

## DEERSKIN / ELKSKIN GLOVES (REGULAR, INSULATED, AND GAUNTLET)

### *Washable Leather Instructions:*

Elk and deerskin can be safely hand washed using warm water and a mild soap. This removes accumulated dirt, oils, and stains and will help the gloves last longer and feel nicer. After rinsing thoroughly to remove residual soap, gloves should be gently wrung damp and allowed to dry gradually at room temperature. DO NOT apply direct heat. Gloves will shrink slightly when they dry, but will stretch-to-fit during wear. Note: Black gloves will bleed dye when wet. This diminishes after several wet and dry cycles.

Thank you for purchasing these gloves.

Call if you have any questions or comments about their use. 218-722-1927 or email <[products@aerostich.com](mailto:products@aerostich.com)>
