE TITEL ZWEI

A few years ago a customer sent us a postcard featuring this painting by award-winning German artist Michael Sowa. Art can be very subjective, so we'll leave it up to you as to the meaning of this one, but we thought it was cool enough to share. The title of the original is "Ohne Titel Zwei", which translates to "Without title two"...leaving it open to even further interpretation. Regardless of that, it seems like Michael understands a bit about riding's relationship to our inner lives. If this painting speaks to you, or if you know a rider who might enjoy it, select from a framed print, poster, ceramic mug or 100% cotton t-shirt.

## AEROSTICH ROAD GRIMED ASTRONAUTS

You know who you are. You're among friends here...but across the world of ordinary people, regular workplaces, common hardware stores, consumerized shopping malls, offices, workshops and chain grocery stores...a Road Grimed Astronaut patch goes a long way. Because most people have no idea.

Let me explain. Do people in grocery stores and gas stations see your onesie coverall or teched-out armored adventure suit as peculiar? Have you ever ridden past a bedraggled looking group of bevested and bechapped riders standing around under a freeway overpass smoking cigarettes and waiting for the rain to stop...and did you smile inside your helmet as you went by? Do bearded hipsters regard the uncoolness of your wonderful habiliment from saddles of their fenderless aircleanerless purified bikes or (more likely) thru their car windows as you ride by them in traffic on a cold dark day?

If some of this is slightly familiar, you are a Road Grimed Astronaut. You have the right stuff. So you might want this.

The 3" size of the embroidered RGAC patch will be added to the sleeve of any ordered new AeroStich suit or Darien gear FREE if requested. And if you send us worn AeroStich gear for service and ask, we'll add an RGAC patch FREE, too, if requested.

## BODIES IN MOTION:

### EVOLUTION AND EXPERIENCE IN MOTORCYCLING

Motorcycling's sensations are easy to experience, but harder to explain. How can riding be so exciting and yet relaxing at the same time – and why does this combination make us feel so good? Rather than question this, most motorcyclers simply settle into the saddle, turn the key, grab the handlebars, and enjoy the magically uplifting experience.

Here, Steven L. Thompson examines some of the most nuanced aspects of the rider/machine relationship. With research and analytics he disentangles our psycho-biological connections with the kinesthetics of riding from a complex mix of cultural elements surrounding motorcycling. Here are ideas that point us toward a better understanding of why motorcycling is important, and why riding has such a powerful influence on us.

In the author's own words, Bodies in Motion "...is written both for motorcyclists and non-motorcyclists, and thus longtime riders will inevitably find some material familiar, though I have tried to ensure that the context is analyzed to highlight aspects of the commonalities that are usually overlooked or misunderstood...Bodies in Motion thus explores what evolutionary science, psychology, human-factors research and engineering research can tell us about why some people seek certain kinds of mobile experiences and others do not.

The overwhelming importance of automobility to our way of life means that human nature, as science can show it to be, is vital to our continuing attempts to cope with the costs that automobility has thrust upon us, along with its benefits." ## PHYSICS FOR GEARHEADS

There is no better way to learn physics than by having a problem to solve. The experience you already have tuning cars or motorcycles is your virtual physics lab. Physics for Gearheads will show you that if you can learn about motorcycles or cars, you can learn about physics. Whether your interest is in increasing your engine's horsepower, getting more miles per gallon, or shaving tenths off your lap time on track day, you can use physics to gain insight into the problem and formulate a solution. Physics for Gear-

heads not only explains physics principles in language you can understand, it demonstrates how to use physics to your advantage. By Randy Beikmann. Softbound, 9.9"×7.8". 608 pp., .347 color illus. and diagrams.

## SHOP CLASS AS SOULCRAFT

A wonderful make-you-smile book by an engaging mechanic/philosopher/storyteller who, after many years of working in various office situations, started a one-man motorcycle repair and restoration business. For years the author was a PhD 'knowledge worker', busily writing expert papers and analyzing proposals. Then one day he stopped doing that to take up wrenching on old motorbikes. Could he make it economically and emotionally? Mechanically?

This is someone who's thought hard about how the world's continuing expansion of white-collar work has been changing people and society. His book is a page-turning storyteller's tale, saturated with examples of motorcycle repairs and learning experiences which elucidate important ideas about the value of real quantifiable work and how it relates to better personal, financial and emotional security. It's an extremely thought-provoking story with a wonderful bunch of moto-anecdotes. By Matthew B. Crawford. Softbound, 6"×8.5", 246 pp., b/w illus.

## BOTTOM DEAD CENTER

This is real, authentic moto-life from the inside, humbly written in a no-apologies, kick-ass bluntly funny style, by a long-time racer, mechanic and motorcycle shop business guy from the Bay Area. He's literate as hell and calls them all just as they are, from cycle-bums, bikes and racers encountered, to the everyday moto-life experiences you'll absolutely recognize.

A self-published little gem, filled with memories of working on and racing motorcycles at Daytona and a plethora of people and moto-related musings along the way. A great cover-to-cover bedtime, road trip or (...ahem) bathroom read. By Ed Milich. Softbound. 5.5"×8.25", 92 pp., b/w illus.

## BOHEMIAN ROAD TRIP

This book is like a ham sandwich, small, fits in a bag and digestible in one or two sittings. It is an easy to follow true story offering up three themes running concurrently. A motorcycle racer who betrays himself by quitting. A year-long trip of discovery, and the things that can only happen on the road; calamities, disasters, Spiritually insightful and profoundly funny experiences...and a smorgasbord of remarkable people. The third tier is about the time this story takes place, mostly 1965 to 1973, with grass and psychedelics providing a backdrop for self-examination and the pure expression of free will. This is a trip of exploration and a testament to the actual living of a life, rather than trying to explain it. The author is a rider and racer who has written many articles over the years, including feature stories in Cycle, Cycle World and some fictional stories featured in Penthouse in the early '90's. This is his first book. By Paul 'Chip' Furlong. Softbound, 7"×4.5" 182 pp., color & B/W photos.

## FAR AND WIDE

35 concerts. 17,000 motorcycle miles. Three months. One lifetime. In May 2015, the veteran Canadian rock trio Rush embarked on their 40th anniversary tour. For the band and their fans, R40 was a celebration and, perhaps, a farewell. But for Neil Peart, each tour is more than just a string of concerts, it's an opportunity to explore backroads near and far on his BMW motorcycle. So if this was to be the last tour and the last great adventure, he decided it would have to be the best one, onstage and off.

This third volume in Peart's illustrated travel series shares all-new tales that transport the reader across North America and through memories of 50 years of playing drums. From the scenic grandeur of the American West to a peaceful lake in Quebec's Laurentian Mountains to the mean streets of Midtown Los Angeles, each story is shared in an intimate narrative voice that has won the hearts of many readers. A richly illustrated, thoughtful, and ever-engaging scrapbook of people and places, music and laughter, from a fascinating road — and a remarkable life. Hardbound. 8"x10", 312 pp., color photos.

## WHEN ALL HELL BREAKS LOOSE

Proven tactics and real-world applications to prepare and educate yourself about survival psychology and the skills necessary to negotiate a disaster whether you are at home, in the office, or on your motorcycle. for self-reliance. According to the book, living through an emergency scenario is 90 percent psychology, and 10 percent methodology and gear. Relevant quotes and tips are placed throughout the pages to help readers remember important survival strategies. ## RIDING MAN

This guy gave it all up just for a chance to compete in the Isle of Man TT. He quit his job as a big-shot ad exec, sold everything he owned, and put every ounce of his soul into a race that he didn't even know if he'd qualify for. Talk about passion... He was also the subject of a documentary film, One Man's Island (#3293). This isn't just a companion book to the film – it's an amazing story written by the man himself. Whether you're a long-standing fan or a greenhorn to the TT, this book will grab you right from the beginning. By Mark Gardiner. Softbound, 6"×8.75", 247 pp.

## JOE BAR TEAM

Four guys who hang out at a curbside bar owned by 'Joe' and their often hilarious antics and adventures give a glimpse into French cafe' racer culture of the 70's and provide more than a few laughs along the way. Chased by cops, taunting each other into overstepping their riding ability, happily tearing down a stranded rider's Guzzi (even though it only ran out of gas), and experimenting with Joe's cocktail mix in their fuel are just some examples of the hijinks that will have you laughing at, and with, this crew. ## FART PROUDLY BY BEN FRANKLIN

This founding father was a witty guy, and had a great bawdy side. The writings in Fart Proudly reveal the rogue who lived peaceably within the philosopher and statesman. Included are "The Letter to a Royal Academy," "On Choosing a Mistress," "Rules on Making Oneself Disagreeable," and other jibes. Franklin's irrepressible wit found an outlet in perpetrating hoaxes, attacking marriage and other sacred cows, and skewering the English Parliament. These essays endure as both hilarious satire and a timely reminder of the importance of a free press. He really wrote this—sure makes me proud. 8.5"×5.5", 128 pp.

## AMERICAN NOMADS

Fascinated by the land of endless horizons, sunshine, and the open road, Richard Grant spent fifteen years wandering throughout the United States, never spending more than three weeks in one place and getting to know America's nomads: truckers, tramps, rodeo cowboys, tie-dyed concert followers, flea market traders, retirees who live year round in their RV's, and the murderous Freight

Train Riders of America (FTRA). In a richly comic travelogue, Grant uses these lives and his own to examine the myths and realities of the wandering life, and its contradiction with the sedentary American dream.

Along with a personal account, American Nomads traces the history of wandering in the New World, through vividly told stories of frontiersmen, fur trappers and cowboys, Comanche and Apache warriors, all the way back to the first Spanish explorers who crossed the continent. What unites these disparate characters, as they range back and forth across the centuries, is a stubborn conviction that the only true freedom is to roam across the land. By Richard Grant. Softbound, 320 pp.

Transportation is one of the few big things we can change — our personal choices do have a profound impact, and that fork in the road is coming up fast. A fascinating detective story, investigating the worldwide cast of characters and technologies that enable us to move from here to there — past, present, and future. By Edward Humes. ## WHY WE DRIVE

Educational and fun to read, this interesting little tome of transportation propaganda uses pictographics, history and insightful common-sense to drive straight to the heart of America's dependence on cars.

While not specifically advocating motorcycling, the author does make a concisely narrated argument in support of the adoption of alternative forms of transportation, while outlining the conspiracy, politics and collusion that have shaped our current system of congestion, urban sprawl and cyclical dependence on ever expanding roadways.

An inspirational and insightful examination of American transportation. Worth a read, pass it on... By Andy Singer. Softbound. B&W illus. 160 pp. 5"×7".

## THE PRIMAL BLUEPRINT

The cover makes it look like every other Fitness/Diet/Self-Improvement book...but inside is an entirely different kind of fitness and health guide explaining how we eat, live and exercise...and

why much of what we do is not good. The premise is simple: Humans evolved over 500,000 years and our eating + exercising practices are from only the last 30,000 years of post-agriculture civilization. Mis-match.

The inspirational, irreverent and often humorous text is fun and mind opening. There's a lot of really great help here, and if you follow it you'll probably be stronger, feel better, get sick less, and live longer... By Mark Sisson. Hardbound, 7.25"×9.5", 283 pp., b/w illus.

## BETTER OFF

An MIT student proposes a simple question: Do humans really need this much technology? Furthermore, can we live without it? Have we gone so far that we've become dependant on it? Hmmm... By odd chance, he accidentally stumbles upon a Mennonite village and decides...hey, what the heck, let's give this a shot for 10 months. No cell phone, no computer, no internet, no electricity, no TV, no radio, no running water, no motorized transport, no nothing. Not even a newspaper. So, our fearless author heads to the village with his wife, after being married for only one week (!) and together, they give it their best try. Do they make it? Do they run away screaming? Do they go crazy and murder each other? You'll have to see for yourself. By Eric Brende. Softbound, 5.25"×8", 234 pp., no illus.
