Thank you for choosing an Aerostich Parcel/Courier/Dispatch/Letter Bag. Congratulations on owning this better way to carry things. These tips will help you get the most from your new bag:

Loading - Large and flat objects are best carried closer to your back. The bag will fit better and be more comfortable when loaded below its maximum capacity, providing some room for the bag to contour around you. The smaller pockets located inside the main bag are ideal for glasses, checkbook, writing tools, cellphone, etc...

Flap and Handle - The Velcro loop area on the side of the bag is larger than the hook area underneath the flap, so careful alignment when closing the flap is not needed. Use of the quick release buckles and straps is optional, depending on the load carried. A loaded bag may be lifted and carried by its handle without using the buckles if the flap Velcro has been fully engaged. The buckles and straps are useful for oversized loads.

Carrying handle on top flap

Shoulder Strap and Pad - When worn diagonally across the shoulder, adjust the strap length so that the bottom corner of the bag is below the small of your back. The lower end of the bag can rest on the passenger area of the motorcycle saddle. If the shoulder strap length is adjusted too short, the bag will be less comfortable to wear. If the shoulder strap is too long, the bag may shift unexpectedly when making abrupt riding maneuvers. On bikes with low handlebars and forward leaning riding positions, a Stabilizer Strap (#1925) may be attached from the lower and opposite corner of the bag diagonally across the chest to the shoulder strap.

Waterproof Performance - The Cordura outer fabric is both DWR (Durable Water Repellent) treated and coated underneath with a waterproof urethane layer. The Waxed Cotton Bags feature the waterproofness and hard-wearing toughness of a traditional English waxed cotton outer fabric. All bags use a waterproof yellow neoprene inner liner fabric. Despite these waterproof materials, during severe rain conditions a small amount of water may enter the bag via the small opening at the ends of the flap, or through a few of the stitching holes.

Cleaning - Machine wash Cordura Bags using any type of detergent. Using a water repellent spray or wash-in water repellent preparation will improve stain resistance and water repellency. Clean Wax Cotton Bags by wiping with a damp sponge.

History - Introduced in 1985, the Aerostich Courier Bag was the first modern courier bag. It was made using lightweight, abrasion resistant Cordura Nylon and other advanced synthetic materials. Existing courier bags had previously been made using cotton duck, metal buckles and leather. This was also the first Courier Bag to incorporate retro-reflective materials, to use quick release buckles, to have a handle on the flap, to use nylon webbing for its shoulder strap, to have all inside seams bound and finished, and to offer a variety of carrying strap accessories. This is the original, modern courier bag.

Warranty - Thirty days unconditional and two years for materials and workmanship.
